Welcome's the New Age Toilet Seal

Everyone knew the problem-  
But no one could solve the  
problem...

**UNTIL NOW!**

## FEATURES & BENEFITS

- Wax does not stand up to radiant heat, making it a poor choice for use with heated flooring.
- **Masterseal® is made of rubber and will not break down.**
- With present toilet seals and with a toilet over flow, the contaminated water will penetrate through the core cut of the floor drain, which will create costly repairs.
  - ✓ **Masterseal® provides a water and airtight connection between the water closet and the sanitary drainage system. Preventing costly repairs.**
- Any time the flange is lower than the finished floor, you need to stack multiple wax rings, unless the flange is installed “over” the floor.
  - ✓ **Masterseal® extended discharge neck with a spacer kit will make a positive secure connection when needed.**

## FEATURES & BENEFITS

- Each time the toilet is removed, a new wax seal is needed.
  - ✓ Masterseal<sup>®</sup> Wax Free Seal can be removed and reinstalled with the same Masterseal<sup>®</sup> wax free toilet seal.
- Wax seal removal is a sticky and messy job.
  - ✓ Masterseal<sup>®</sup> wax free is clean, quick and easy to install or remove.
  - ▶ With Masterseal there is no more slow leaks that will undoubtedly cause health hazards, like mold and mildew.
  - ▶ NO MORE REPAIRS!

## Why Choose Masterseal?...

It works like no other..It does the job and MORE.

# Installation

## Very easy to install

- ▶ Place the floor flange around the drain pipe
- ▶ Apply silicone to the Masterseal®
- ▶ Install the Masterseal® to the ground centered to the drain
- ▶ Install and tighten toilet to the floor
- ▶ Remove if any rubber surpasses the bowl

The **Masterseal** acts as a permanent & efficient seal

It covers the surface under the toilet bowl including the core cut in which the drain passes through.

From all of us at Aqualoq  
Thank-you
