Uniwersytet Warszawski

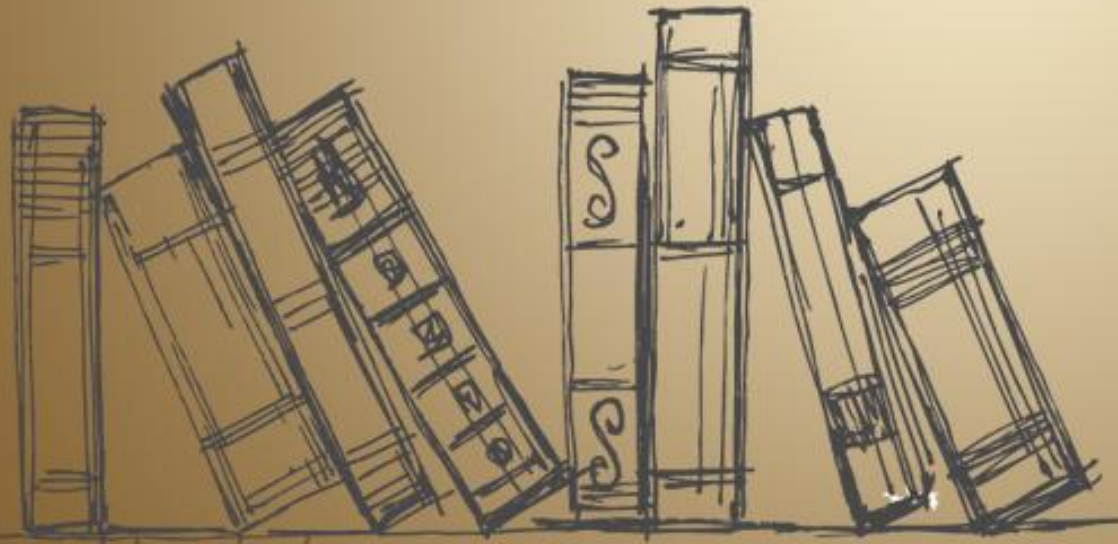

University of Warsaw was established by an edict of Alexander I, issued November 19, 1816 on. The university consisted of five faculties: Law and Administration, Medicine, Philosophy, Theology, Science and Arts. A few years later, studied here for about 800 students, professors and Lectures have been given 40-50.

The University offers more than 36 doctoral programs - also known as third degree studies - that people with a Bachelor give a chance to improve knowledge and skills, and enable collaboration with reputable Polish and foreign scholars.

Interdisciplinary programs

The candidates, in addition to traditional doctoral studies can also select custom, eg. International studies, interdisciplinary or inter.

International doctoral programs

International doctoral programs launched thanks largely to the funds obtained by the university in the "International PhD Projects", which was organized by the Foundation for Polish Science. Doctoral students funded directions receive high scholarships and grants to conduct their own research. Each of them also spend 6 months to 2 years on probation in foreign scientific institution. University obtained to conduct this kind of studies nearly 30 million zł. An important role in the development of international programs are also scientists who are winners of grants awarded, among others, by the European Council. Research (European Research Council - ERC).

The number of doctoral students at UW from year to year increases - now has more than 3 200 people.

Wide choice of doctoral programs makes the number of PhD students is increasing. Also increased the number of foreigners who study at the third cycle. In 2014 it amounted to 244, or 37 more than the year before. Most of the foreign students of the third degree from Ukraine, Belarus, Russia and Iraq. The increase in the number of doctoral students is for the University to strengthen the scientific potential of the university. Students of these studies are actively involved in research projects. Thanks to the numerous grants obtained by experienced scientists, the youngest scientists can participate in the work of research teams and receive an additional scholarship. These conditions, among others creates award of the European Council. Research (ERC).
