

Reforms of education

as made by Alalykin M

W

A little bit about reforms

What I want to change

- 1)system about teachers
- 2)quantity of forms
- 3)Exams

Teachers

- It is difficult to say but in our modern world there is this problem. Some of teachers are really bad. They can't even build their sentences. This applies to young the teachers. Furthermore, some of teachers too angry, they don't have enough patience. And finally, some of the teachers, I cant even characterize this type. They come into lessons and just sit at their mobile phone and do nothing. I am suggesting to select teachers more carefully.

Classes

Quantity of classes

- There is not much to say. I am suggesting 12th classes, because there are a lot of terms which we have just *run*.

In the end.

- In the end of my work I want to say about exams. Some of exams are really waste of time. For example exam which we have written on Wednesday. It is just randomness. All that I have said is never be in our system of education. I am sorry if this information will be too critical. Thank you for your attention.
