Big dreams on the horizon for down-to-earth physics whiz

BY ALISON BOWEN
Chicago Tribune

Sabrina Pasterski has almost nothing toward the end goal, sometimes challenging physics problems from her peers.

When she was in high school, Pasterski was a member of the National Science Olympiad, a competition for high-achieving students in the United States. She was a member of the team that won the national championship in 2011.

But her passion was always for the more abstract, theoretical side of physics. She was a member of the MIT Physics Preceptor Group, a group of students who help each other with their homework and prepare for their preceptor sessions.

She has a deep understanding of the subject, and she is always looking for new challenges. She is currently working on a research project in the field of quantum gravity.

Pasterski's research interests lie in the intersection of quantum mechanics and general relativity. She is currently working on a research project in the field of quantum gravity.

She is currently working on a research project in the field of quantum gravity. She is currently working on a research project in the field of quantum gravity.

вона
отримує
докторську
ступінь в
області
Гарвардсько
му
університеті.

- Вивчає теорію струн та фізику елементарних частинок

Вона до цих пір прагне до небес: дівчина зізнається, що хотіла б мати мотоцикл, але поки вистачає польотів на легкому літаку Cessna 150.
