What is food?

Food is any substance consumed to provide nutritional support for the body. It is usually of plant or animal origin, and contains essential nutrients, such as carbohydrates, fats, proteins, vitamins, or minerals.

Food sources: plants

- Seeds of plants are a good source of food for animals, including humans.
- Fruits are the ripened ovaries of plants, including the seeds within.
- Vegetables are a second type of plant matter that is commonly eaten as food.

Food sources: animals

Animals are used as food either directly or indirectly by the products they produce.

Meat is an example of a direct product taken from an animal, which comes from muscle systems or from organs.

People have meals three or four times a day:

- Breakfast - we have it in the morning before school
- Lunch - we have it during the long break at school
- Dinner - we have it in the afternoon after the lessons at home
- Supper - we have it in the evening at home

For breakfast we can have:

sandwich

cheese

tomato

eggs

For lunch we can have:

orange

chocolate

apple

ice-cream

For dinner we can have:

soup

bread

meat

salad

For supper we can have:

mushrooms

bananas

potatoes

cake
