# Exercise 1

A. Underline in a different color what each character does or says

*The Moon is Earth's only natural satellite*

—Venus has a beautiful name and is the second planet from the Sun. It's terribly hot, even hotter than Mercury, and its atmosphere is extremely poisonous. It's the second-brightest natural object in the night sky after the Moon

—Mercury is the closest planet to the Sun and the smallest one in the Solar System. This planet's name has nothing to do with the liquid metal, since Mercury was named after the Roman messenger god

# Exercise 2

A. Identify which forces and ideals in the history are represented by the hero and which by the anti-hero

A. Extract from the text examples that show these concepts

_____
