

# Установка IFS

- 1) Установить ОС Windows 7( если требуется переустановка)
- 2) Отключить Windows Firewall
- 3) Понизить уровень безопасности сетевого подключения
- 4) Понизить уровень безопасности пользователя
- 5) После выполнения этих пунктов, становить IFS
- 6) После установки IFS проверить Equipment Assingement – не должно быть ошибки « Error creating server»
- 7) Если все в порядке, ошибок нет – копируем из папки Modify девять файлов путем замены в папку C:\Program Files (x86)\Halliburton\HES\_Insite\Bin
- 8) Далее , из архива Modify , папка Server копируем файл Job selection в ту же папку C:\Program Files (x86)\Halliburton\HES\_Insite\Bin если это сервер или из папки Workstation если это ACE 2.

## Customize settings for each type of network

You can modify the firewall settings for each type of network location that you use.

[What are network locations?](#)

### Home or work (private) network location settings

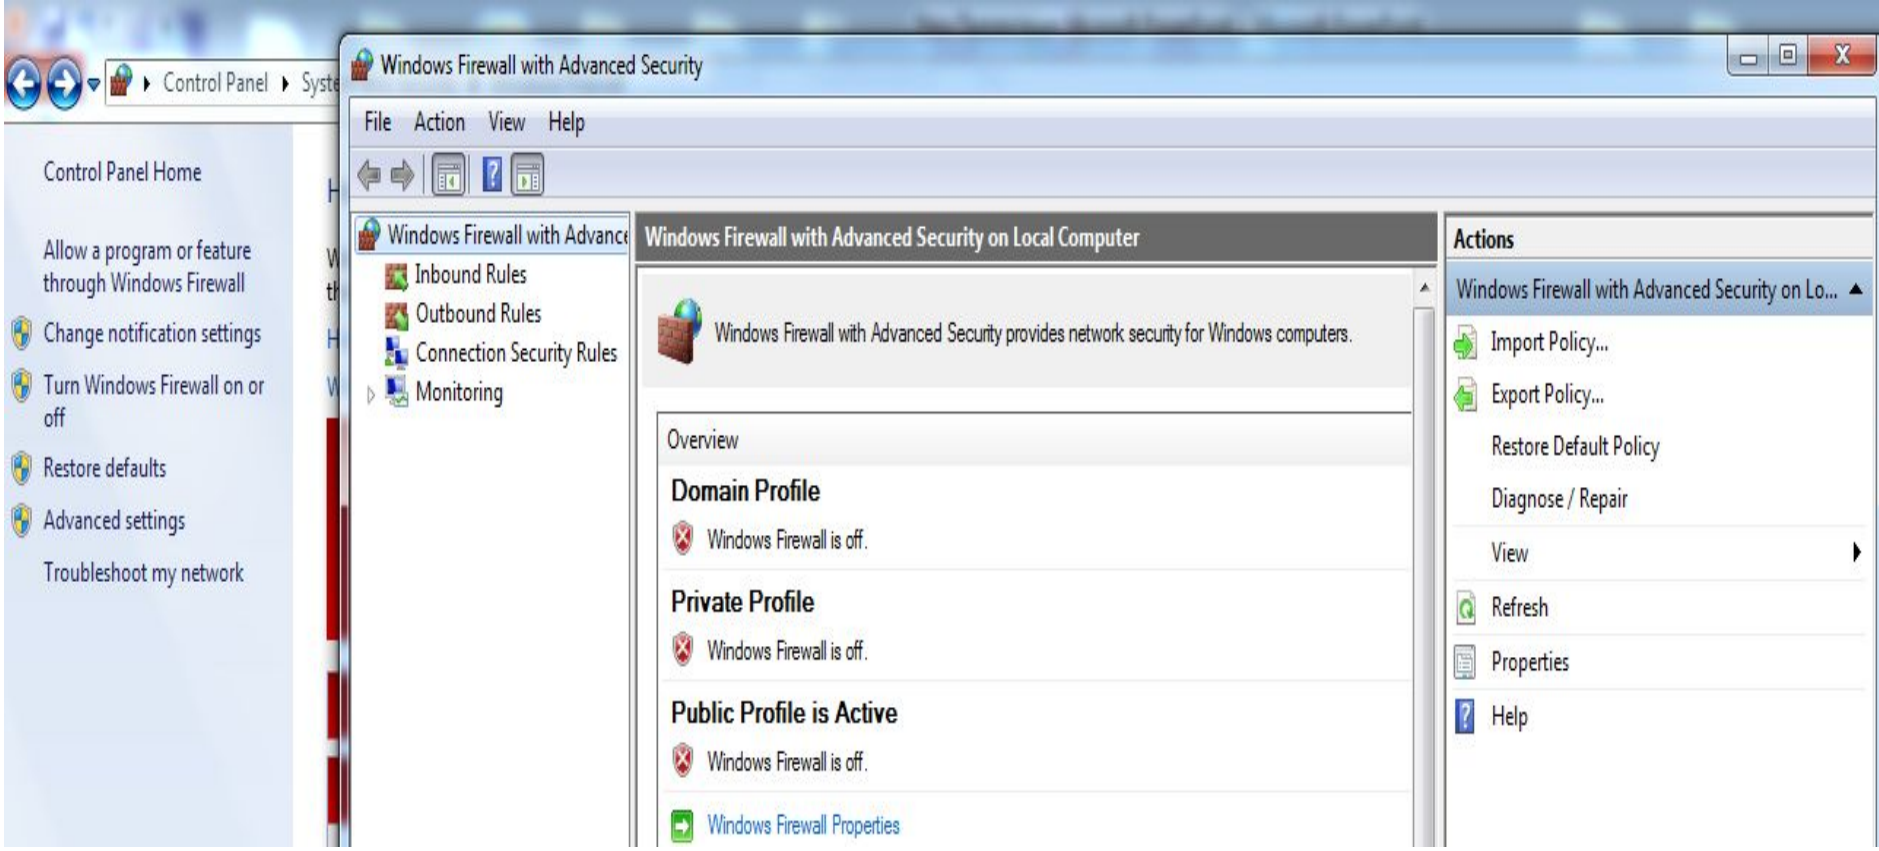

-   Turn on Windows Firewall
- Block all incoming connections, including those in the list of allowed programs
  - Notify me when Windows Firewall blocks a new program

-   Turn off Windows Firewall (not recommended)

### Public network location settings

-   Turn on Windows Firewall
- Block all incoming connections, including those in the list of allowed programs
  - Notify me when Windows Firewall blocks a new program

-   Turn off Windows Firewall (not recommended)

### Windows Firewall with Advanced Security on Local Computer

Windows Firewall with Advanced Security provides network security for Windows computers.

#### Overview

##### Domain Profile

Windows Firewall with Advanced Security

##### Private Profile

Windows Firewall with Advanced Security

##### Public Profile

Windows Firewall with Advanced Security

Windows Firewall with Advanced Security

#### Getting Started

##### Authenticate connections

Create connection security rules to protect connections that are protected by using IPsec.

Connection Security Rules

##### View and create rules

Create firewall rules to allow or block traffic. You can create rules that are authenticated, or blocked unless they are authenticated.

### User Account Control Settings

#### Choose when to be notified about changes to your computer

User Account Control helps prevent potentially harmful programs from making changes to your computer.

[Tell me more about User Account Control settings](#)

Always notify

Never notify

#### Never notify me when:

- Programs try to install software or make changes to my computer
- I make changes to Windows settings

 Not recommended. Choose this only if you need to use programs that are not certified for Windows 7 because they do not support User Account Control.
