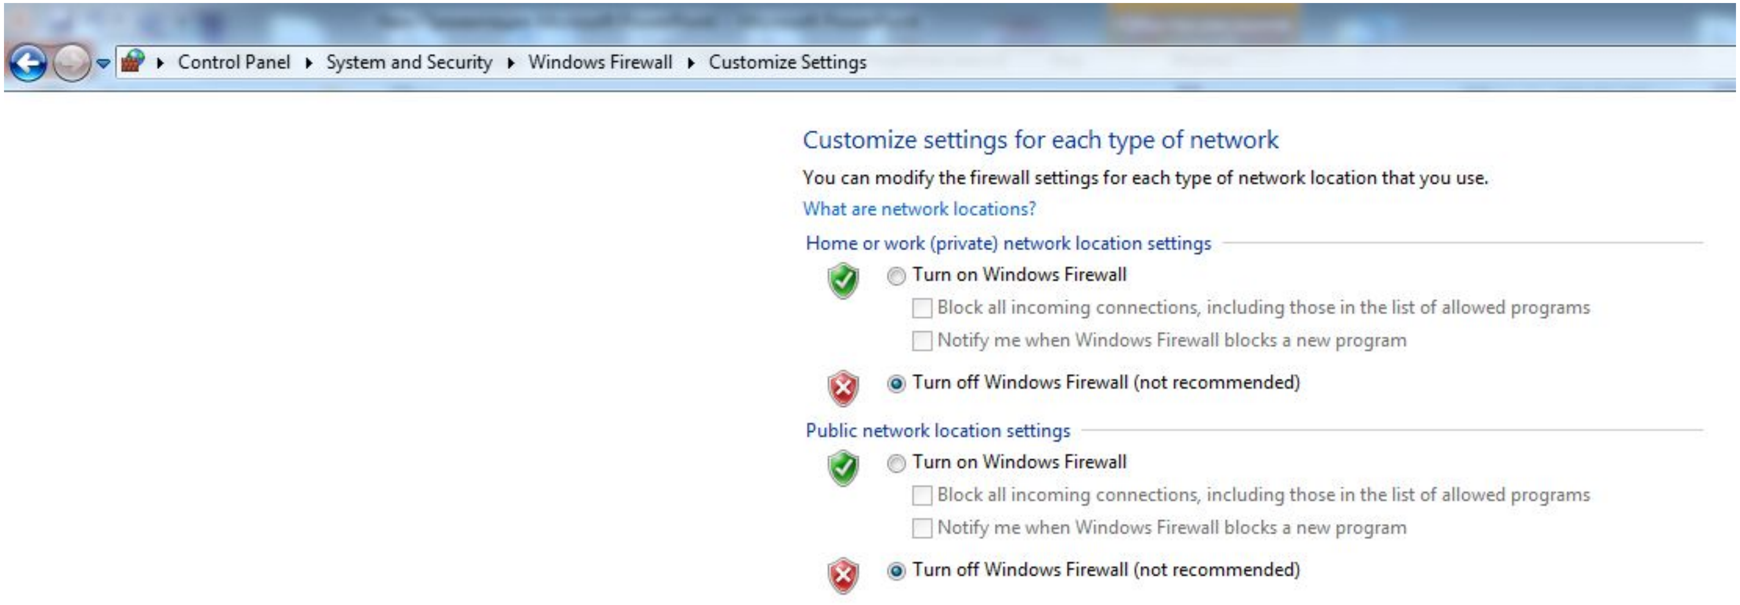
# Установка IFS

1) Установить ОС Windows 7( если требуется переустановка)
2) Отключить Windows Firewall
3) Понизить уровень безопасности сетевого подключения
4) Понизить уровень безопасности пользователя
5) После выполнения этих пунктов, становить IFS
6) После установки IFS проверить Equipment Assingement – не должно быть ошибки « Error creating server»
7) Если все в порядке, ошибок нет – копируем из папки Modify девять файлов путем замены в папку C:\Program Files (x86)\Halliburton\HES_Insite\Bin
8) Далее , из архива Modify , папка Server копируем файл Job selection в ту же папку C:\Program Files (x86)\Halliburton\HES_Insite\Bin если это сервер или из папки Workstation если это ACE 2.



Control Panel ▸ System and Security ▸ Windows Firewall ▸ Customize Settings

Customize settings for each type of network

You can modify the firewall settings for each type of network location that you use.

What are network locations?

Home or work (private) network location settings

○ Turn on Windows Firewall

☐ Block all incoming connections, including those in the list of allowed programs

☐ Notify me when Windows Firewall blocks a new program

● Turn off Windows Firewall (not recommended)

Public network location settings

○ Turn on Windows Firewall

☐ Block all incoming connections, including those in the list of allowed programs

☐ Notify me when Windows Firewall blocks a new program

● Turn off Windows Firewall (not recommended)

User Account Control Settings

Choose when to be notified about changes to your computer

User Account Control helps prevent potentially harmful programs from making changes to your computer.
Tell me more about User Account Control settings

Always notify
Never notify

**Never notify me when:**

- Programs try to install software or make changes to my computer
- I make changes to Windows settings

Not recommended. Choose this only if you need to use programs that are not certified for Windows 7 because they do not support User Account Control.
