

We live in a world where work and play are constantly separated. Whether it's time for business, professional networking or social networking, we hop between networks 24/7 which is frustrating.

What if we could break the barrier without crossing the line between professional and social networking?

Bondder is making this a reality; a revolutionary technology that bridges the gap by hosting social and professional networking on one intuitive platform. With Bondder, you can connect in three simple ways. Professionally, socially or...both – making a dual bond for unlimited opportunity.

**bondder** is not only the innovative way to  
connect with people...

but also helps you organize your day to day life  
with intuitive tools

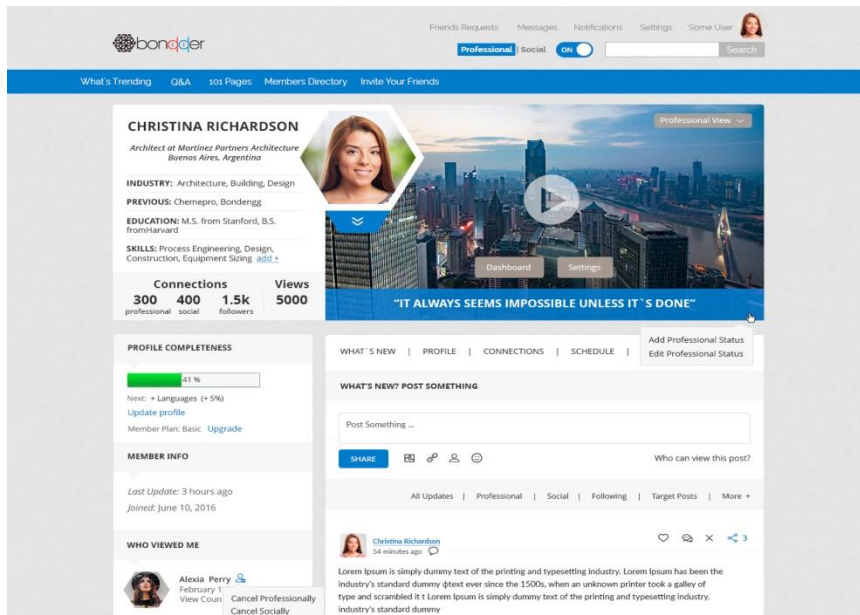

Users can switch between Professional Network and Social Network with ease, without cross-fertilizing sensitive information. Social stays social, and business remains strictly business. Industry professionals can share technical knowledge with their peers in the comfort and protection of an exclusive network.

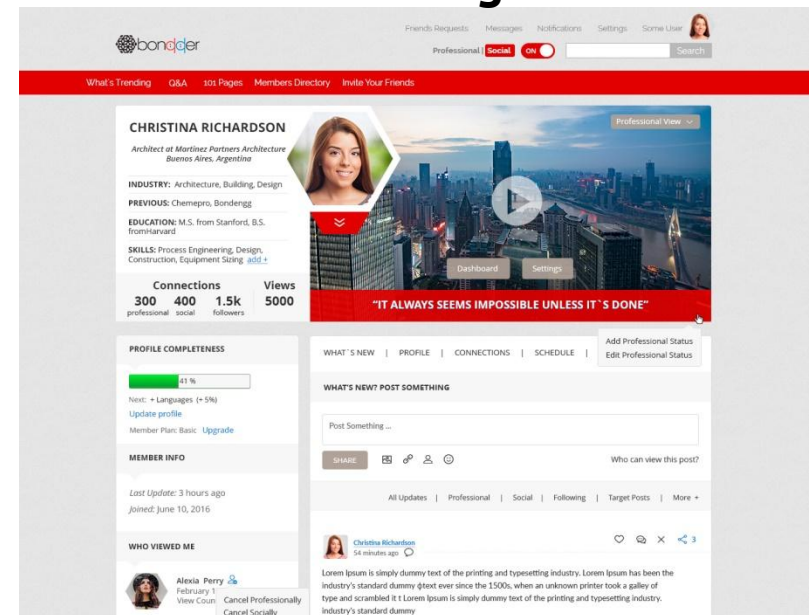

Colleagues can even build an online team, just like a group. The same goes for the social side. Users can ask questions if in doubt and also create their own 101 pages, spreading the word and letting others give their two cents as well.

# What's in the box?

**Build your professional profile  
for career advancement**

**Or network socially to stay in  
touch with your friends, family  
and colleagues**

**Or simply make both professional and  
social bonds that matters to you most**

# Interests based feeds and engagement. Build your own network in a network!
