

Giraffes!

Author: Kalyagina Valeriya From 6B

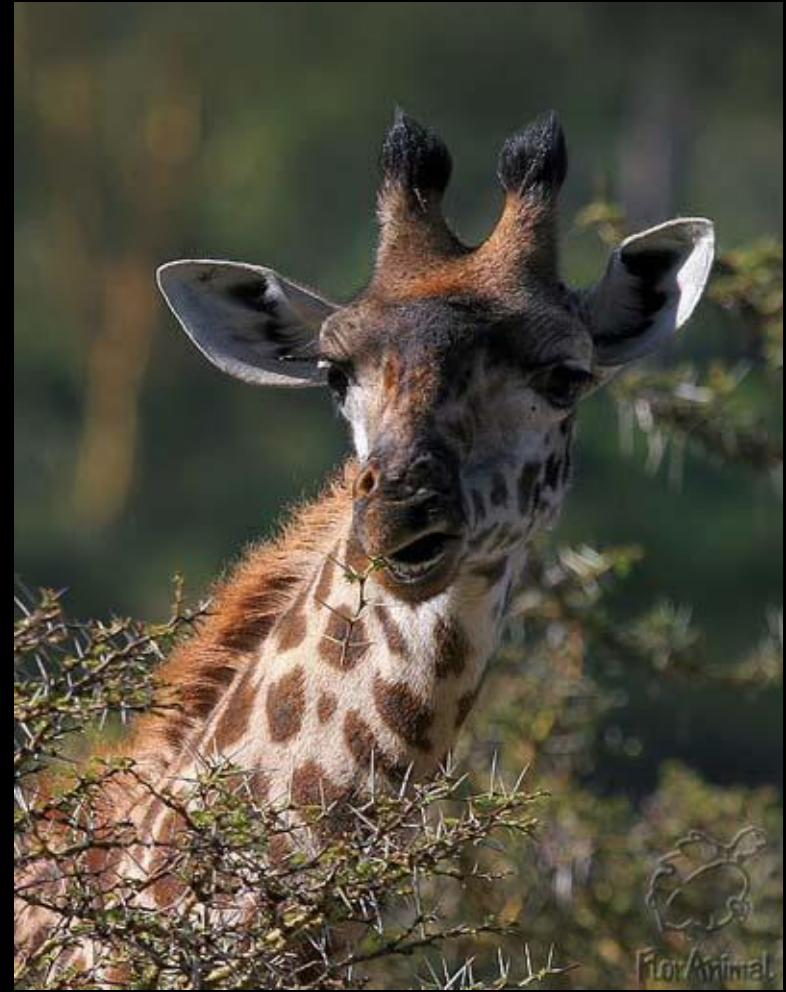

**The giraffe lives
in Africa.**

**It is an exotic
animal.**

**This is the tallest
animal in the
world.**

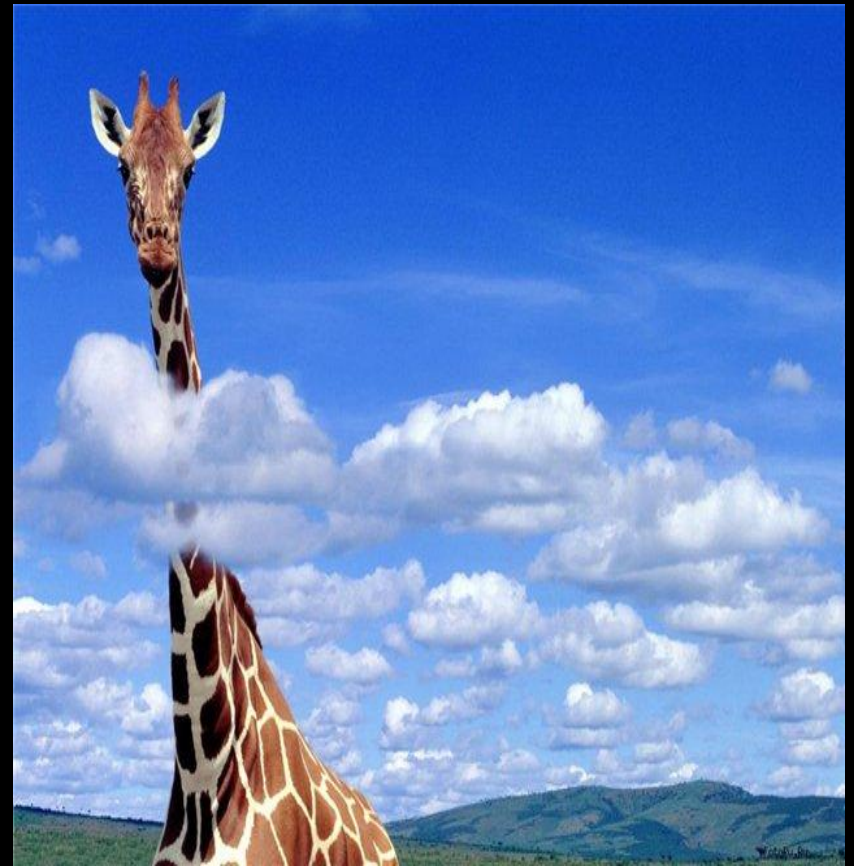

**It can be 6 or 7
meters high.**

The giraffe can see very well. It has small horns on the head. They are usually yellow with brown spots.

It is important for giraffes to have good hearing to identify predators.

These animals like to eat acacia very much.

They are very generous and kind.

I like them very much.

Thank you for attention!
