

Eco-friendly packaging.  
Down with polyethylene!!!

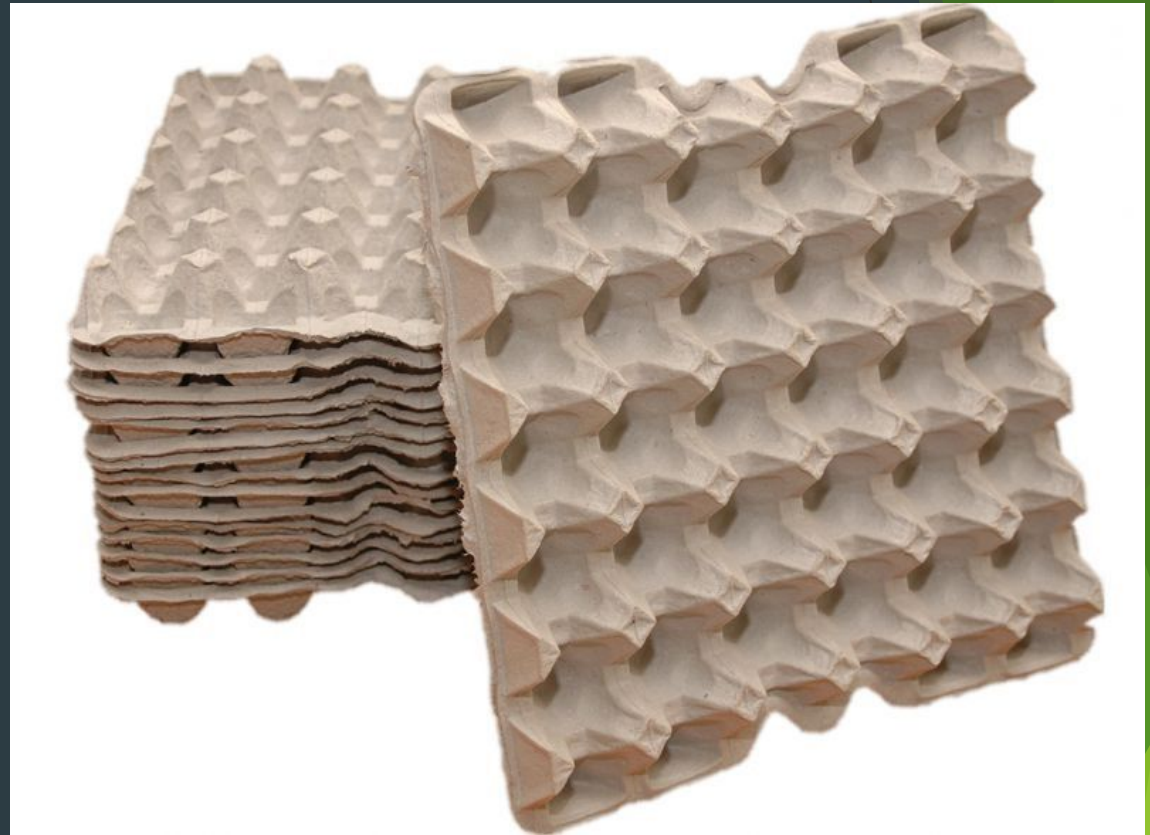

# Harmful polyethylene

In any grocery stores use a large number of plastic bags and packages. They are recycled into environmentally harmful waste that cannot be reused.

# How can I replace the plastic?

Toxic polyethylene can be replaced by cardboard packages, similar to cardboard trays for eggs.

# Characteristics of cardboard packaging

Durable, dense, can be recycled, protects products from sunlight, temperature changes, moisture. The packaging is sealed, consists of a base and a lid-closes the product, protects against mechanical damage.

# How can I use it?

Packaging of dumplings, dumplings, pies, sweets, sandwiches, etc. it can be Packed a variety of products.
