

Life in my country 50 years ago

And so it will be about the 70-x years.

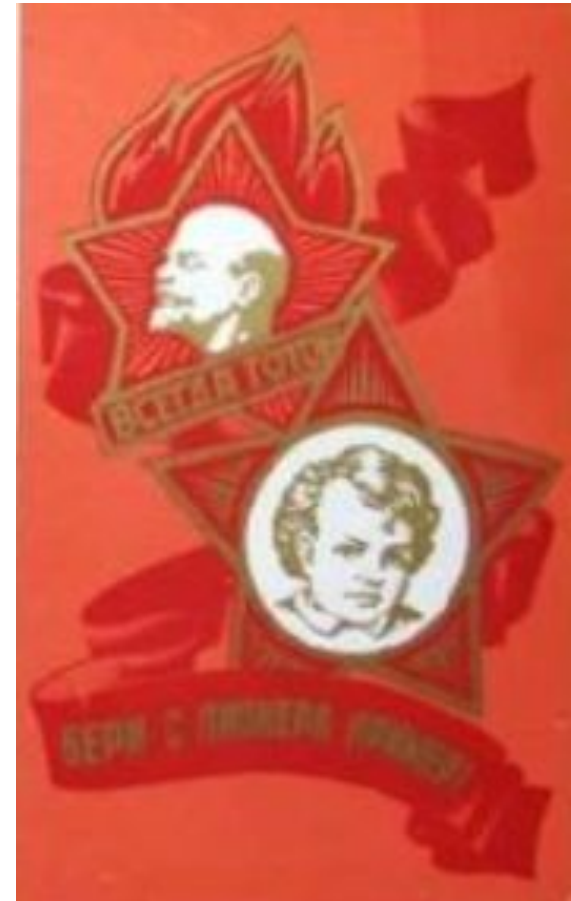

at that time on the site of Russia and countries nearby
was the Soviet Union

The term October has arisen in 1923-24, when in Moscow began to arise the first groups of October, in which were taken children - peers of the Great October socialist revolution.

In the USSR, pioneer the organization was formed May 19, 1922 of the year. Until 1924 pioneer organization bore the name of Spartacus, and after the death of Lenin got his name.

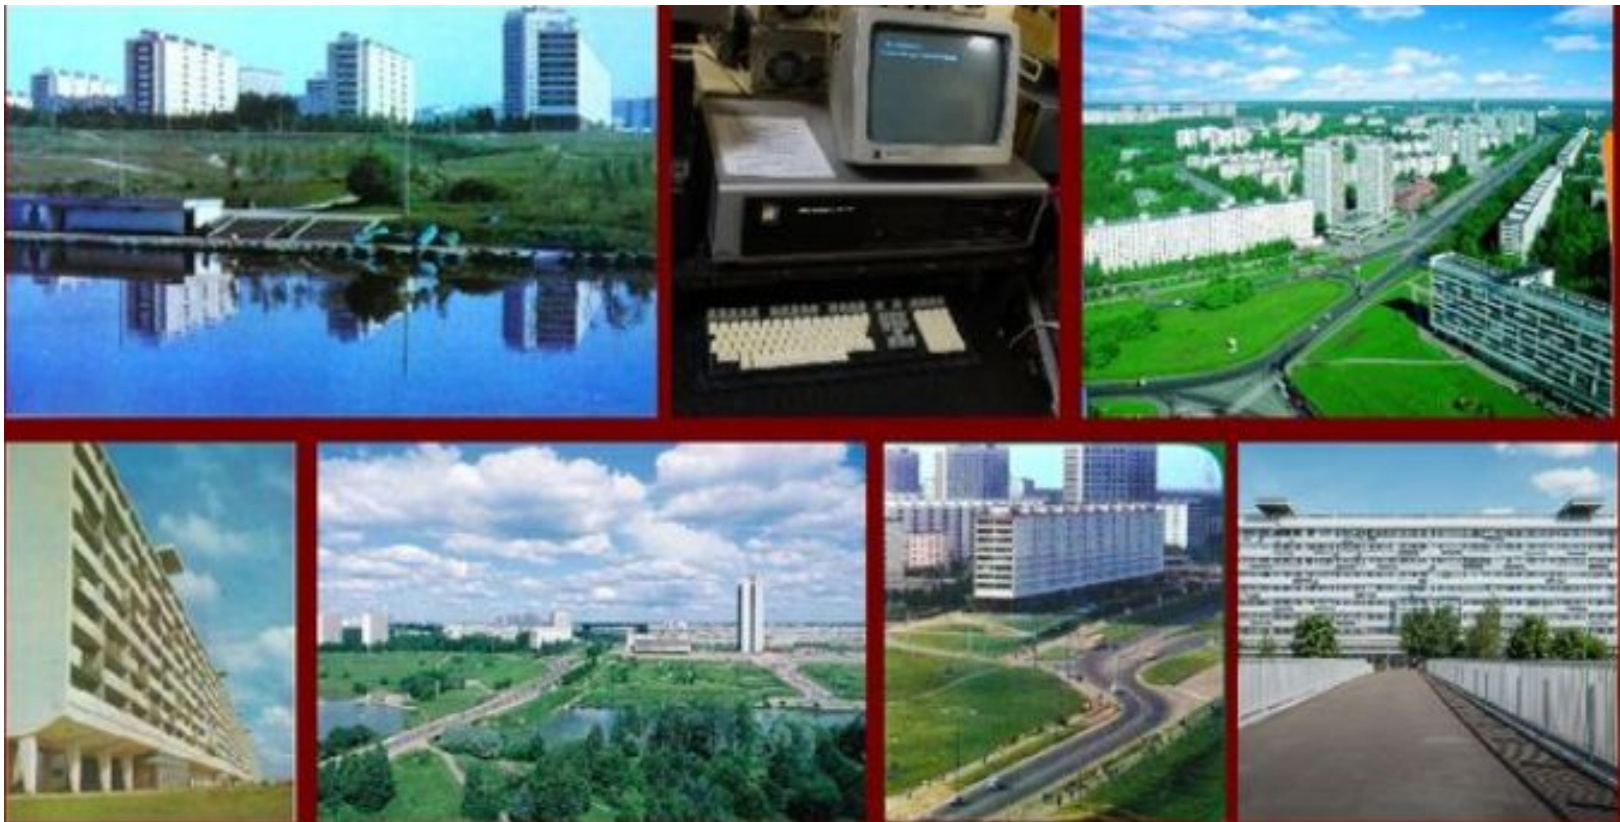

In the 1970s in the USSR, all industries were actively developing. Were built new enterprises (including VAZ and KAMAZ). From 1970 to 1985, the country was built 3200 new factories. An extensive development model prevailed in the USSR economics i.e. building factories across the country and increasing their numbers. wah.

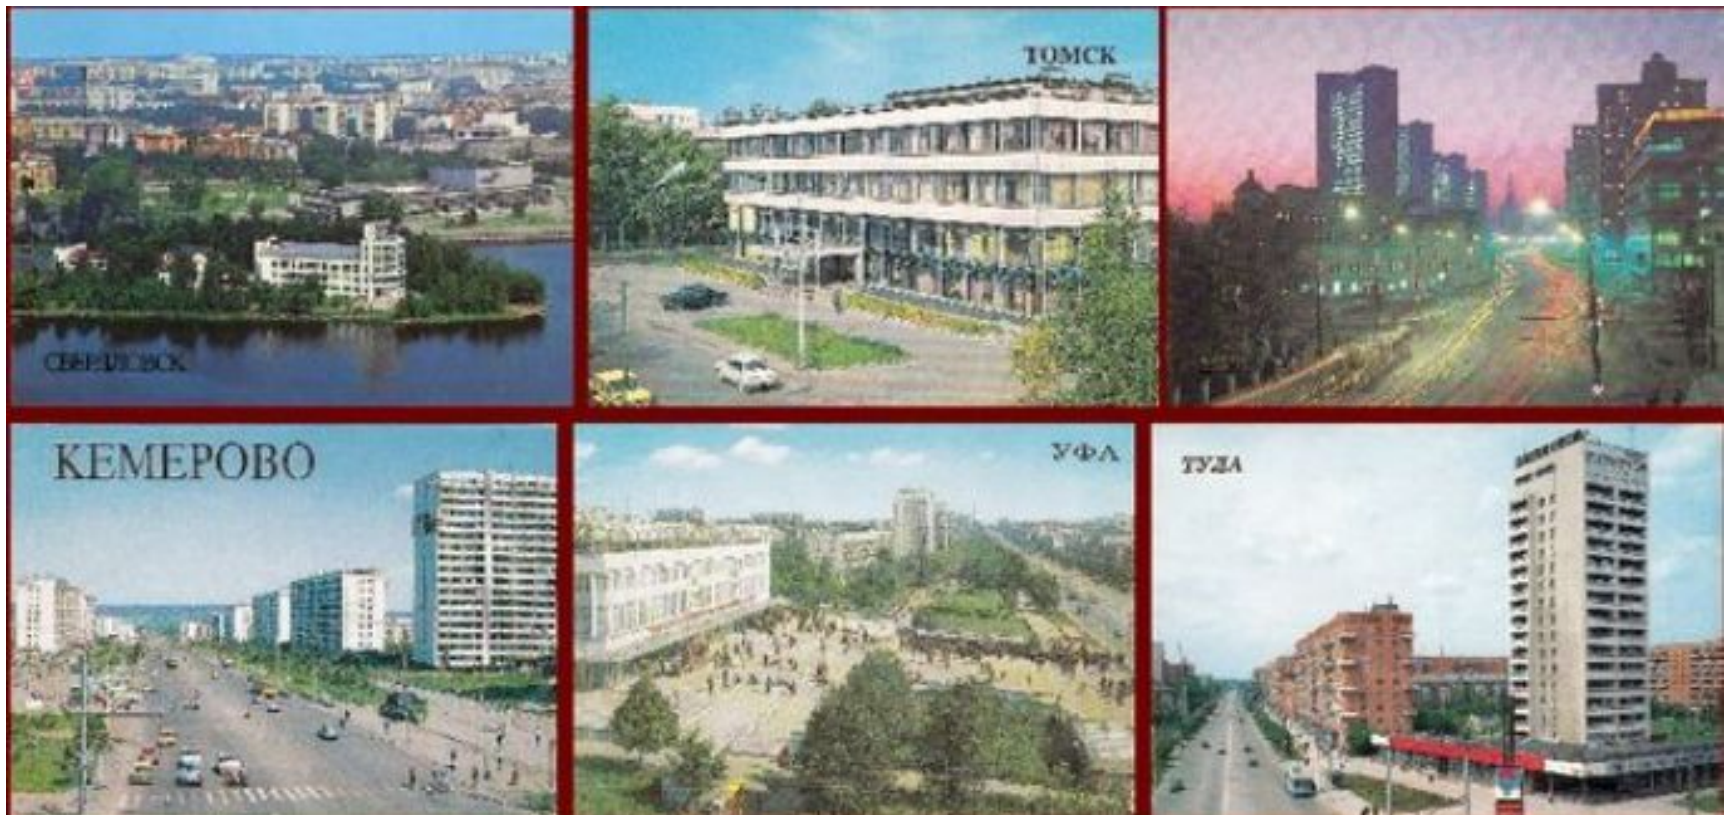

In the 1970s scientific and production associations were created in the USSR, new

high-tech industries (with the introduction of robotics, microelectronics, computer science and biotechnology). In search of more flexible planning introduced

long-term and comprehensive plans. The city of Zelenograd becomes one of main research and production centers of electronics and microelectronics USSR and Russia. More than 5,000 research institutions worked.

Domestic architecture of the 1970s. made a huge leap in her development. More sophisticated in functional, Constructively and aesthetically, building types. Progressive the orientation of Soviet architecture manifested itself in construction large residential complexes in all cities, in a sharp increase housing construction and in a qualitative change in the nature of housing.

Thank you all

for your

attention and

goodbye
