

How reduce carbon footprint

1-st:

We can make some rubbish bins for all types of trash and posters that will remind people to throw it away!

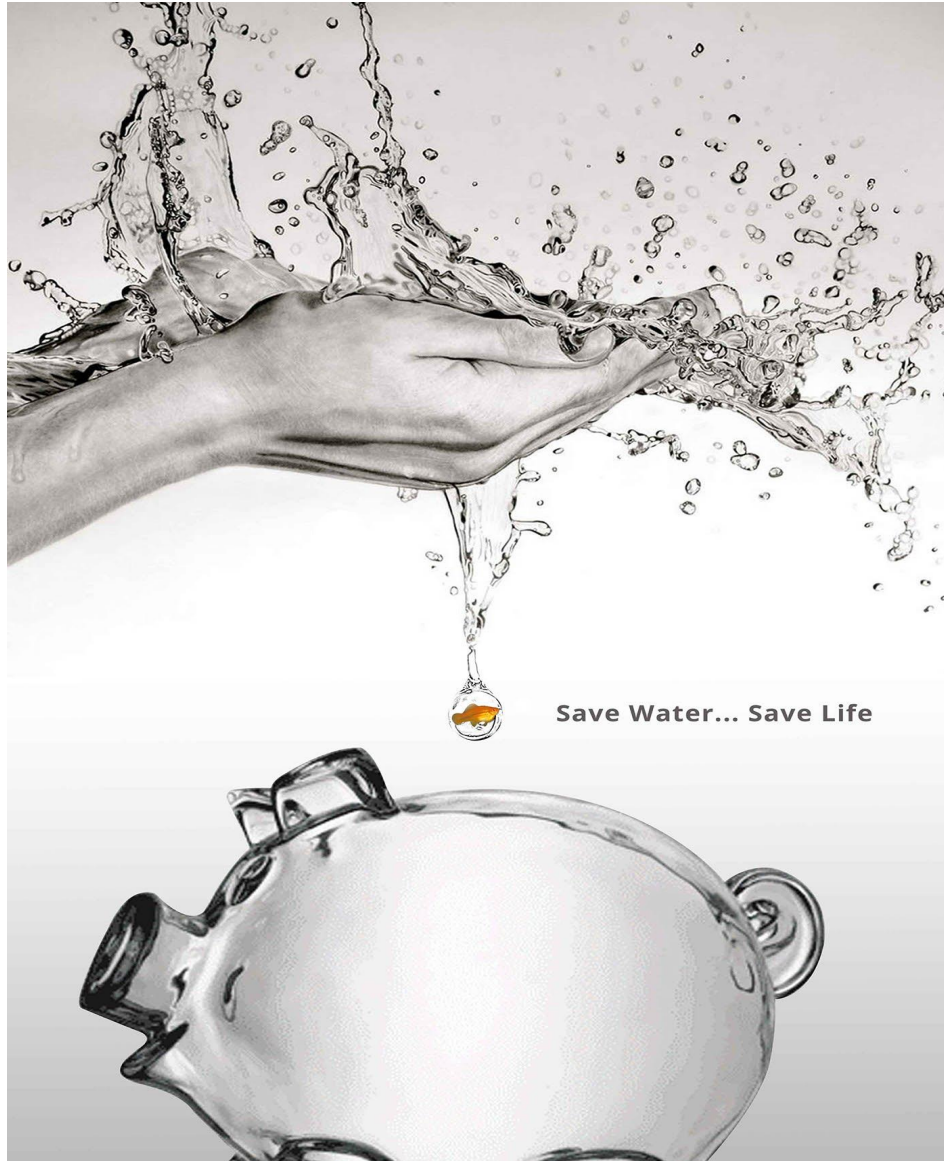

2-nd

We also can make posters and tell people to save water and electricity.

SAVE ELECTRICITY BILL

We need to do this because more than 750,000 people in the world suffer from water deficit and you can help them just by turning off tap.

Thanks for your attention!

THAT'S ALL!
