Kairzhanova A.

ASTANA 2018

- The **history and philosophy of science** is an academic discipline that encompasses the philosophy of science and the history of science.

- The **history of science and technology** is a field of history which examines how humanity's understanding of the natural world (science) and ability to manipulate it (technology) have changed over the centuries.

- **Philosophy of science** is a sub-field of philosophy concerned with the foundations, methods, and implications of science.

- The aim of History and Philosophy of Science is to understand science: how it works, its historical development and its function in modern society. History and Philosophy of Science integrates philosophical, historical and sociological approaches to the study of science.
