

Hello!

Let`s begin our lesson!

Your task for today is reading.

Please read, **write down** unknown words and word combinations with translation.

WHAT HAPPENS IF YOU CATCH THE CORONAVIRUS?

Some people, particularly most children, hardly feel ill at all when they get the coronavirus. But they still have coronavirus germs in their body that they could give to someone else by mistake.

But
I feel fine,
Mum!

When they get the coronavirus, lots of people get coughs and a high temperature. Some people also have a headache or aches all over their body.

People are usually ill for a few days. But bodies are amazing things. When a new germ, like the coronavirus, gets into someone's body, their body knows that the germ shouldn't be there and starts killing it.

I feel really awful!

The body has an amazing weapon against viruses called antibodies. Tiny cells in your blood make antibodies to fight each different virus invader. The antibodies catch the viruses, then the blood cells swallow them up and destroy them and then the person gets better.

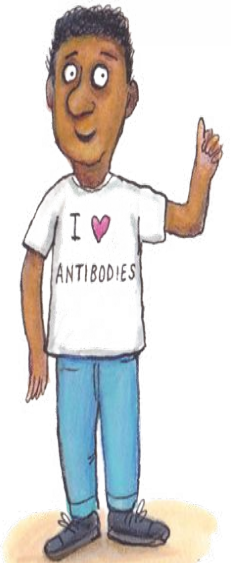

Each of us has more than 10 billion different kinds of antibody inside us.

I'm better now

Hooray
for
antibodies!

That means there are more different antibodies inside you right now than there are people in the world!

Grammar time

Вспоминаем

1. Исчисляемые/неисчисляемые
2. Употребление *some/any/no*
3. Употребление *many/much/a lot of*
