

Landslides

3 types of landslides

Falls

Some big falls

Demerdji fall

3 types of landslides

Slides

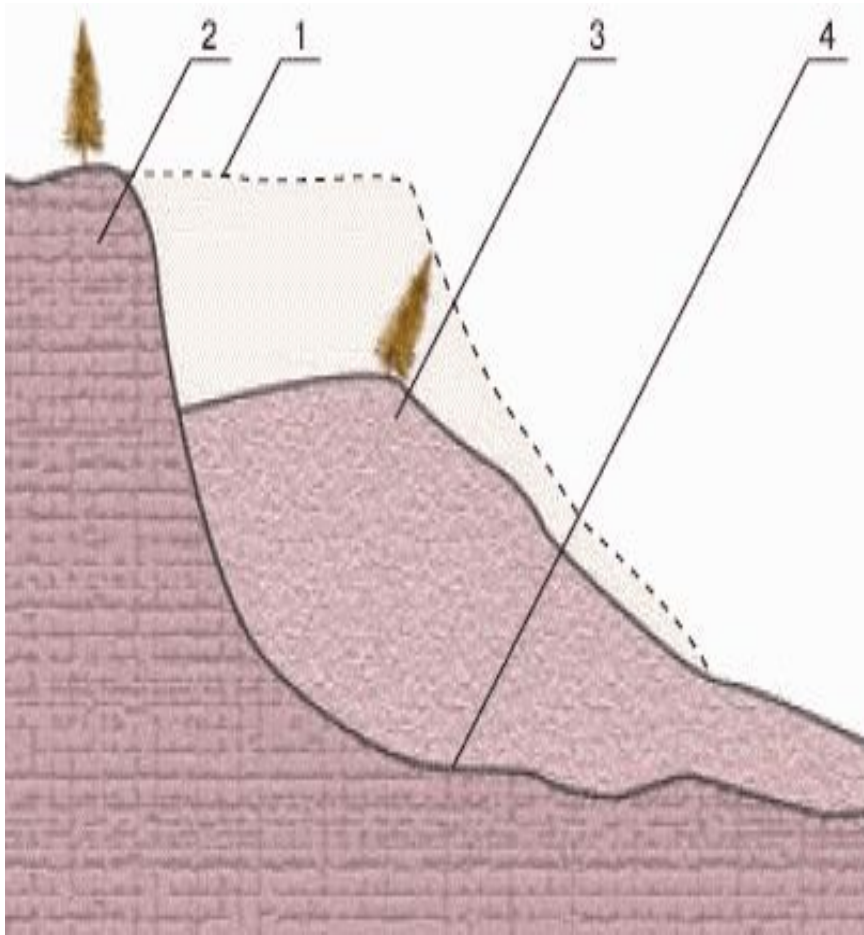

3 types of landslides

Flows

The principle scheme of landslides

1. The slope before the landslide;
2. The slope after the landslide;
3. Involved material (body of the slide);
4. Slip surface.

The causes of landslides

- Inherent properties of rocks;
- External conditions (gravitation, erosion, rain-falls);
- Man`s activity;
- Earthquakes.

Thank you for attention!
