

# My educational institution

# My College

The technical school has a large room set aside specifically for rest during recess.

Our technical school is rather well equipped. There is a large sports ground outside and one gym inside. There is also a huge library with a good choice of different books.

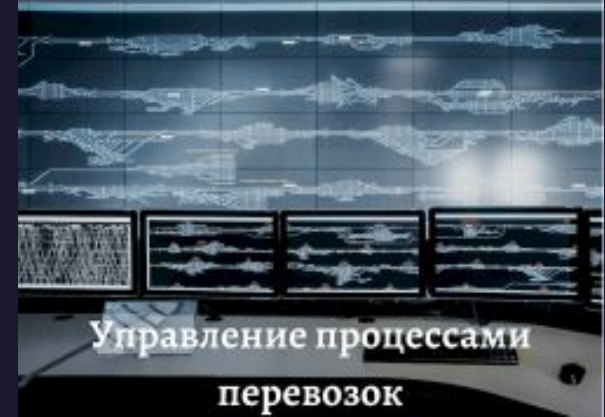

This technical school has a separate class for the train and train simulator, which replicates the train station in our city.

# Faculties

Today, the college provides basic and advanced training in specialties such as computer networking, transportation and rolling stock management, electromechanical and energy faculties.

- I am very proud to be a student of this technical school. Today, the Tambov Railway Technical School is one of the most prestigious and reliable institutions in the city. Thousands of young people can get a decent education and in the future become demanding workers in their specialty.
