

DM Treatment

IBRAGIMOV B.

445 GM

Human Insulin Production

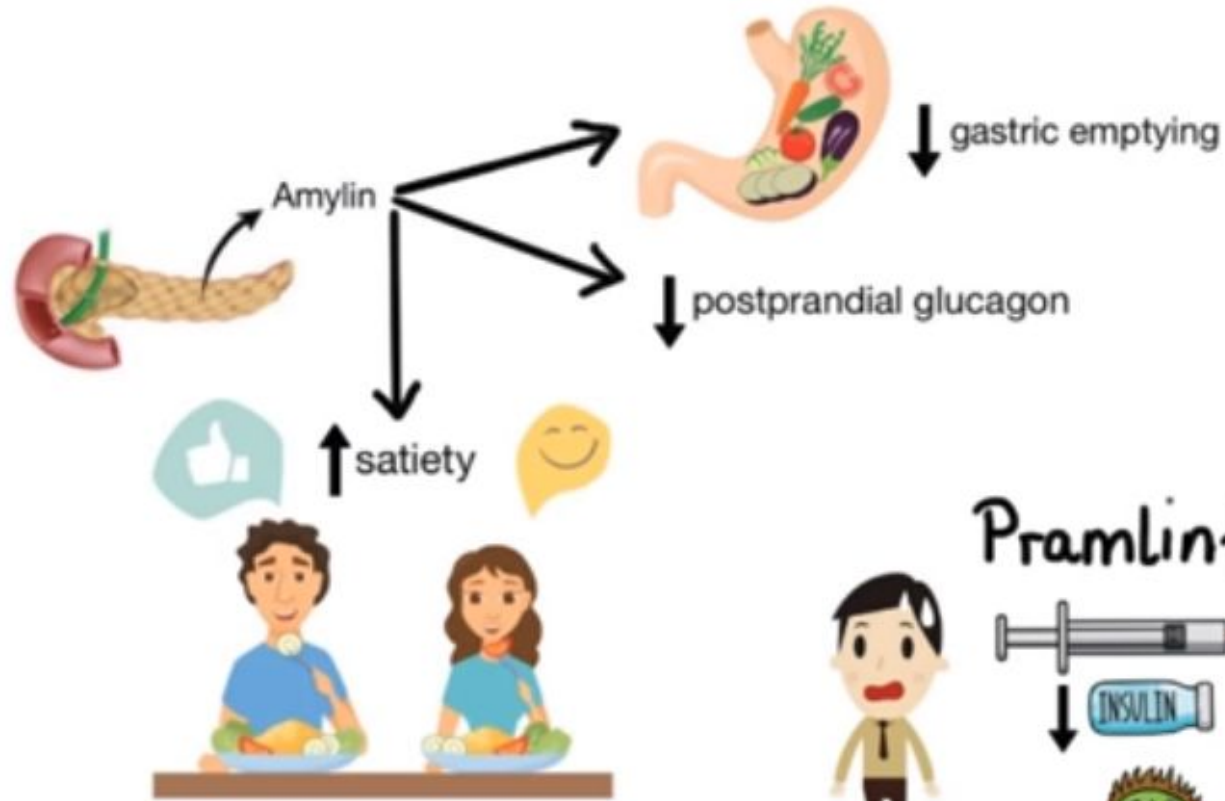

THE

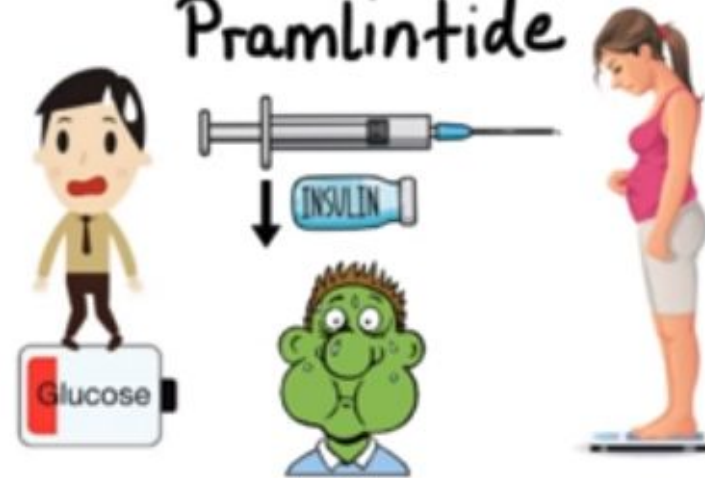

honeymoon phase

IN TYPE 1

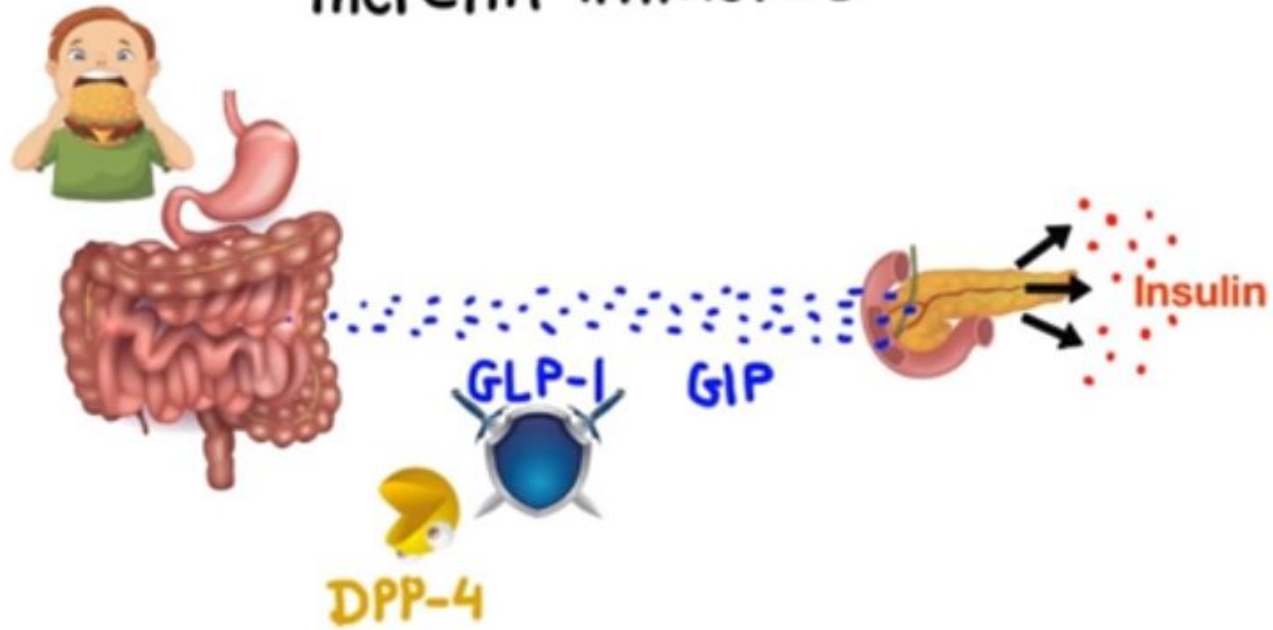

Synthetic Amylin

Pramlintide

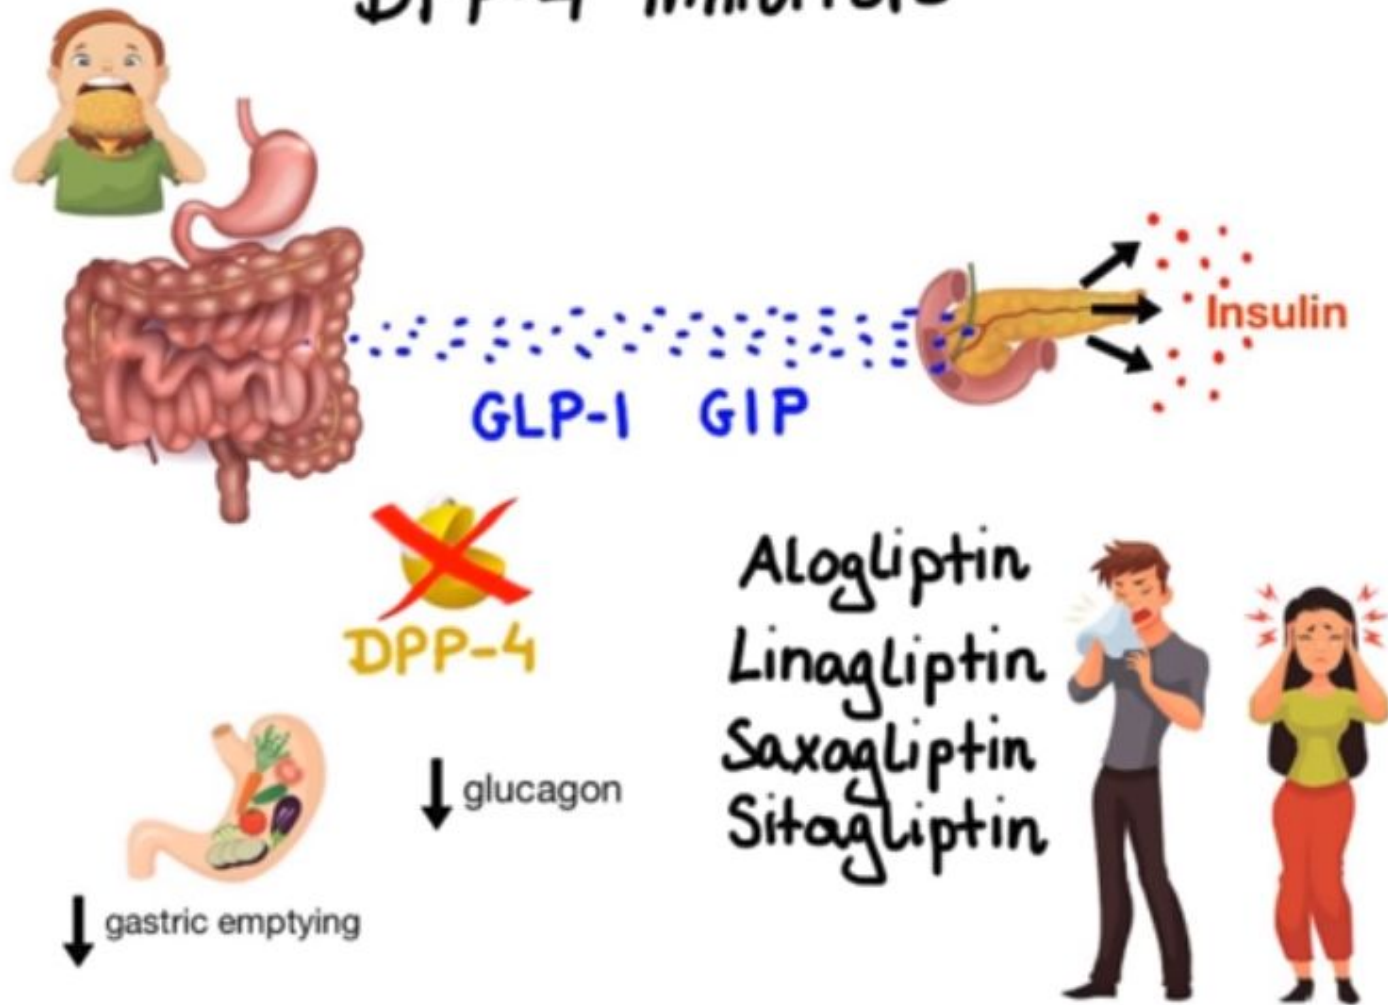

Incretin mimetics

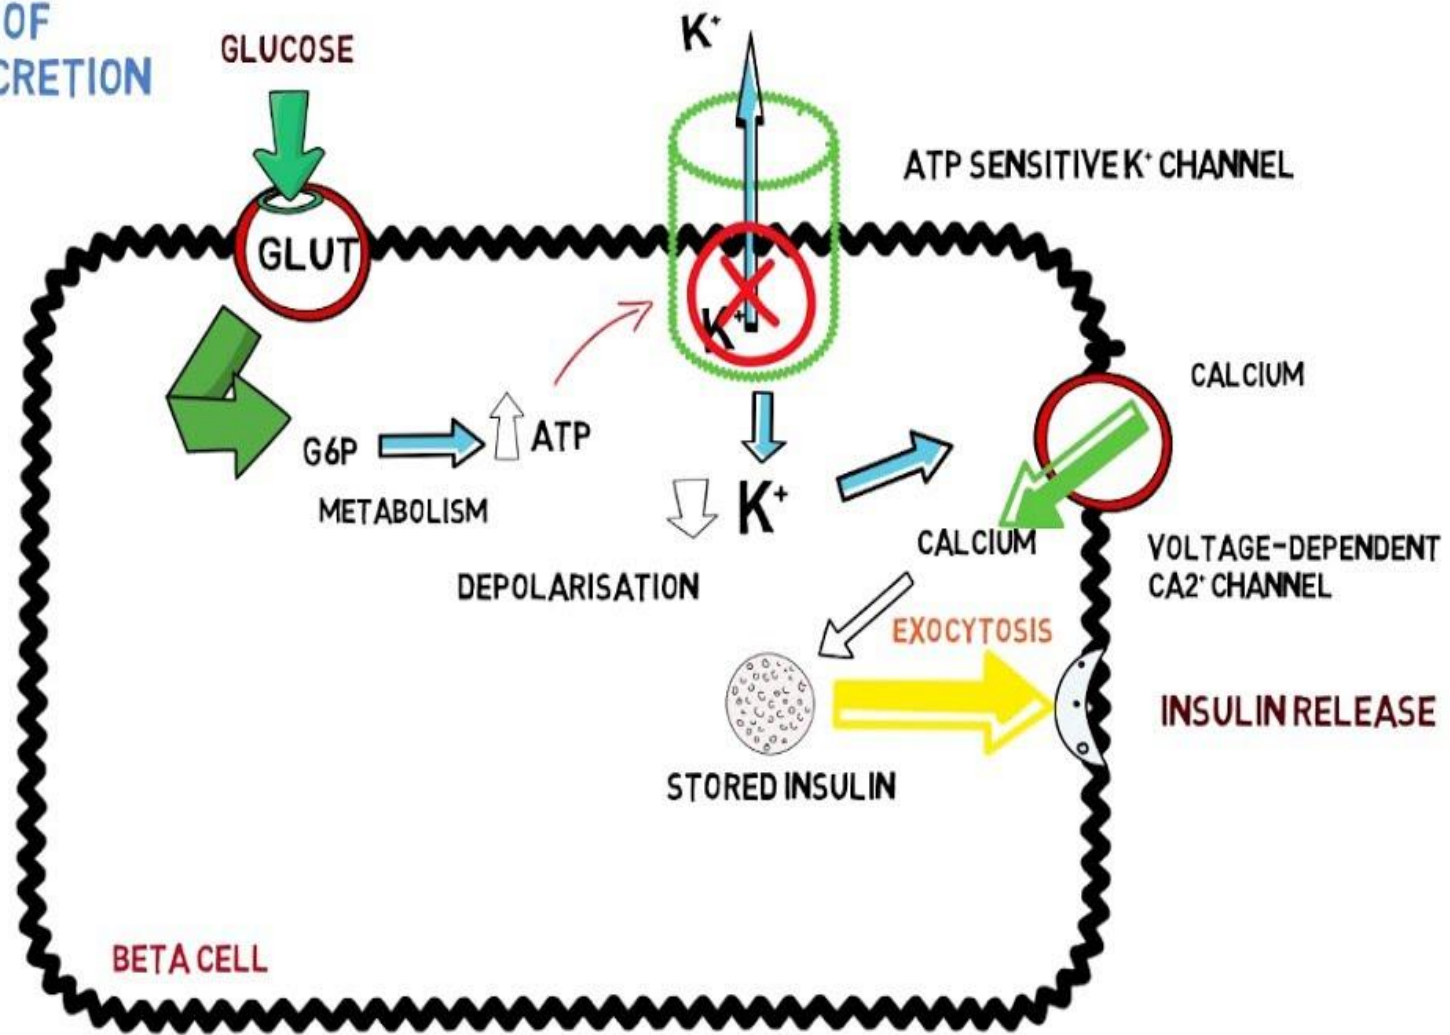

Exenatide & Liraglutide

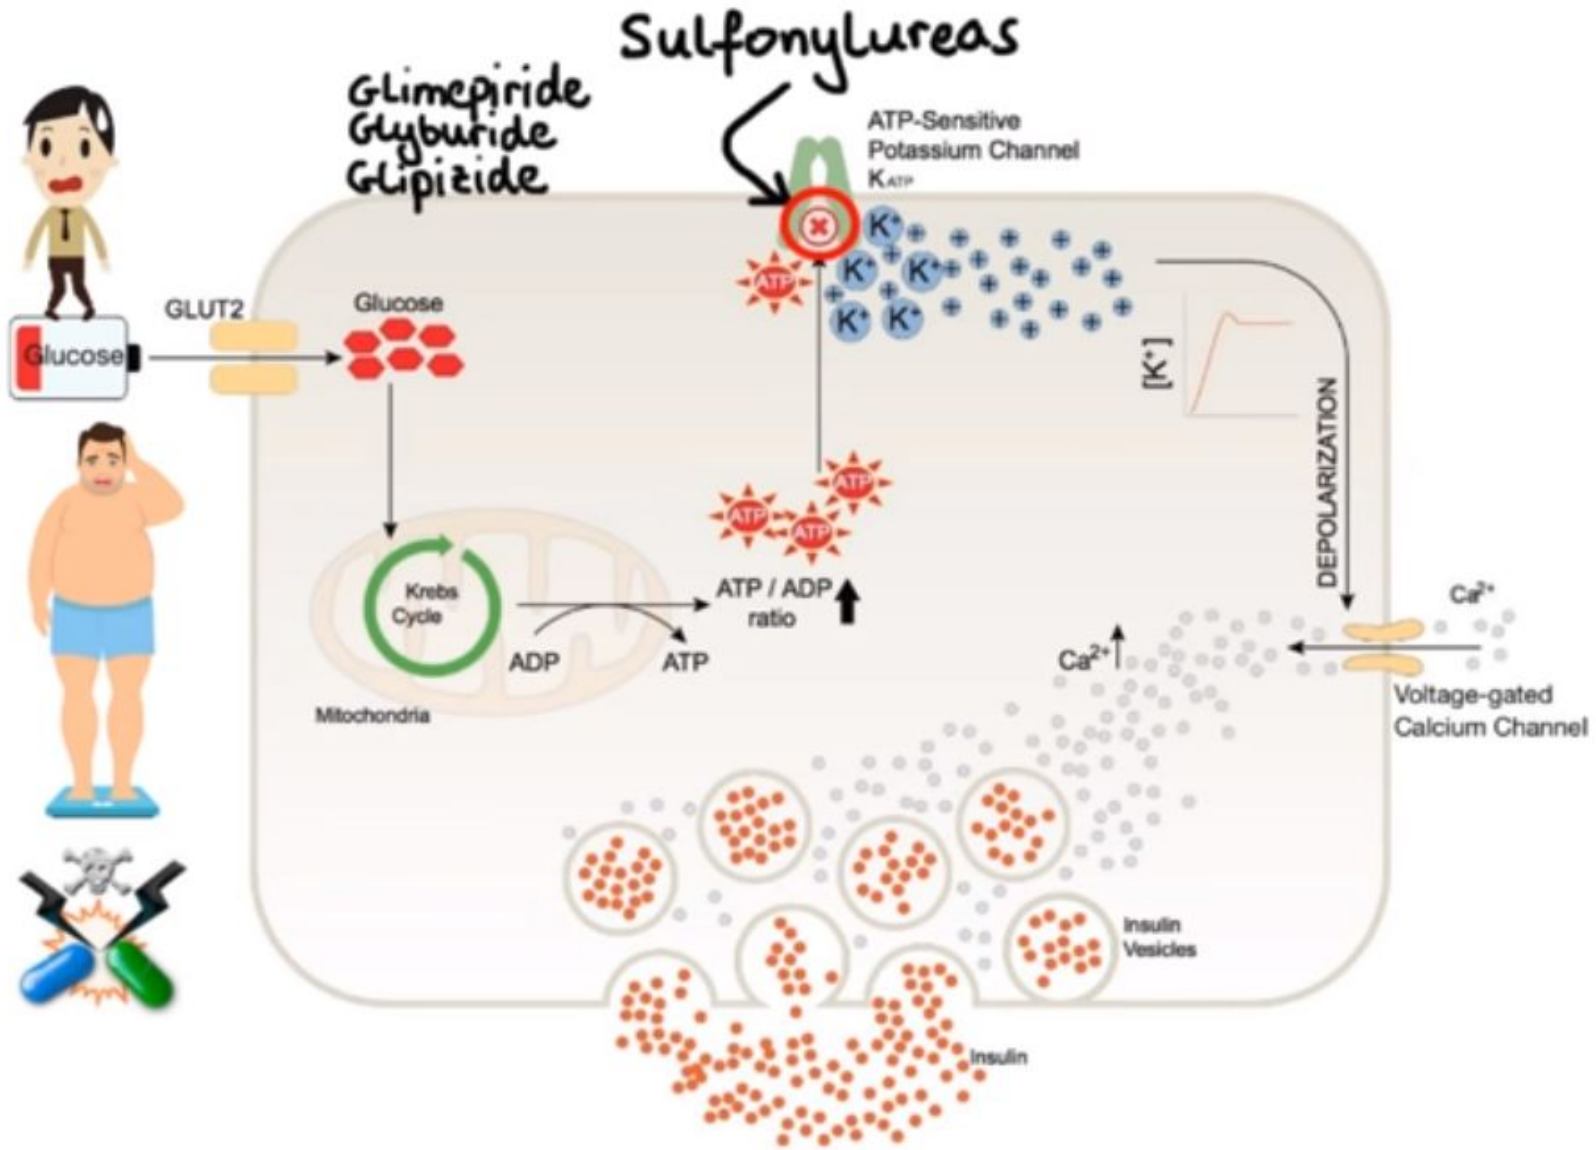

DPP-4 Inhibitors

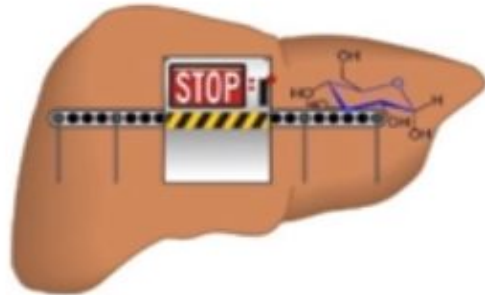

MECHANISM OF INSULIN SECRETION

Biguanides

↓ glucose production

↓ glucose absorption

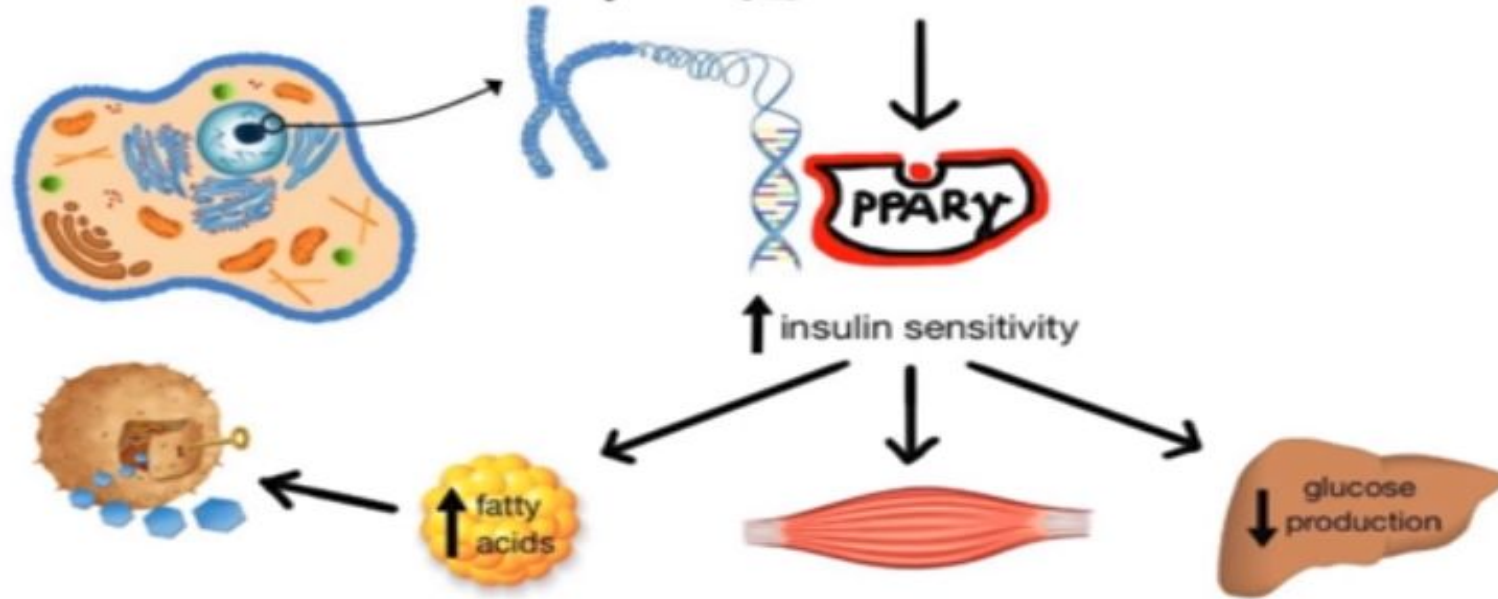

↑ glucose uptake

Metformin

Thiazolidinediones

Pioglitazone & Rosiglitazone

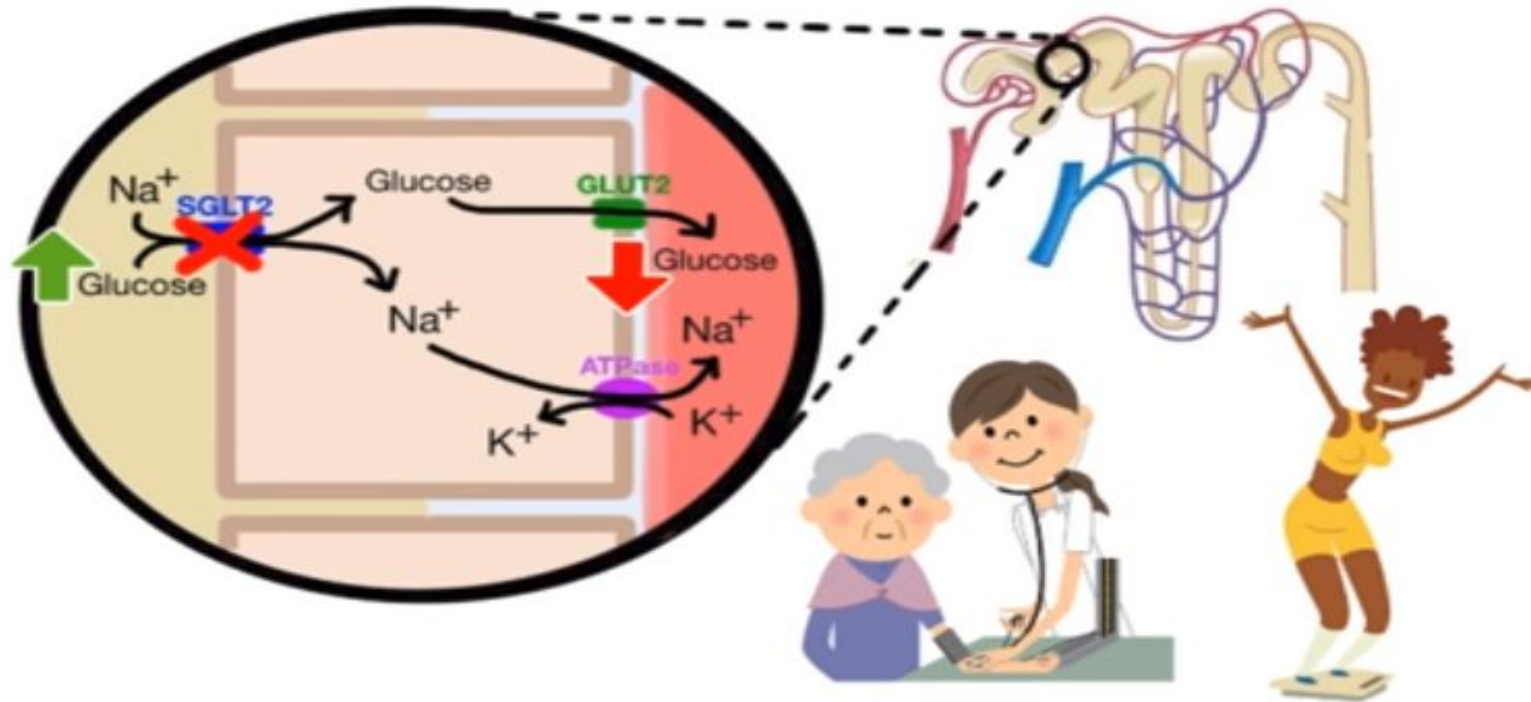

PPAR- α

↑ HDL

↑ LDL

Sodium-glucose cotransporter 2 inhibitors

Canagliflozin & Dapagliflozin

α -Glucosidase Inhibitors
