

Save the planet together

Presentation created by Adrian Regent
and Google Translate)

To save the planet, you need to throw garbage into garbage cans, right?

Trash looks like this

If you have not found a trash can nearby, do not throw trash directly to the ground. Look for a better trash bin.

If you throw garbage to the ground, one ecologist in the world gets angry

MEAN YOU CHOOSE DEATH

I also believe that electric cars will reduce air pollution.

Now I live in Verkhovtsevo (stinky swamp). Why do you ask the swamp? But because there is garbage at every step.

And here is my **“favorite”** fountain in the park near the station

I hope that in the future, my village will become cleaner and garbage bins will appear with a section into the categories of garbage. Stop throwing garbage on the territory of abandoned houses.

А ещё у меня кончилась фантазия и скоро конец)

Thank you all for your
attention.
