с. 88 Объяснение в учебнике

Если устно выполнить умножение трудно, то его выполняют, используя письменные приёмы.

Объясни вычисления:

$$34 \cdot 2 = (30 + 4) \cdot 2 = 30 \cdot 2 + 4 \cdot 2 = 60 + 8 = 68$$

$$234 \cdot 2 = (200 + 30 + 4) \cdot 2 = 200 \cdot 2 + 30 \cdot 2 + 4 \cdot 2 = 400 + 60 + 8 = 468$$

Удобно записать решение столбиком, используя знак x , и умножать сначала единицы, потом десятки, а затем сотни.

$$\begin{array}{r} x \ 2 \ 3 \ 4 \\ \hline 4 \ 6 \ 8 \end{array}$$
