

Ariana Grande

DANGEROUS WOMAN

Ariana's been teasing us with bits and pieces of the album on [its website](#), revealing not only song snippets but what looks to be the album's cover. In the pic, Ari's shot in black and white, wearing a strappy LBD and a shiny mask.

Dangerous Woman already looks to be a slightly more badass version of the Ariana we know and love. She's growing out of the '50s prom dresses and perky ponytails and into a more fully-realized, confident version of herself. Is this Ariana's version of Xtina Aguilera's coming-of-age album *Stripped*? She *did* change the name of the album from *Moonlight* to the far more confident and edgy *Dangerous Woman*, so we wouldn't be surprised.
