How to defeat 7,000 diseases at once

AG adoc 14 Apr 2021, 7 hours ago

162 +386

There are ~ 7,000 diseases on Earth - all rare or very rare, and almost all the hardest, epic, biblically painful - that humanity could, if desired, simply turn off. Turn the switch on and off for 7,000 terrible diseases. Do we want to do this or not?

10 symptoms of COVID-19, or how to speed up data collection

AG adoc 10 Mar 2021, 39 days ago

12 +36

Now, when in most countries, restrictions are beginning to be removed, the number of cases in the world continues to grow. Two types of difficulties with coronavirus symptoms are:

How I conquered insomnia

There are ~ 7,000 diseases on Earth - all rare or very rare, and almost all the hardest, epic, biblically painful - that humanity could, if desired, simply turn off. Turn the switch on and off for 7,000 terrible diseases. Do we want to do this or not? Pharmaceutical companies will be unhappy because the treatment of these diseases costs the same epic money - about \$ 1 trillion dollars a year around the world - but can it somehow learn how to withstand their puffed up discontent?

Pharmaceutical companies will be unhappy because the treatment of these diseases costs the same epic money - about \$ 1 trillion dollars a year around the world - but can it somehow learn how to withstand their puffed up discontent?

We are talking about hereditary diseases, genetic diseases.

A huge part of them is caused by recessive mutations. If the father and mother have the same mutation, then their children have a 25% chance of having this genetic disease. These are phenylketonuria, Lesch-Nyhan syndrome, Nimann-Peak disease, mucopolysaccharidoses, spider eyes (Marfan disease), Konovalov-Wilson disease, etc., etc. - such things that you will not wish to the worst enemy. I will not describe the course, it will be difficult for you. Yes, many of the sick die by the age of 20-30, but these 20-30 years are for them and their relatives ..

From the text above it's already clear how these diseases can be turned off. If you are a carrier of a rare recessive mutation, then you do not need to create a family with another carrier. It's better to just don't need to do it / him, do not sleep with him / her.

Now that in the USA more than 70% of acquaintances occur through dating sites, this can be achieved gently and completely painlessly. Only 1 guy or girl out of 5000 will be contraindicated for you - this is the worst case scenario - that is, there is no limit to the breadth of your choice. As the saying goes, hand over the genome and sleep peacefully [it should be such a personal encrypted module that you connect to any site of your

As the saying goes, hand over the genome and sleep peacefully [it should be such a personal encrypted module that you connect to any site of your choice. I won't get into technical details.]

So, we, the Society, want to get rid of them from genetic diseases or not?

We had two bags of grass, seventy-five pellets of mescaline, five sheets of high powered blotter acid, a salt shaker half full of cocaine, and a whole galaxy of multi-colored uppers, downers, screamers, laughers... and also a quart of tequila, a quart of rum, a case of Budweiser, a pint of raw ether and two dozen amyls.
