Зачем играть через дилэй

На низких лимтах люди могут подстраиваться к высоким стэбам на флопе, но против дилэя играю прямолинейно.

В рейженных потах дилэй сибэт больше зависит от диапазонов оппа (40% VPIP vs 70%+)

В лимп потах диапазоны примерно одинаковые

Зачем играть через дилэй

- Изобразить более сильную руку
- Не много ФЭ и мы не можем баррелить
- На некоторых тернах эквити оппа сильно упадет
- Опп не будет ставить проуб на широком диапазоне
- У нас много эквити но мы не хотим выставляться
- Не может ставить 3 барреля из-за СПР

Текстуры флопов

2. Board structures to do it on
 1. Double high card boards eg QJx, AQx
 2. Paired boards without a draw A99,
 3. Other dry boards K83r, 522
 4. Low connected boards 2c4c5s
 5. High connected boards AKT, AT9
 6. Shallow (+-10bb) pots with a flushdraw/
open ender

- Он капнут до Qx
- Мы изображаем даму, туз – это плохая карта. Но мы все равно может поставить его перед сложным решением.
- Против овербета он может сфолдить Qx, так что я не думаю, что это было бы плохой игрой.
- Если это думающий рег, то он должен вскрывать с чем угодно, мы не презентуем много на таком ривере. Мне нравятся 2 сайза: 100 и овербет
