Установка IFS

1) Установить ОС Windows 7(если требуется переустановка)
2) Отключить Windows Firewall
3) Понизить уровень безопасности сетевого подключения
4) Понизить уровень безопасности пользователя
5) После выполнения этих пунктов, становить IFS
6) После установки IFS проверить Equipment Assingement – не должно быть ошибки « Error creating server»
7) Если все в порядке, ошибок нет – копируем из папки Modify девять файлов путем замены в папку C:\Program Files (x86)\Halliburton\HES_Insite\Bin
8) Далее , из архива Modify , папка Server копируем файл Job selection в ту же папку C:\Program Files (x86)\Halliburton\HES_Insite\Bin если это сервер или из папки Workstation если это ACE 2.

User Account Control Settings
Choose when to be notified about changes to your computer
User Account Control helps prevent potentially harmful programs from making changes to your computer.
Tell me more about User Account Control settings
Always notify
Never notify
Never notify me when:
Programs try to install software or make changes to my computer
I make changes to Windows settings
Not recommended. Choose this only if you need to use programs that are not certified for Windows 7 because they do not support User Account Control.
