Lena is the world's largest river flowing in the permafrost zone, as well as the largest river in Russia, whose basin is located entirely on the territory of the Russian Federation.

Siberia

A scenic landscape of a mountain valley. In the foreground, a calm river reflects the surrounding environment. The middle ground features a dense forest of evergreen trees along the riverbanks. In the background, majestic mountains rise, with some peaks partially obscured by mist or low clouds. The sky is filled with dramatic, grey clouds, suggesting an overcast day. The overall color palette is dominated by blues, greys, and greens.

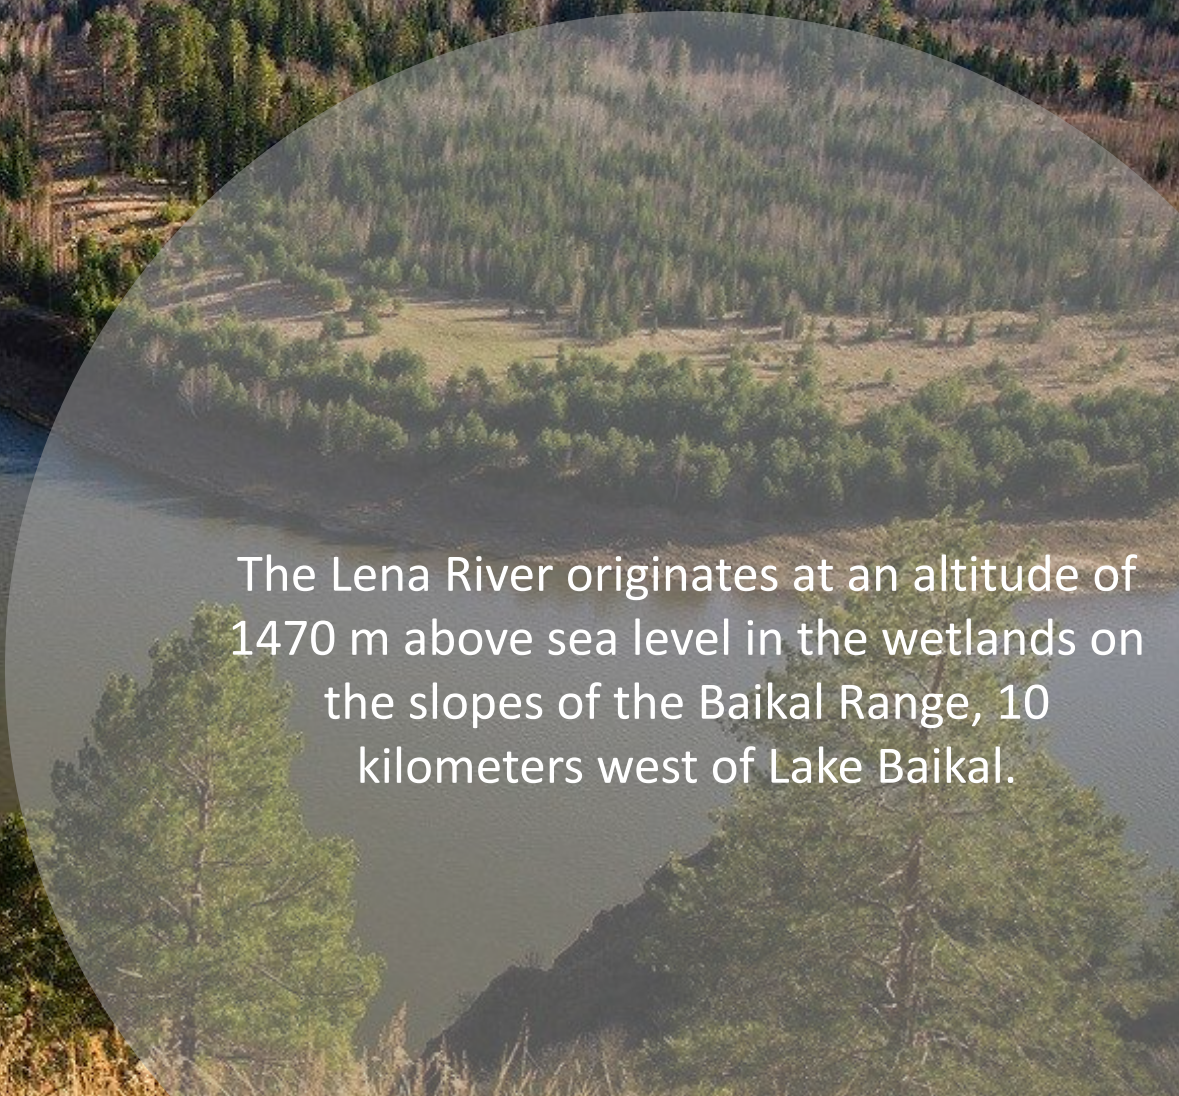

Its length is 4400 km. The Lena is the largest river in Eastern Siberia, the tenth longest river in the world, and the eighth deepest river in the world.

it is located in Eastern Siberia. The Lena drainage basin lies entirely within the Russian Federation.

An aerial photograph of the Lena River in Siberia. The river is a deep blue color and flows through a lush green forest. In the background, there are rolling hills and mountains under a clear sky. A small boat is visible on the river, leaving a white wake. The word 'Baikal' is written in white serif font on a semi-transparent grey rectangular background in the upper left corner.

Baikal

A circular inset image showing a different perspective of the forested landscape. It features a dense forest of green trees on a hillside, with a small clearing or meadow in the foreground. The background shows more forested hills under a clear sky.

The Lena River originates at an altitude of 1470 m above sea level in the wetlands on the slopes of the Baikal Range, 10 kilometers west of Lake Baikal.

An aerial photograph of the port of Tiksi, Siberia. The scene is dominated by a large, flat, snow-covered area that appears to be a frozen body of water or a large industrial yard. In the background, a line of industrial cranes stands against a pale, overcast sky. The foreground and middle ground are filled with various industrial buildings, some with bright green and yellow facades. The overall atmosphere is cold and industrial.

the port of Tiksi

It flows into the Laptev Sea of the Arctic Ocean. The mouth of the Lena is an important transport hub in Siberia, in particular, one of the ports of the Northern Sea Route is located here - the port of Tiksi.

It is also rich in fish resources - these are such valuable species of fish as sturgeon, nelma, broad whitefish, muksun, omul, vendace. Taimen, lenok, and grayling are found in its eastern tributaries.

A young woman with her hair in a ponytail, wearing a dark, low-cut crop top, is dancing in a crowded party. Her right arm is raised. The background is filled with out-of-focus, colorful bokeh lights in shades of blue, green, and white. A speech bubble is overlaid on the lower-left side of the image.

bye
b*tches!!
