About English

I've always been interested in English. It is very interesting to learn and it will definitely help you in the future, especially if you want to travel or move to another country.

It is very useful and at the same time interesting to watch movies and shows in English. So you will improve your listening skills, and watching the movie will be different, you will understand those things that can not be translated.

My recommendations

First of all, take care of your physical and mental health. Try to think positively, even if it is very difficult. And just do not panic and do not rush anywhere, you will have time to do everything in time.
