Delphi

The Kailasa Temple was cut by hand from a granite cliff in Ellora, about 300 km northeast of Mumbai. Generations of dedicated monks lived, worked and worshipped their gods there and created the largest structure in the world carved from a single rock. Built around the 8th century, it is believed to have taken 7,000 workers 150 years to carve it and remove 200,000 tonnes of rock from it. Every surface is covered with symbols and figures, and the temple is full of beautiful sculptures. It was built to honour the Hindu god, Lord Shiva. Around the base of the temple, some 90 metres below the surface, there are hundreds of carved elephants that look as if they are carrying the temple on their backs. This unique place brings the ancient culture of India to life.

cement, and the stones fit together so perfectly, not even a knife edge can fit between them. It is an amazing feat of craftsmanship. According to legends, the mountain has magical properties and that's why the city was built there in the first place.

No one knew why the stone statues had been built or how the stone was carved and transported.
