Can You Spot Which Person Carries HIV?

The Answer is NO! The AIDS-Virus can hide in a person's blood for many years. People who carry HIV may look and feel healthy, but they can still pass HIV to others!

Adapted from the Uganda School Health Kit on AIDS Control (Item 5) Ministry of Education, Ministry of Health (AIDS Control Programme), UNICEF Kampala

What Does A Person with AIDS Look Like?

AIDS can look like many other diseases. Don't be confused. Don't spread rumours. See a qualified medical person for tests if you think you or someone you know may have AIDS.

EDUCATION ABOUT AIDS

**EVERY BODY'S
BUSINESS**

The priority remains the need to increase youth sexual health knowledge, programs and the effectiveness of youth care. The youth education program focuses on groups that are most at risk for HIV infection. The focus should be on the empowerment of youth and the development of their self-esteem and self-reliance.

AIDS COUNSELLING TRUST (ACT) 23 Josiah Tongogara Avenue P.O. Box 7225 Harare Zimbabwe Telephone 792340/735780

I AM THE CONDOM!

Your guard against

AIDS

I guard you from the HIV.

What is AIDS? What is HIV?

AIDS stands for Acquired Immune Deficiency Syndrome.

AIDS is caused by HIV (Human Immunodeficiency Virus). HIV lives in the body fluids of an infected person, such as SEMEN, VAGINAL SECRETIONS, BLOOD AND BLOOD PRODUCTS made from infected blood.

AIDS also spreads through SEX

HIV is present in the semen or vaginal fluids of an infected person. During sex, the virus is passed on through the exchange of these fluids.

You can get infected the very first time you have sex with an infected person — man or woman. People who carry sexually transmitted diseases also have a HIGH RISK of getting infected with HIV through sex.

I stop the exchange of semen and vaginal fluids, and with it I block the passage of HIV into your body. Using me properly EVERY TIME you have sex reduces risk of HIV infection.

In this way, I also guard against STDs and pregnancy.

Practice safe sex!

Sometimes I may break, or the HIV may pass through me. The best prevention is to practice safe sex — stick to one, uninfected partner.

Buy me TODAY!

You can buy me at any private chemist/ pharmacy, the pan-wallah or you can get me FREE at the Government Hospital or clinic. Don't forget to CHECK EXPIRY DATE before purchase, and to READ DIRECTIONS for my use.

REDUCE risk, USE me!

**A man who
shoots up can be
very giving.**

**He can give
you and your
baby AIDS.**

Most babies with AIDS are born to mothers who shot drugs or who sleep with men who have.

Babies with AIDS are born to die.

If you're thinking of having a baby you and your partner need to get tested for AIDS. Only

get pregnant when you're sure both of you aren't infected. Until then help protect yourself and your partner by using condoms.

And if your man shoots drugs, help him get into treatment now. It could save three lives, his, yours and your baby's.

STOP SHOOTING UP AIDS.
GET INTO DRUG TREATMENT.
CALL 1-800 662 HELP

A Public Service of the National Institute on Drug Abuse, Department of Health and Human Services

**True
Love.**

If you care for each other, protect each other. Use a latex condom every time.

It's not 100% protection against AIDS—only doing without sex and IV drugs entirely does that—but it cuts your risk considerably. For more information, call the AIDS hotline in Northern California at 1-800-367-2437, or in Southern California at 1-800-922-2437.

AIDS.
It's Up To You.
