I agree with the poem that stress is a natural reaction and that it is a normal part of our lives.

Your own reaction to a mess.
Stress from pains to pleasures range,

I agree that change is what usually brings on stress, but I do think that it is unique that some people handle it better than others.

T facial muscles shrivel or frown.

The point is, stress is not unique,

Stress is the way our bodies cope with the environment. I guess there is also emotional stress as well as physical stress.

Stress is the natural reaction the human body has to deal with life's changes. When we are stressed, our muscles tense, our breathing becomes shallow and adrenaline is released into our bloodstream. This helps us focus and gives us the strength to survive in difficult situations. Stress is sometimes good because it keeps us alert, but it is bad for the heart and our general well-being if we have a lot. Thankfully, we can quite often avoid stress and we can also learn how to cope with it. When I feel stressed, for example, when I have too much work to do, am sitting exams or am organising an important event, I try to do a lot of aerobic exercise or listen to some calm music. That usually helps. etc

Coping with school stress

What with heavy workloads and pressure to get good grades, many teens today **overwhelmed**. Some try to **grin and bear it**, but stress affects their health all the same. Learning how to manage stress and maintain a **positive** attitude is crucial. But what are the ways teens can beat those feelings of stress? Well, to begin with, teens can learn time-management skills. Time-management is **essential** to avoid minute exam cramming and assignment panic is to be avoided. Secondly, busy teens should think of ways to

lighten the load

. For example, those with part-time jobs or a lot of extracurricular activities should seriously consider dropping some of them around exam time.

Thirdly, teens should pay attention to their health.

Nutritious meals and adequate sleep are stress-busters! Exercise too should not be forgotten. Working-out is a great way to deal with tense muscles and **relieve** stress. Finally, teens should realise that there is never a need for things to get

out of hand. Parents, teachers, guidance counsellors and friends are all there to help and provide support. Often, simply a talk with a loved one is all it takes to relieve stress and **keep things in perspective**!

Underline the correct word.

- 1 When asked whether she wanted to go to the cinema or the park, Mary shook/shrugged her shoulders indifferently.
- 2 The little boy was so mad that he tapped/stamped his feet angrily.
- 3 Sarah clenched/trembled with fear as the wild dog growled at her.
- 4 He blushed/shook in embarrassment while walking out on stage to give his speech.
- 5 Frank trembled/tapped his fingers nervously on the desk while the teacher returned the test papers.
- 6 The man clenched/folded his fists angrily as the manager told him he was no longer needed.
- 7 When Dan's mother told him the bad news he shrugged/shook his head in disbelief.
- 8 Jenny folded/tapped her arms while waiting impatiently in the queue with her son.
