

The review of the sci-fi series "Dark"

EVERYTHING IS CONNECTED

DARK

NETFLIX

"Dark" is one of my favourite TV series. It was started in 1 December 2017 and finished in 27 June 2020. It was released on netflix and has 3 seasons. Series co-created by Baran bo Odar and Jantje Friese. Every character in there is very important, but in the foreground Jonas.

This is amazing story about time travelling where everything is connected. The location is small town with nuclear power station called "Winden". The story revolves around several families and mystical things that started in the town. Everything starts with the disappearance of one of the children, although more interesting details about how it all began will be revealed later. In the series, we will learn a lot of secrets, look at the interaction of characters and find out how people are connected in this place. The story raises the question of whether a person can decide his own fate or whether it is destined for him.
