

# MY FUTURE PROFESSION

Выполнено: Сидорова Дарья БТБ13

Ростов-на-Дону 2017

I STUDY AT THE  
FACULTY OF LIFE  
SAFELY AND  
ENVIRONMENTAL  
ENGINEERING. IN THE  
FUTURE, MY  
PROFESSION WILL BE  
CONNECTED WITH THE  
ENVIRONMENT AND  
ECOLOGY

# PROFESSION ECOLOGIST IS...

EDUCATION: THE  
ECOLOGY PROFESSION IS CONSIDERED FASHIONABLE,  
PRESTIGIOUS AND PROMISING IN THE WEST. IN RUSSIA,  
SPECIALISTS HAVE THEIR OWN CHARACTERISTICS OF  
BUILDING A CAREER

## Place of work:

- environmental protection organizations
- municipal structures, in large enterprises, where there is a staff unit ecologist

# Pros of the profession:

- frequent business trips around the country
- this work can not be called debilitating
- can prevent pollution of the environment

# The minuses of the profession:

- work in extreme conditions
- is dangerous to health
- low salaries of environmentalists

## Areas of application of professional knowledge:

research institutes; Ecological academy; Green Peace (Russian branch of an international organization); Environmental organizations and services; Operational city environmental inspection; Environmental protection fund; Reserves; Ecological militia; Industrial enterprises.

Representatives of the profession of Ecology are really rare in our time. Not everyone will decide to become an Ecologist. Specialists in this area have a high demand among employers, therefore the profession of the Ecologist has the right to be called a rare profession.

How users rated this criterion:

0%- very common

0%- fairly common

100%- rare profession

TO MY MIND THE PROFESSION OF AN ECOLOGIST  
WILL BECOME ONE OF THE MOST IMPORTANT AND  
DEMANDED PROFESSIONS IN FUTURE

Thank you for attention
