It was so beautiful view out of there.

When we achieved it and overcame it we could finally see majestic peak that called Fisht.

**The next two hours we had to Wade  
through the mud, across the boosting  
streams**

**13-30**

# **Fisht shelter**

- At the back of the picture mount Fisht

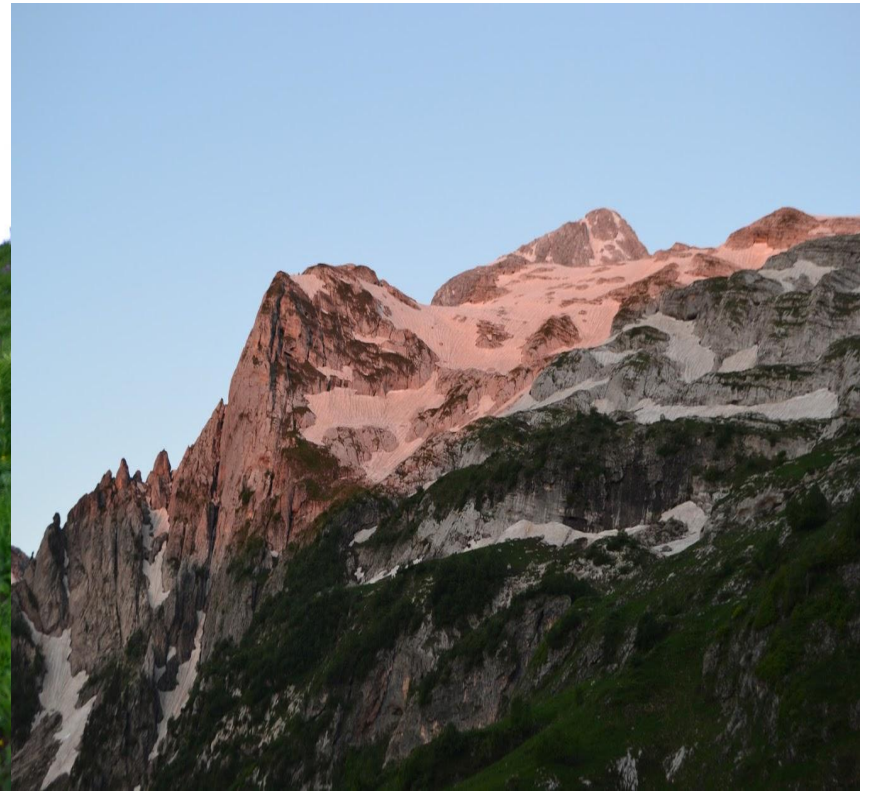

Early morning, in the dark, we started to go to the peak of Fisht mount.

**We many times crossed the little glaciers**

**The sunrise**

# First 3 hours of climb

**We many times crossed  
little glaciers**

**climbing steep cliffs.**

# Another 2 hours of climb

# Near the top we got to the big glacier

# Almost vertical climb

we used ice  
axes.

alpine meadow changed to  
the ice desert.

**You can imagine the scale if you take a closer look at this picture.**

*In the final part our way often laid through the clouds and the view was bad.*

At 9-00, after 5 hours climbing  
we reached the top!

*It height 2867,7 m or 9406 ft.*

Then we started to go down.
