- 1.What is Urban Legend?
- 2.History about legends chosen us.
- 3.When they started spreading?
- 4.Examples from real life.

Boogieman

- Boogieman, also spelt as bogeyman, boogymen, bogymen, boogieman, boogey monster, is a legendary ghost-like monster. Having no precise appearance and conceptions like the other famous monsters, the Boogie man can change significantly even from house to house, within the same community, led on by the imagination of a child or a person. He is just a formless personification of terror.
-
- Boogie monster can be used figuratively to indicate a person or thing of which someone has an unreasonable fear. Parents are often heard telling their naughty child of a Boogieman hiding under his bed or in his bathroom, all in an effort to make them behave.

Bigfoot

- The Bigfoot figure is common to the folklore of most Northwest Native American tribes. Native American Bigfoot legends usually describe the creatures as around 6-9 feet tall, very strong, hairy, uncivilized, and often foul-smelling, usually living in the woods and often foraging at night. Native American Bigfoot creatures are almost always said to be unable to speak human languages, using whistles, grunts, and gestures to communicate with each other. In some stories, male Bigfeet are said to be able to mate with human women. In some Native stories, Bigfoot may have minor supernatural powers-- the ability to turn invisible, for example-- but they are always considered physical creatures of the forest, not spirits or ghosts.
