

DATA POWERPOINT

Template by HubSpot

Thanks for downloading this resource.

How to Use This Template:

- Use this presentation as a guide/inspiration for your own PowerPoints. Format the presentation using your brand's colors, fonts, images, and style.
- Add new slides using the "New Slide" button in the toolbar.
- These templates are for both Mac and PC users, but if anything shows up a little funky or misaligned, just adjust to the slide and shift around anything that may appear different.
- Use the elements you need. If you like a text box or layout from one slide, copy & paste it onto another and mix and match designs.
