

**I'M A HOPELESS
GRADUATE OF THE 11TH
CLASS,
S_IS_YO_V A_ND R_EW**

My main task after graduation is to fulfill the challenge to live a week on 200 rubles, and observe the main rule of student life: "three meals a day (Monday, Wednesday, Friday)"

My most important achievement after 11 circles of hell is that I passed almost everything and remained alive which is strange.

Learn English...It is difficult, difficult, but interesting. You need to learn it at least to watch TV series, read books, and tell your friends to go to hell. And as much as possible to achieve something more in life.

I don't have the funniest memory from school. Because all clowns in circuses are funny and it is difficult to choose something special.

My only recommendation is that you should never be afraid of what people will think about you, exams are not the most important thing, and even more so you should not worry about the opinion of people if they are not your loved ones)

«Live long and prosper»

«This is the way»

«My brother taught me
not to pay attention to
everything that is said
before the word "but".»

«Love illuminates, but
casts long shadows.»

«People are easier to
forgive someone else's
wrong than right.»
