What people say

"Great cuisine, delicious food justifies the high price of fresh seafood! Delicious cuisine! Amazing drinks! Everything is fresh, delicious and very beautiful"

"Great place! The interior, the musical selection (I always pay attention to this), and the kitchen is great, delicious local beer is sold here!"

" A wonderful restaurant with elements of national cuisine - fish and meat are richly presented. They cook delicious and fast, but sometimes there are not enough waiters.

The Tundra is made in the loft style. There is a lot of wooden furniture, all the light is warm and muted
