

Ecology In The City Of Volzhsky

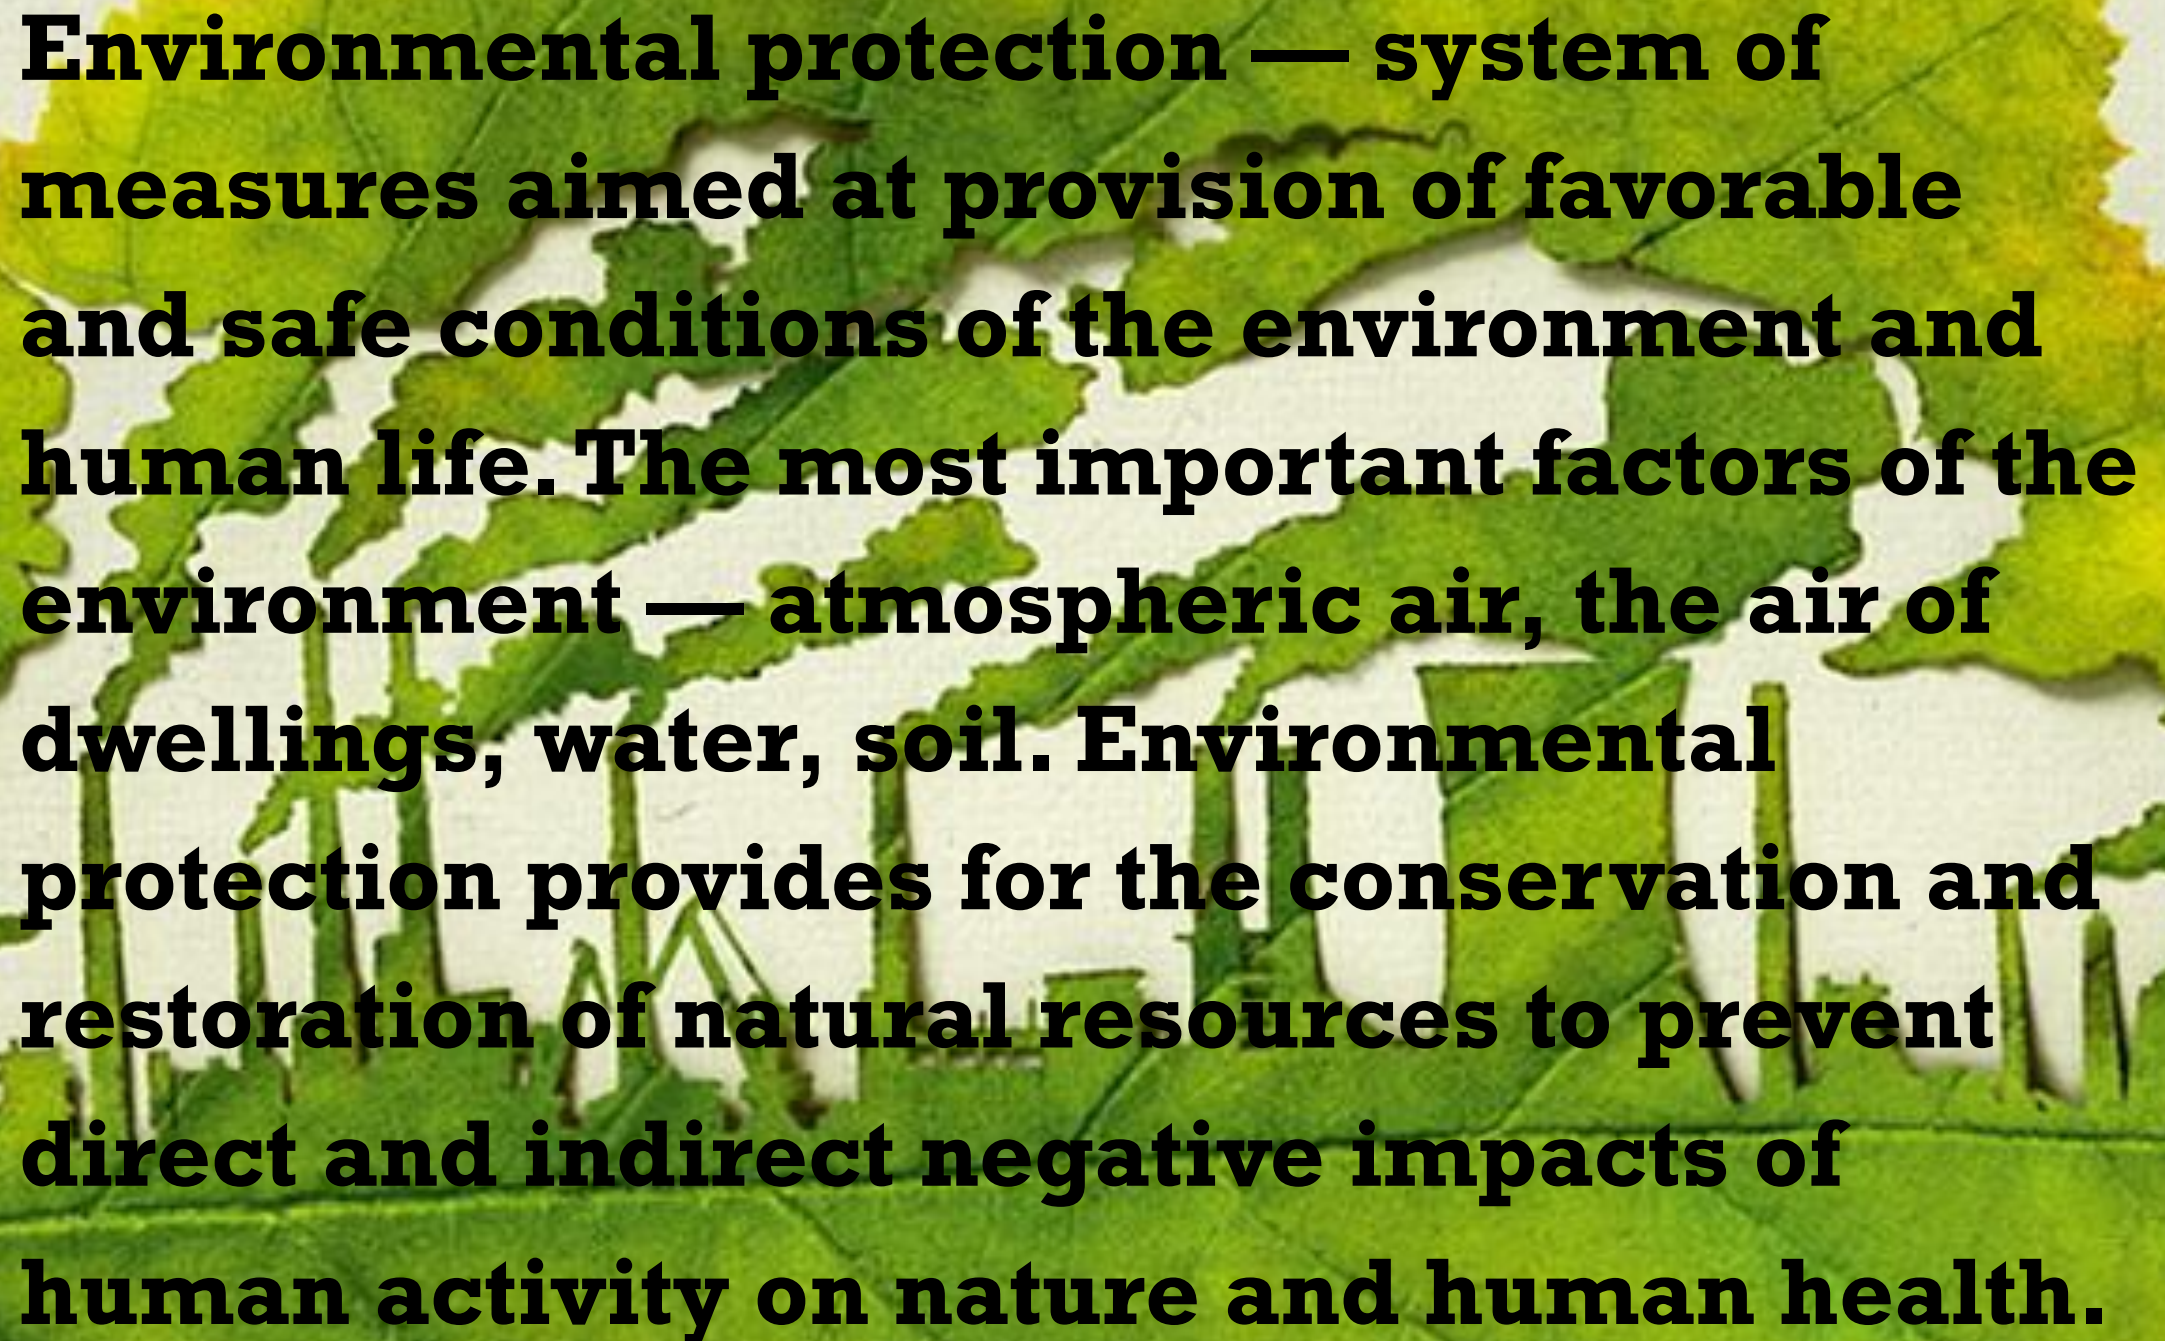

ALARM BELLS

Acute problems of our time are:

environmental protection and ecological norm.

That's why this topic is very relevant and attracts the attention of millions of people.

Environmental protection — system of measures aimed at provision of favorable and safe conditions of the environment and human life. The most important factors of the environment — atmospheric air, the air of dwellings, water, soil. Environmental protection provides for the conservation and restoration of natural resources to prevent direct and indirect negative impacts of human activity on nature and human health.

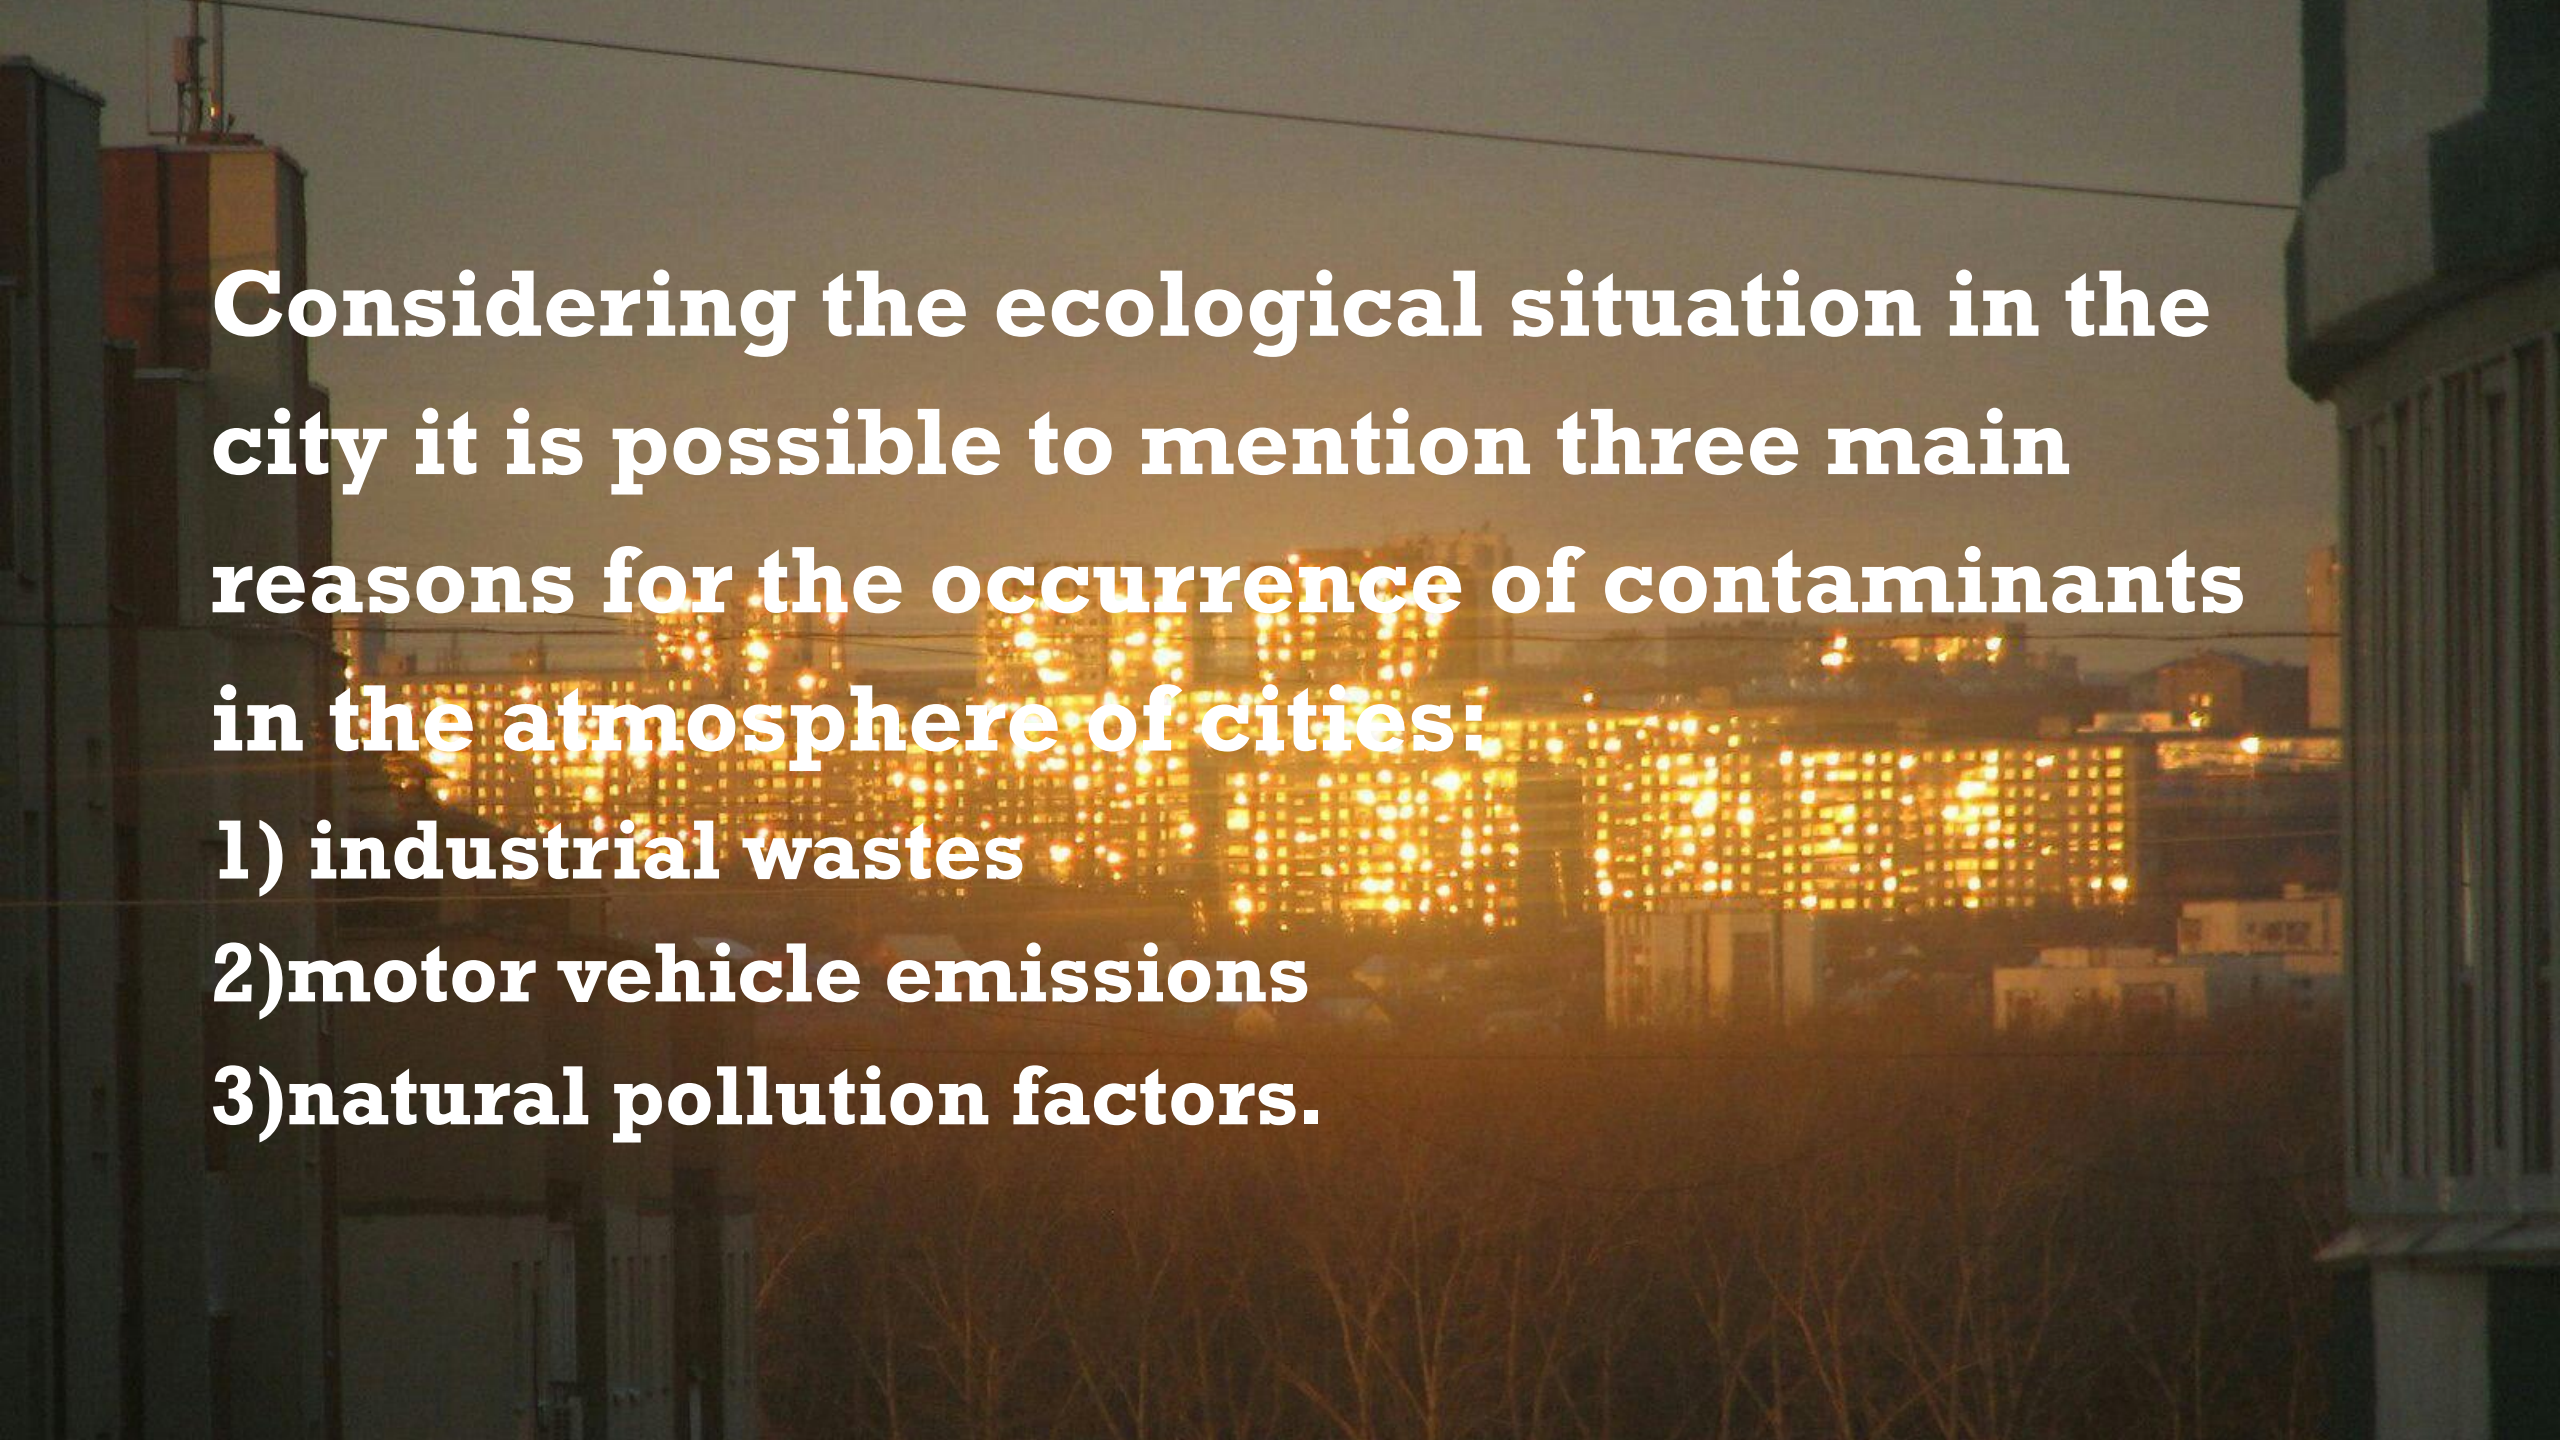

ECOLOG

ENVIRONMENTAL NORM — the norm of ecological systems in space and time and environmental condition of geosystems and their components

THE POLLUTION OF THE CITY

In this small town or near the city is the 11 factories that pollute the environment, thereby affecting the health of citizens. The city of Volzhsky come in the top ten most polluted cities of Russia

A night view of a city skyline with illuminated buildings and a hazy atmosphere. The text is overlaid on the image.

Considering the ecological situation in the city it is possible to mention three main reasons for the occurrence of contaminants in the atmosphere of cities:

- 1) industrial wastes**
- 2) motor vehicle emissions**
- 3) natural pollution factors.**

An aerial photograph of a city, likely Volgograd, Russia. The city is densely packed with buildings and green spaces. A prominent feature is a tall, red brick smokestack in the center, which is emitting a thick plume of white smoke that rises into the sky. The smokestack is surrounded by a large, open area, possibly a park or a sports field. The overall scene suggests a city that has experienced significant industrial activity and pollution.

**Severe pollution has occurred
literally 13 years ago, because in
2004, the city of Volzhskiy was
recognized as the most green city
in Russia, what next?!....**

VOLUNTEERS

Fortunately, many people are thinking about their future, their children's future and our city. These people are volunteers. Of course they can't do anything to clear the air, but they do not unimportant - collect garbage around the city, beaches, plant trees

The cleanliness of our city depends on us and that the city of Volzhsky, so polluted is our fault. Therefore, we must say a huge thank you to the volunteers and simply not indifferent people who try to benefit our city and to monitor its cleanliness.

**THANK YOU FOR YOUR
ATTENTION!**
