

We Help Podiatrists Attract More New Patients From the Web

[Schedule Call](#)

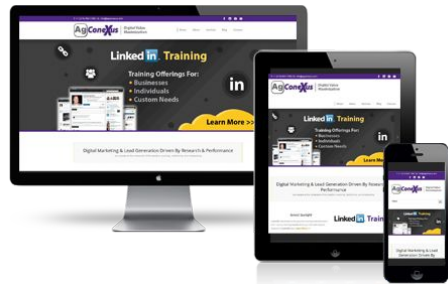

Content Marketing

Fresh, valuable, and consistent Podiatry Content is our business.

Content keeps your practice on the first page of Google, links patients researching their problems to your website, and boosts your reputation as a trusted and knowledgeable doctor.

With Podiatry Content Connection, you'll get Double Content—a Blog and a Companion Article each week!

Mobile-Responsive Website Design

If you haven't refreshed your website in the past two years, your site is outdated. If your site is not mobile-friendly, specifically arranged to be navigated on a smartphone, you are losing patients. Make a great first impression with an updated website that is good-looking, friendly, easy to use, and shares valuable content.

How's it work?

When you become a Podiatry Content Connection Client:

1. We'll get to know your practice with an On-Boarding Call.

2. We get to work for you!

- ✓ Website design (evaluate, renovate or create)
- ✓ Content Creation team begins to generate your weekly blogs and companion articles
- ✓ 70+ local directories and major business listings claimed and updated
- ✓ Facebook and Twitter set up to receive weekly content
- ✓ Special Services: Google Ads, Facebook Advertising, & Reputation Management
