Presentation on my favorite movie theme

My favorite movie it's **«Miss Peregrine's Home for Peculiar Children»** («Дім дивних дітей міс Сапсан»)

The plot of the film tells about a usual 16-year-old teenager named Jacob, who, from an early age, was listening to the fantastic stories of his grandfather about the shelter of children with extraordinary abilities and fantastic creatures. When the grandfather dies, Jacob gets a mysterious letter and goes to the island where his grandfather grew up. There he finds children whom he had only seen in photographs.

16+

The film was shot by director Tim Bertone based on the novel by Rens Riggs in 2012. Tim Burton has made many interesting films such as:

«Alice in Wonderland»

«Dark Clouds»

«Charlie and the Chocolate Factory»

So, I love this film because it is filled with interesting and fantastic and fabulous moments, which are so often lacking in our everyday lives.

Thanks for your attention!
