

The background of the slide is a dense field of microscopic images of COVID-19 virus particles. These particles are spherical with a textured surface and numerous spike-like protrusions extending from them. The background has a color gradient from purple on the left to teal on the right.

The vulnerability of animals to catching COVID – 19

Выполнила студентка г. 26Б181(1) Сидорова Юлия

Map of the spread of the coronavirus.

Greater horseshoe bats

The main points of my speech are follows:

1. Which animals are vulnerable to catching Covid – 19?
2. How does coronavirus manifest in infected animals?
3. What role does the vulnerability of some animals to catching Covid – 19 for humanity?

ferret

cat

baboon

bat

camel

dog

pig

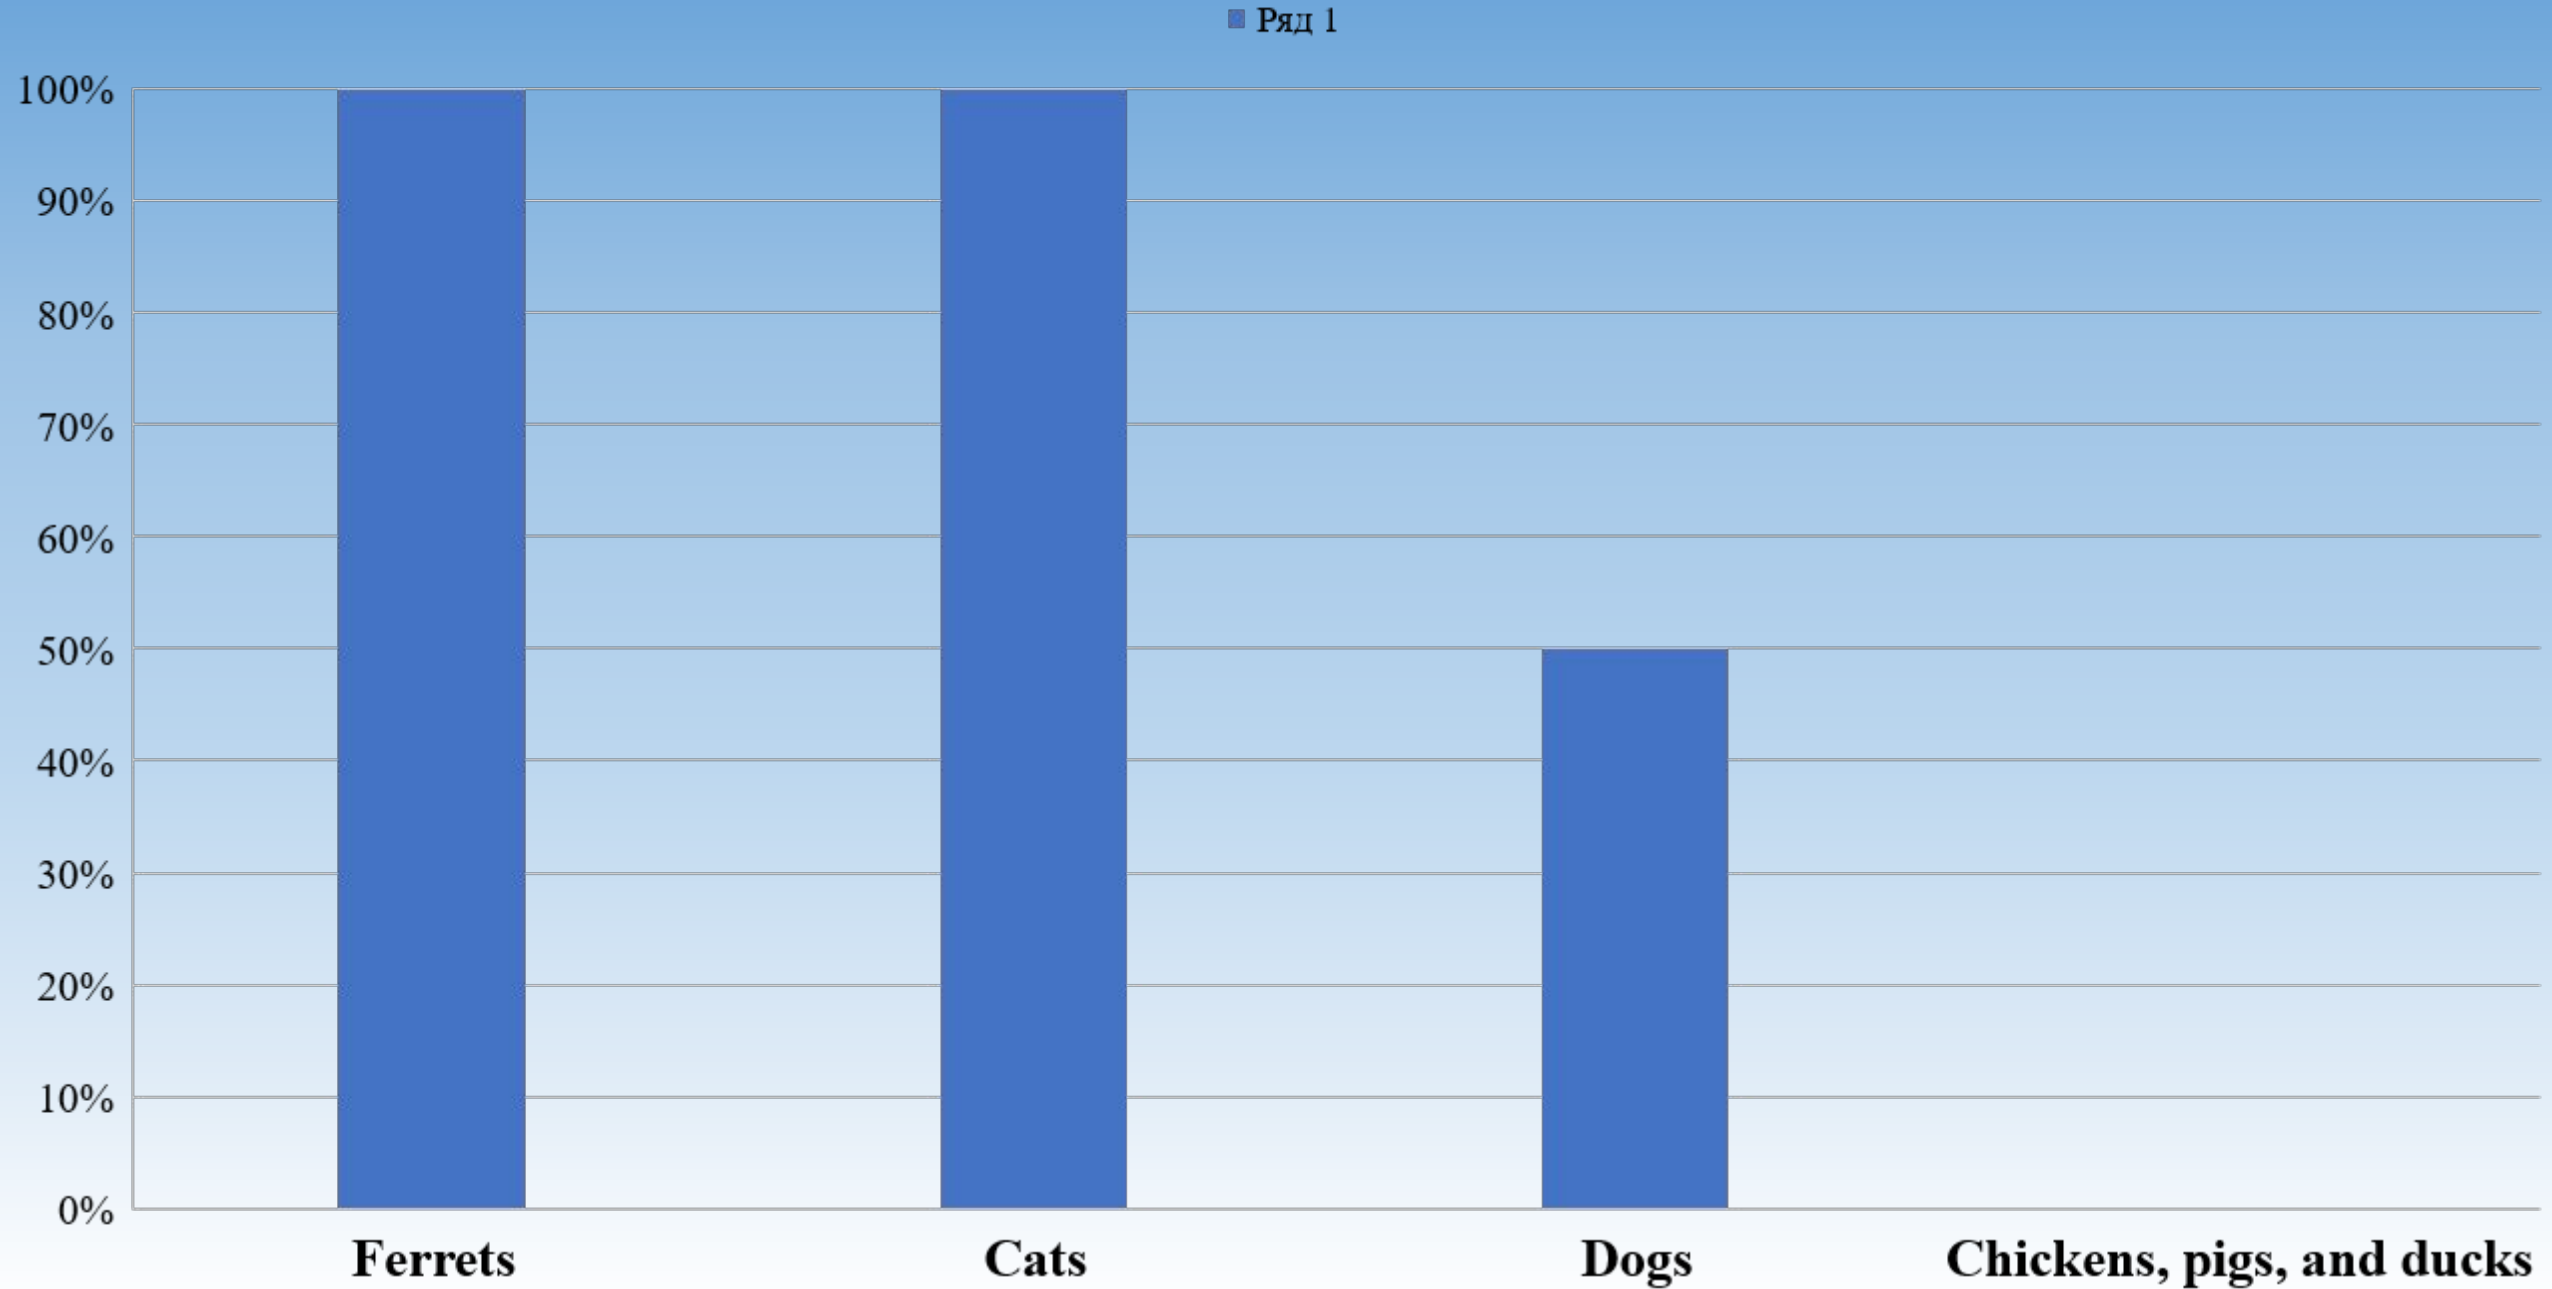

chicken

duck

The degree of vulnerability of animals to catch COVID-19

Thank you for your attention!
