Direction of solar energy.

There are two areas of solar engineering

→ Solar power plant installation engineer

→ Solar power plant production engineer

Solar power plant installation engineer

specialist who deals with

- installation of solar panels
- maintenance of solar panels

Solar power plant production engineer

specialist who deals with

production of solar modules at specialized enterprises

Advantages of solar power plants:

- quickly and easily erected, thanks to the lightweight design;
- trouble-free operation of simple elements;
- quiet operation;
- easy operation and maintenance;
- there is no emission of harmful substances, as when using other energy sources.

Thank you for listening
