

Good Safety Practice

An example from the Trittau site

Use of roller lifters

Good Safety Practice, Trittau

Use of roller lifters for lamination and waste paper

The use of a lifting mandrel is intended for use in converting during set-up operations with laminating film or the removal of waste rolls. Especially during removal, the risk of injury can be significantly reduced as the weight of the roll can no longer create a moment of surprise.

Good Safety Practice, Trittau

Use of roller lifters for lamination and waste paper

Lamination or waste paper can be transported on the mandrel and deposited at the planned storage location without any effort.
