Litter on the streets

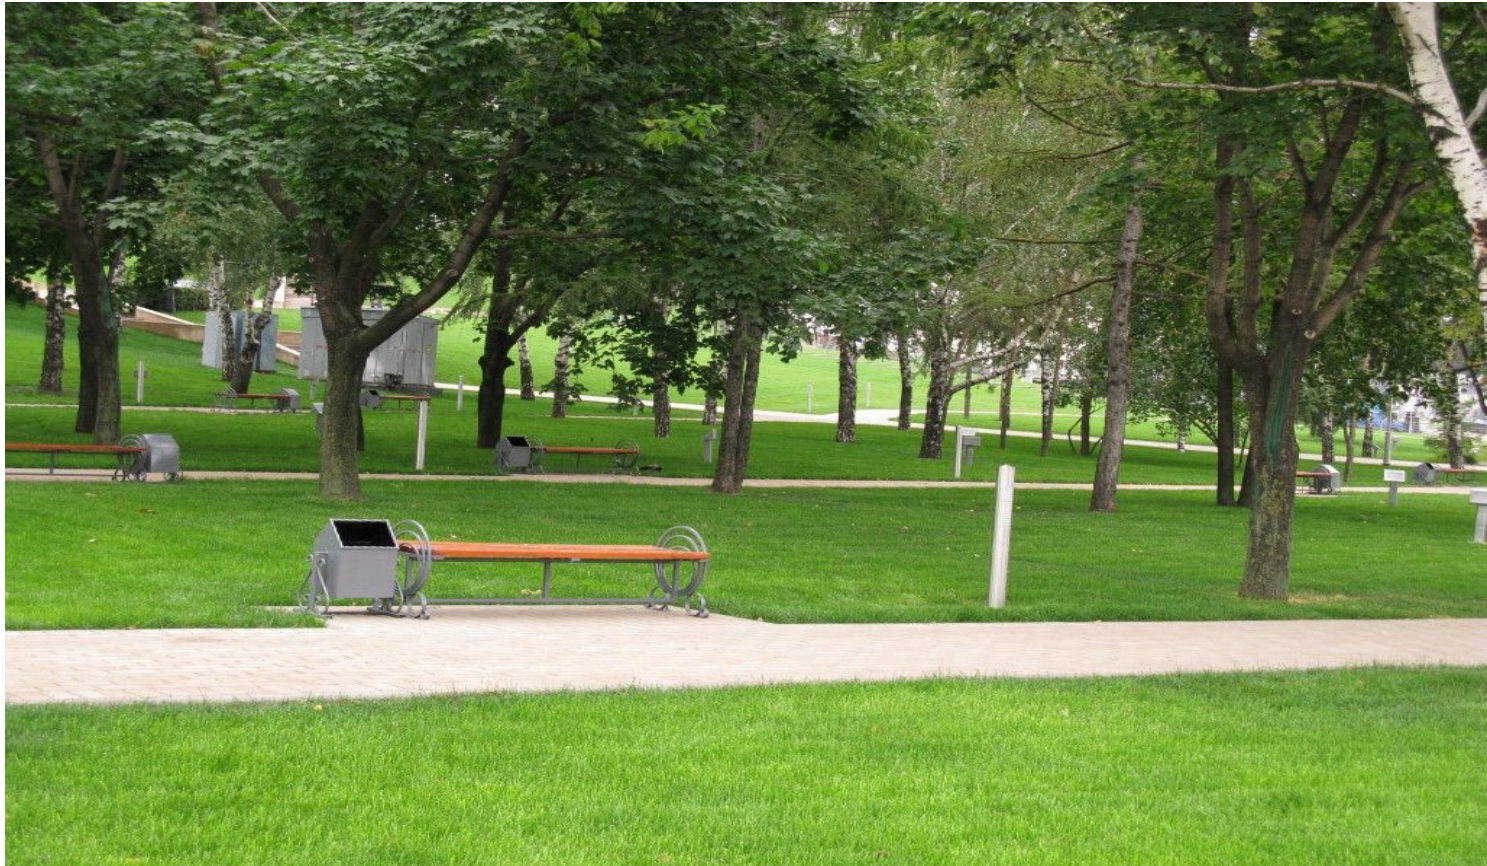

One of problems of our city is litter on the streets.
There are a lot of plastic bags bottles and paper.

There are a lot of illegal dumps in my town .
And some people don't understand that they need
throw away trash in special places

- And if I were a measures of my town I would encourage people to don't spoil streets.
 - Our city would be cleaner !

Homeless animals

In my town many homeless animals. I would build special animal shelters.

I would ban disposing of animals from home because animals are suffering. More we can send the money to fund the protection of animals. These organizers will spend the money on food and necessary things for animals.

Noise

My city is very noisy, the reasons for this machine. It sometimes prevents to live in some homes. I think that would reduce the noise in the city often need to use electro mobiles, for cars to be quieter.

I would encourage people to cycle or walk by people from driving cars in the city centre. I think these rules will be able, though not a lot to reduce the noise in the city

Air pollution

The first problem in our city is air pollution . The causes of his are factory and cars.

People must put filters on factory. We must replace the fuel on solar energy. All people need to plant trees on the streets.

Resources

To preserve nature, it is necessary to save the light in the house, save water, gas and electricity. When you or your parents brush their teeth or wash, you need to turn off the water.

When you go for a walk or go to the magazine you need to turn off the light in the rooms, kitchen and bathroom. And if you are leaving away for a long time, for example , two months, you should turn off the gas, electricity and water
