Company overview

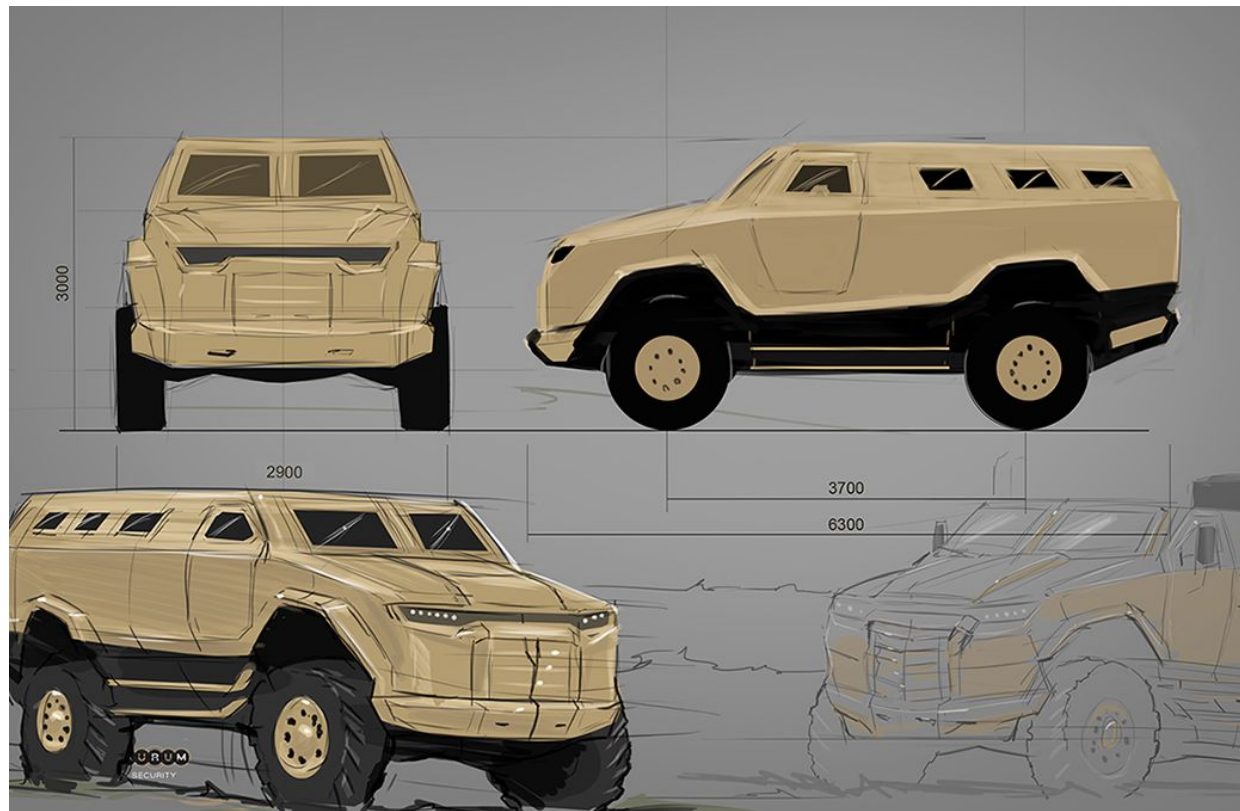

SECURITY

Ultimate Protection

Aurum Security

- **Aurum Security GmbH** was founded in 2011 with a goal to design advanced protection systems
- Conducted a number of research and development projects, including certification of complete vehicles
- We were the 1st company in the world to have certified a civilian vehicle to the protection level VR10
- The only other company which achieved the level VR 10 is Daimler AG, they certified their Mercedes Benz S Maybach

Our competitive advantages: - in-house team of professional designers and engineers with extensive experience in developing protection systems and solutions

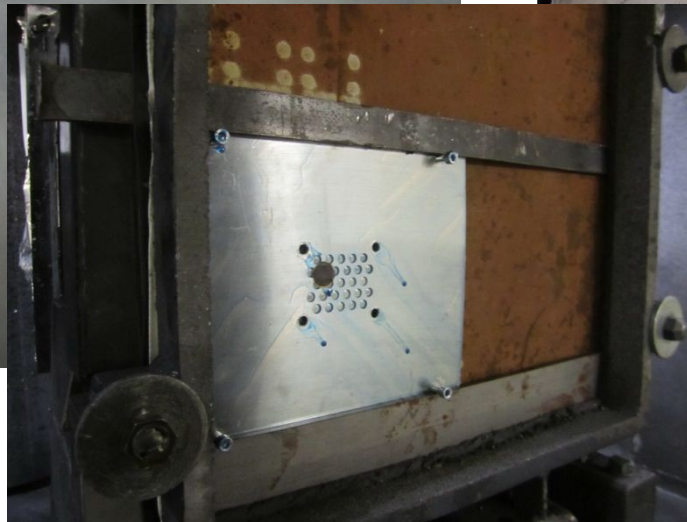

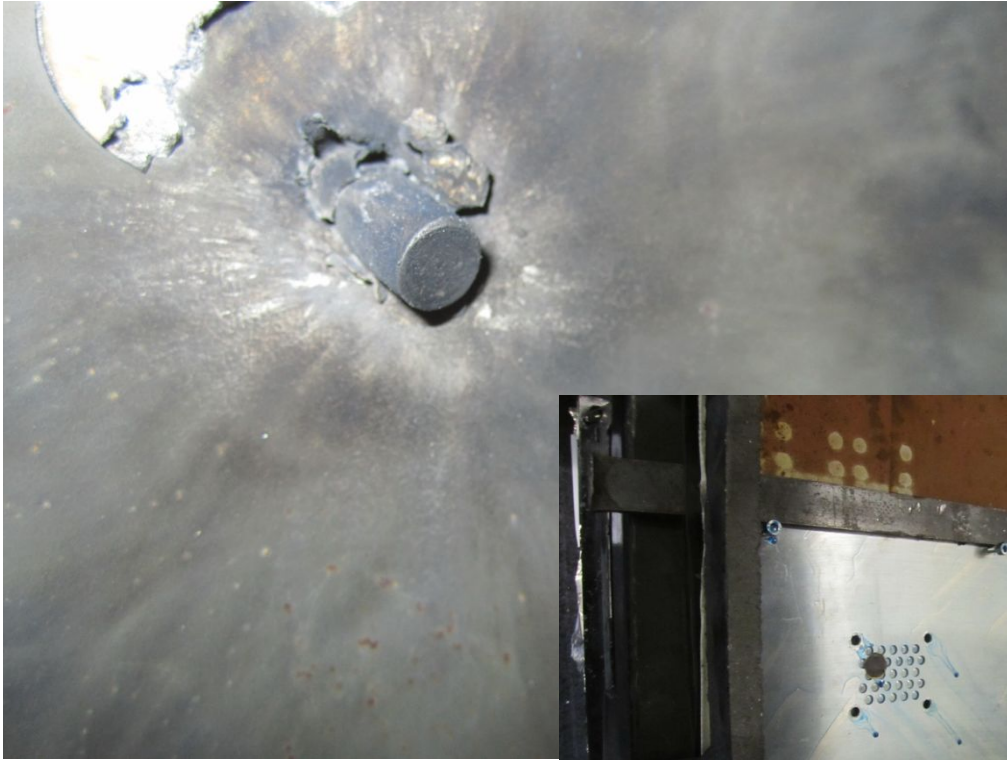

- extensive experience with different materials

- conducted hundreds of tests over the last years

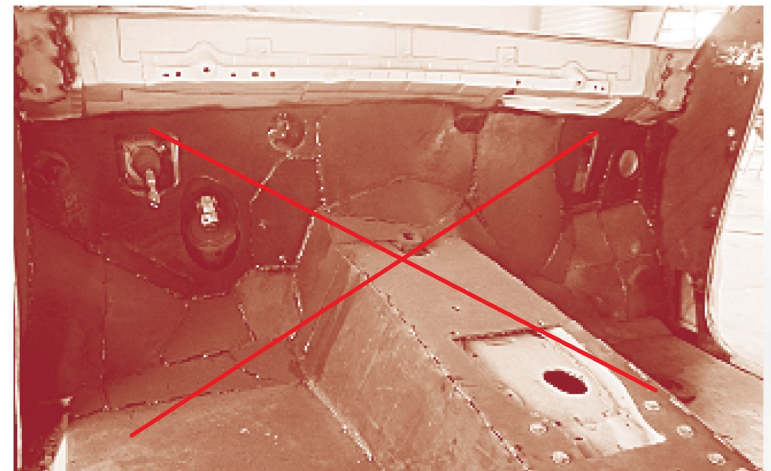

***- solid experience developing protection
for various levels of threats***

- *access to the latest technologies*

- e.g. hot-forming of armor steel

- completed vehicle certifications - military

- completed vehicle certifications - civilian

In-House production of armored civilian & military vehicles allows strict quality control

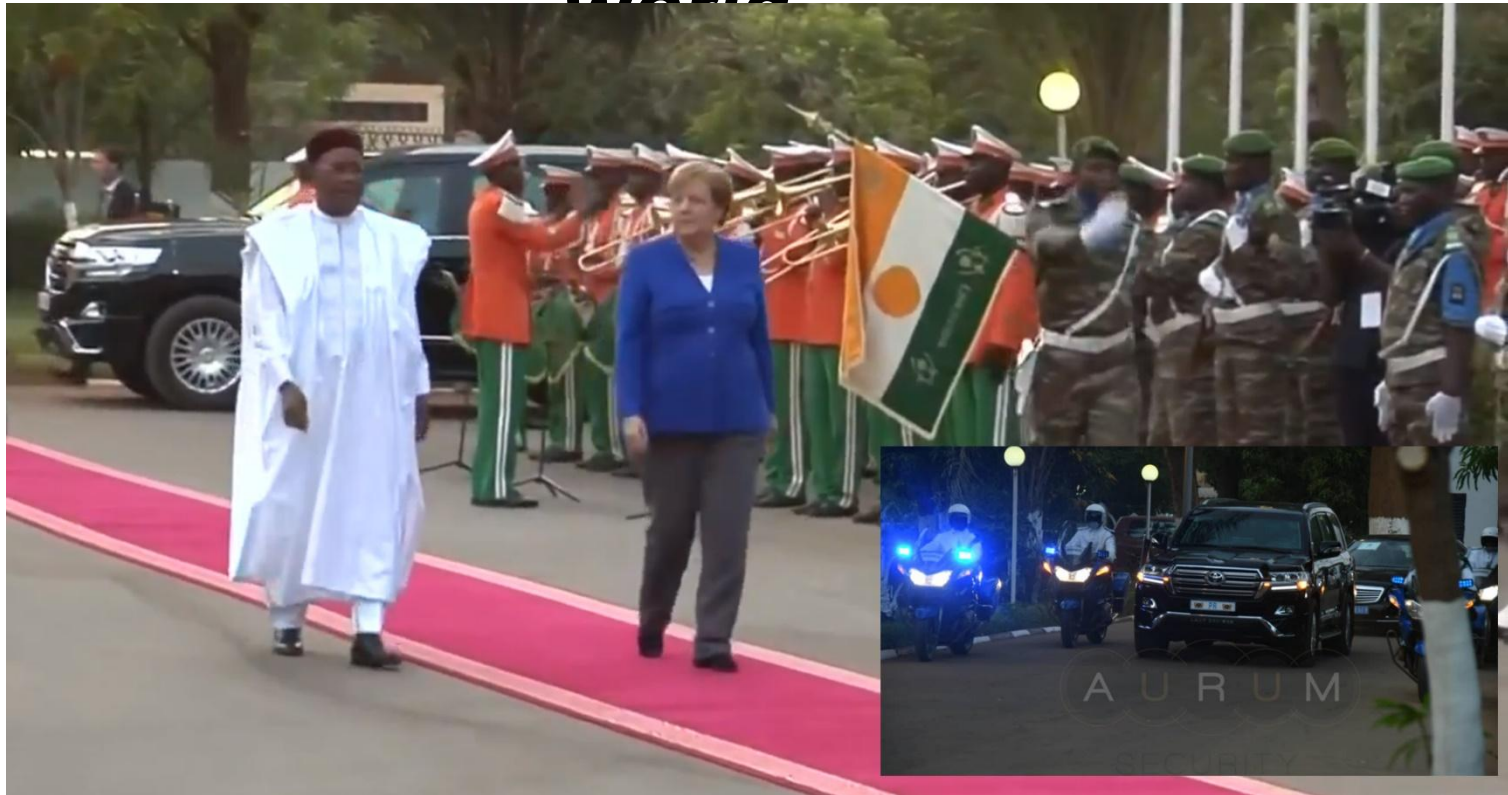

Ballistic protection:	Blast protection:	Max payload:	Gross vehicle weight:
up to STANAG 3-	up to STANAG 2a	up to 1.550 kg	< 6000 kg

In-House production of bullet-proof glass allows shorter delivery time & flexibility in realizing customized solutions

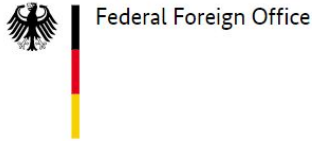

Thanks their level of protection and quality our vehicles are used by numerous governments around the world

Production facility 2950 sqm
