# How Doctor Arch Evil Doer wanted to make people stupid

Pyotr Ivanov

group 10b

Teacher: Irina Petrovna Alekseeva

Year 2054. Global catastrophe on the planet Earth! Students stopped going to school and doing homework. Because they computer games online! All the parents were in a panic, and only one person was happy … Dr.Evil-Doer, who created a terrible virus that replaced all the useful programs on the gadgets of the Earth to computer games!

Android, Microsoft Windows and iOS of Apple Inc. gathered for a conference started to think how to kill a virus.
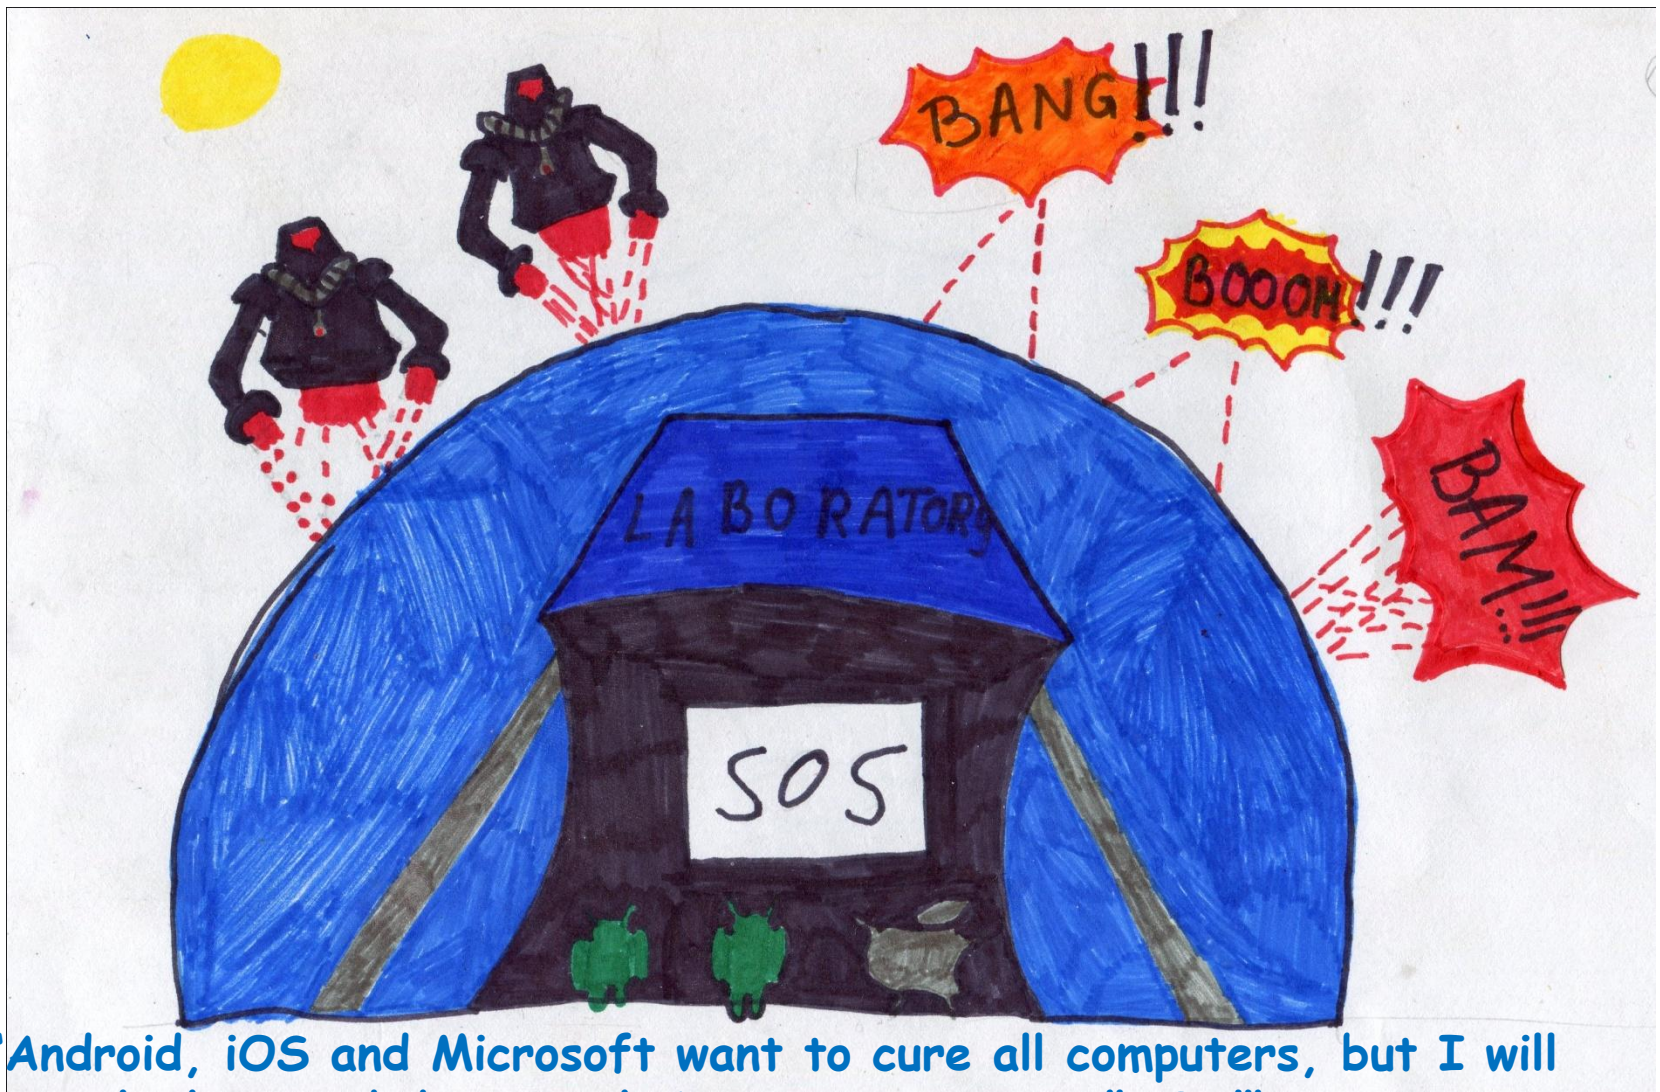

'Let's make an antivirus computer that will secretly check other computers and kill the virus!' said Microsoft.

'Good idea!' said iOS.

And they began to project a new antivirus megapowerful computer which was called "SOS".

They worked day and night. And finally the computer was ready. It started to cure the computers on the Earth. Dr.Arch Evil-Doer tried to stop it, but nothing helped! He was so angry and decided to bomb "SOS"!

'Android, iOS and Microsoft want to cure all computers, but I will attack them and destroy their super computer "SOS"!
HA-HA-HA-HAAA!' cried Dr.Evil-Doer.
He made an army of normobots and flew to the laboratory. But the roof was very strong and Dr.Evil-Doer couldn't bomb it.
