School clubs	%
Computer club	30%
Photography	25%
Sports club	21 %
Dancing	19%
Painting	5%

project.

### Use the following plan

1. Make an opening statement on the subject of the project
2. Select and report 2-3 facts
3. Give 1-2 comparisons where relevant
4. Outline a problem that can arise **with being a club member and suggest a way to solve it.**
5. Write a conclusion giving your opinion **on the importance of school clubs for teenagers.**

*School clubs play an important role in our life. They help children decide about their future profession and career paths. My project is about school clubs and I have found some data to discuss in the framework of this project.*

*There are two main facts in the table. Firstly, the most popular clubs are Computer clubs and Photography. Secondly, the number of teenagers who prefer Sports clubs and Dancing is slightly lower. Another fact is that painting is the least popular club because not everyone loves painting and colours and good brushes also are expensive.*

*We can see an interesting feature when we analyze the table. It's easy to notice that my peers highly rate professions like computer administrators and photographers. (30% and 25% respectively). Other clubs are rated lower.*

*The table reveals that in future we can have problems with professional painters. Because only 5% prefer that direction. The solution of of this problem can be introducing more painting clubs.*

*In conclusion, despite some problems with career choice, I consider clubs to be important for students and teenagers. It helps them to choose their profession. (186)*

*School clubs play an important role in our life (1). They help children decide about their future profession and career paths(2). My project is about school clubs and I have found some data to discuss in the framework of this project(3).*
