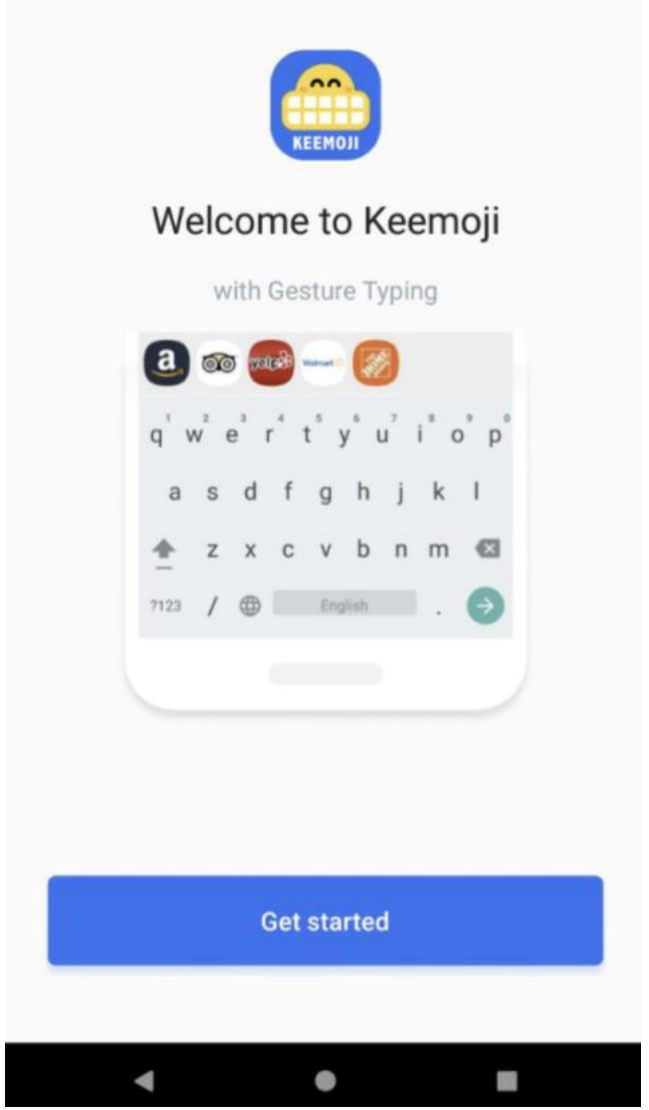
Keemoji

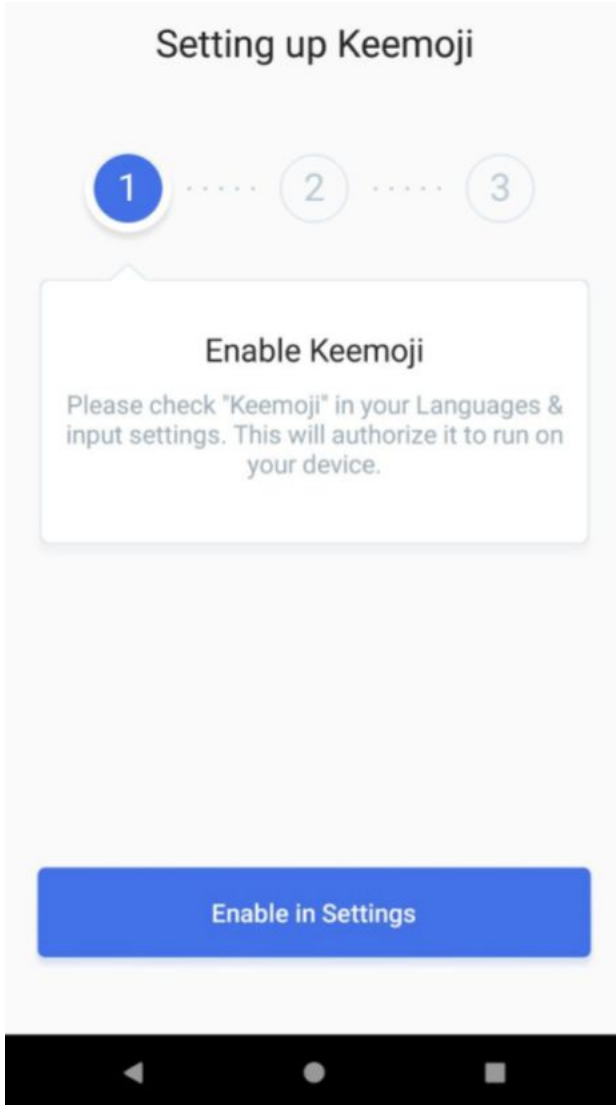
Новый онбординг Keemoji keyboard

Что? Зачем? Как?

Что такое онбординг?

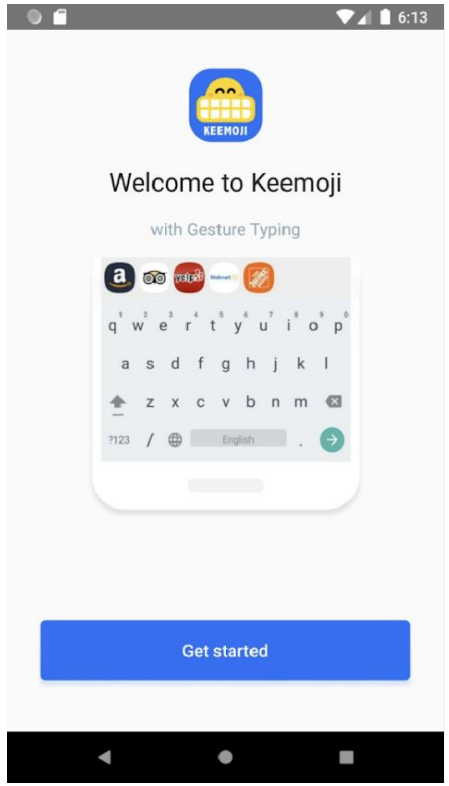
Это стартовые экраны при установке приложения. По мере прохождения которых пользователь активирует клавиатуру и знакомится с основными возможностями клавиатуры.

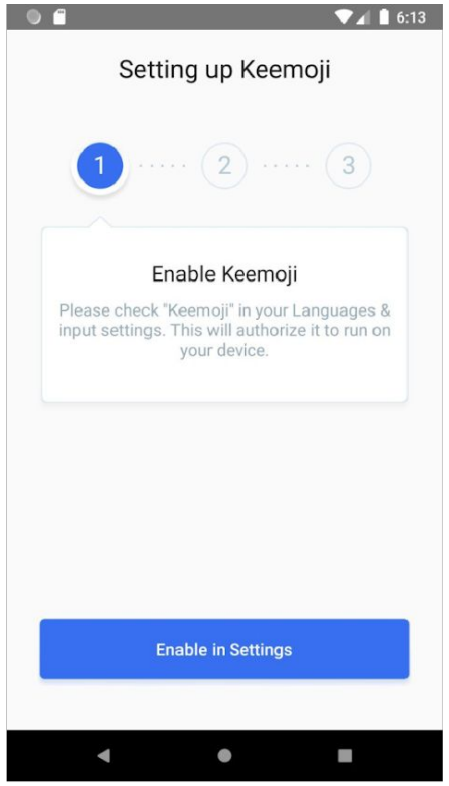


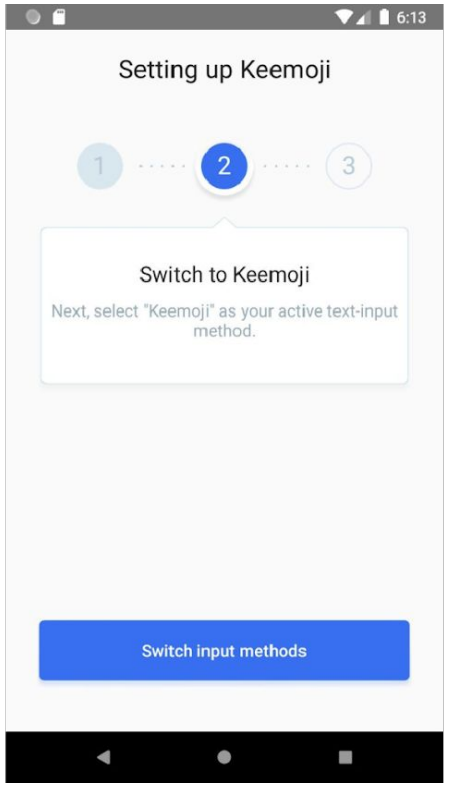


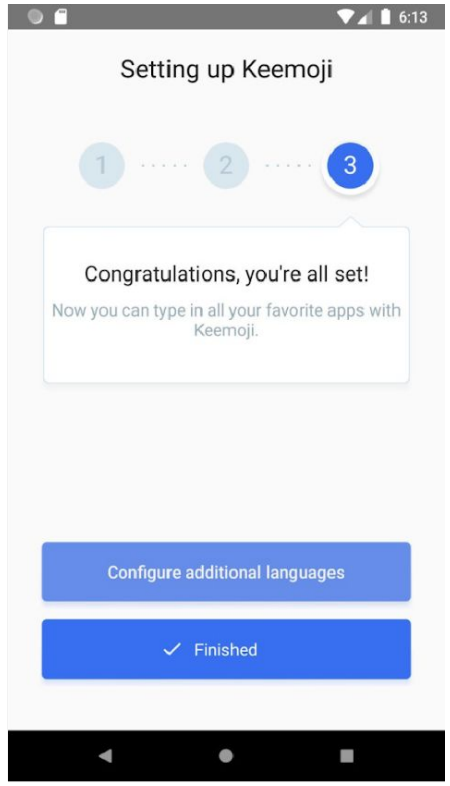
Дефолтный онбординг

Наш дефолтный онборд состоит из 4-х экранов (1 маркетинговый и 3 системных)









Кастомизация (Android)

Так как у нас множество партнерских сборок, то основное требование к онбордингу это широкие возможности кастомизации под партнера и простота имплементации дизайна в разработке.

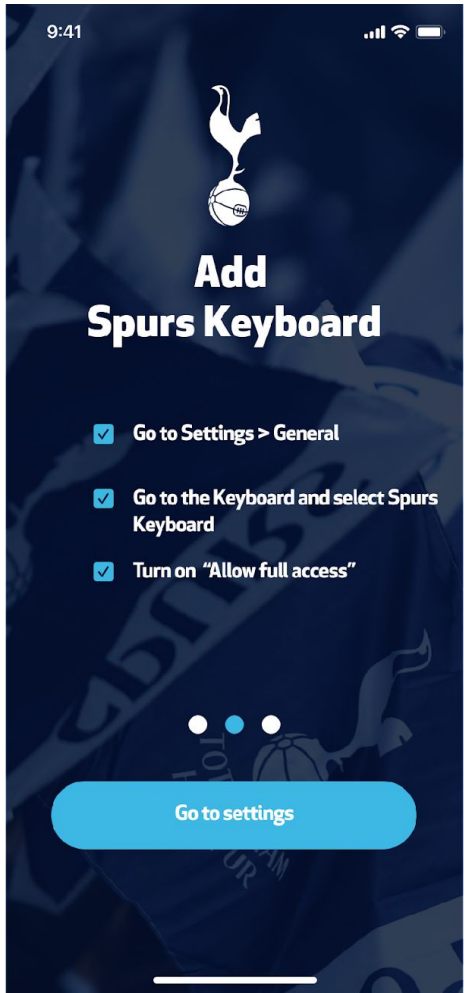
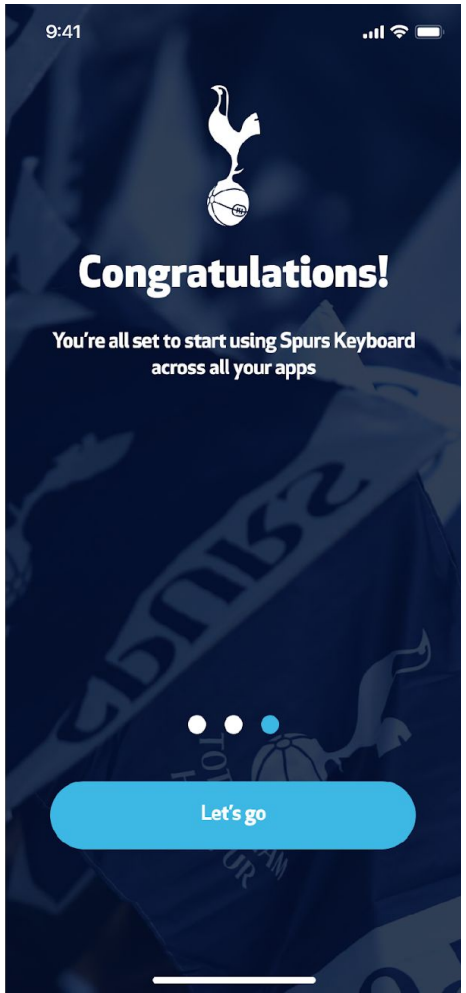
Welcome to
Spurs Keyboard
Get started

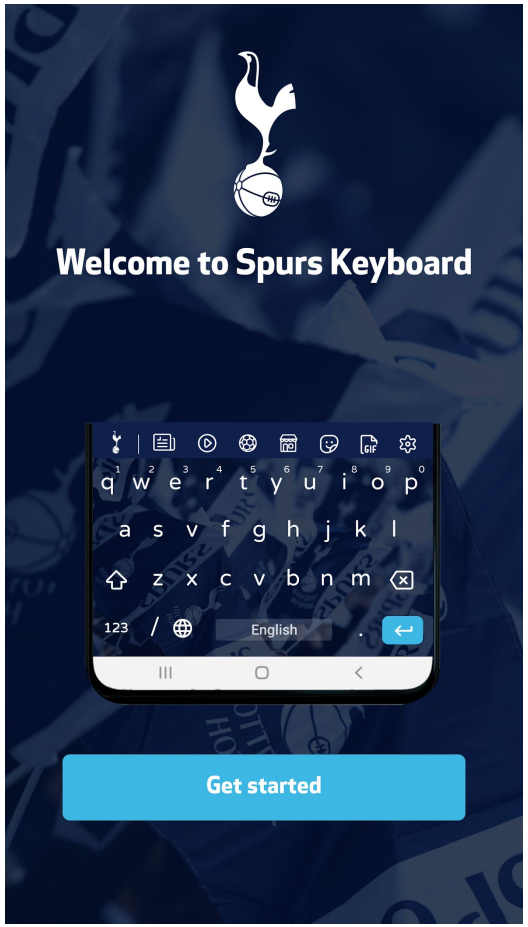


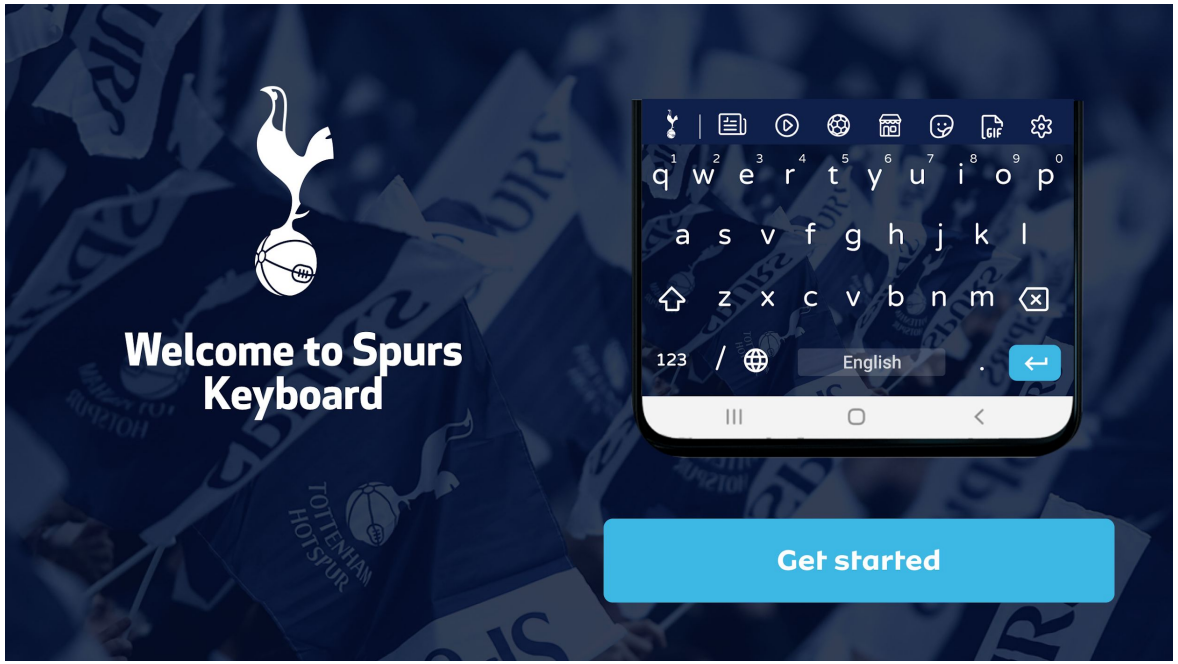
9:41
Add
Spurs Keyboard
Go to Settings > General
Go to the Keyboard and select Spurs Keyboard
Turn on "Allow full access"
Go to settings



9:41
Congratulations!
You're all set to start using Spurs Keyboard across all your apps
Let's go

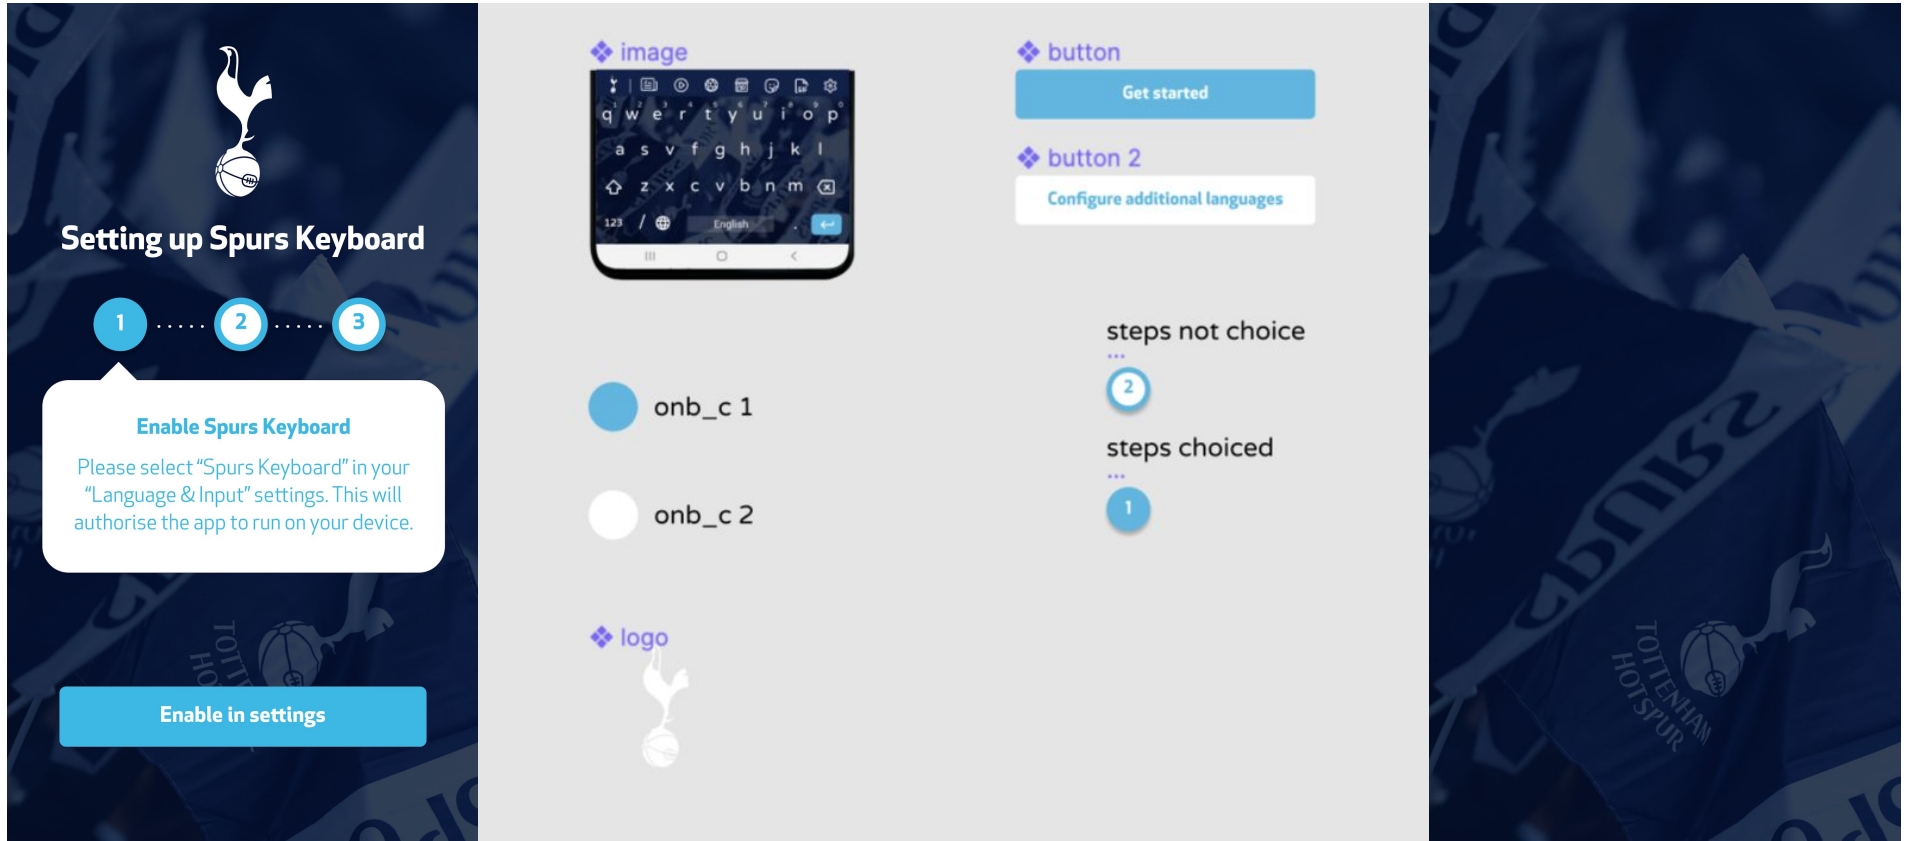
Вертикальный и горизонтальный вид





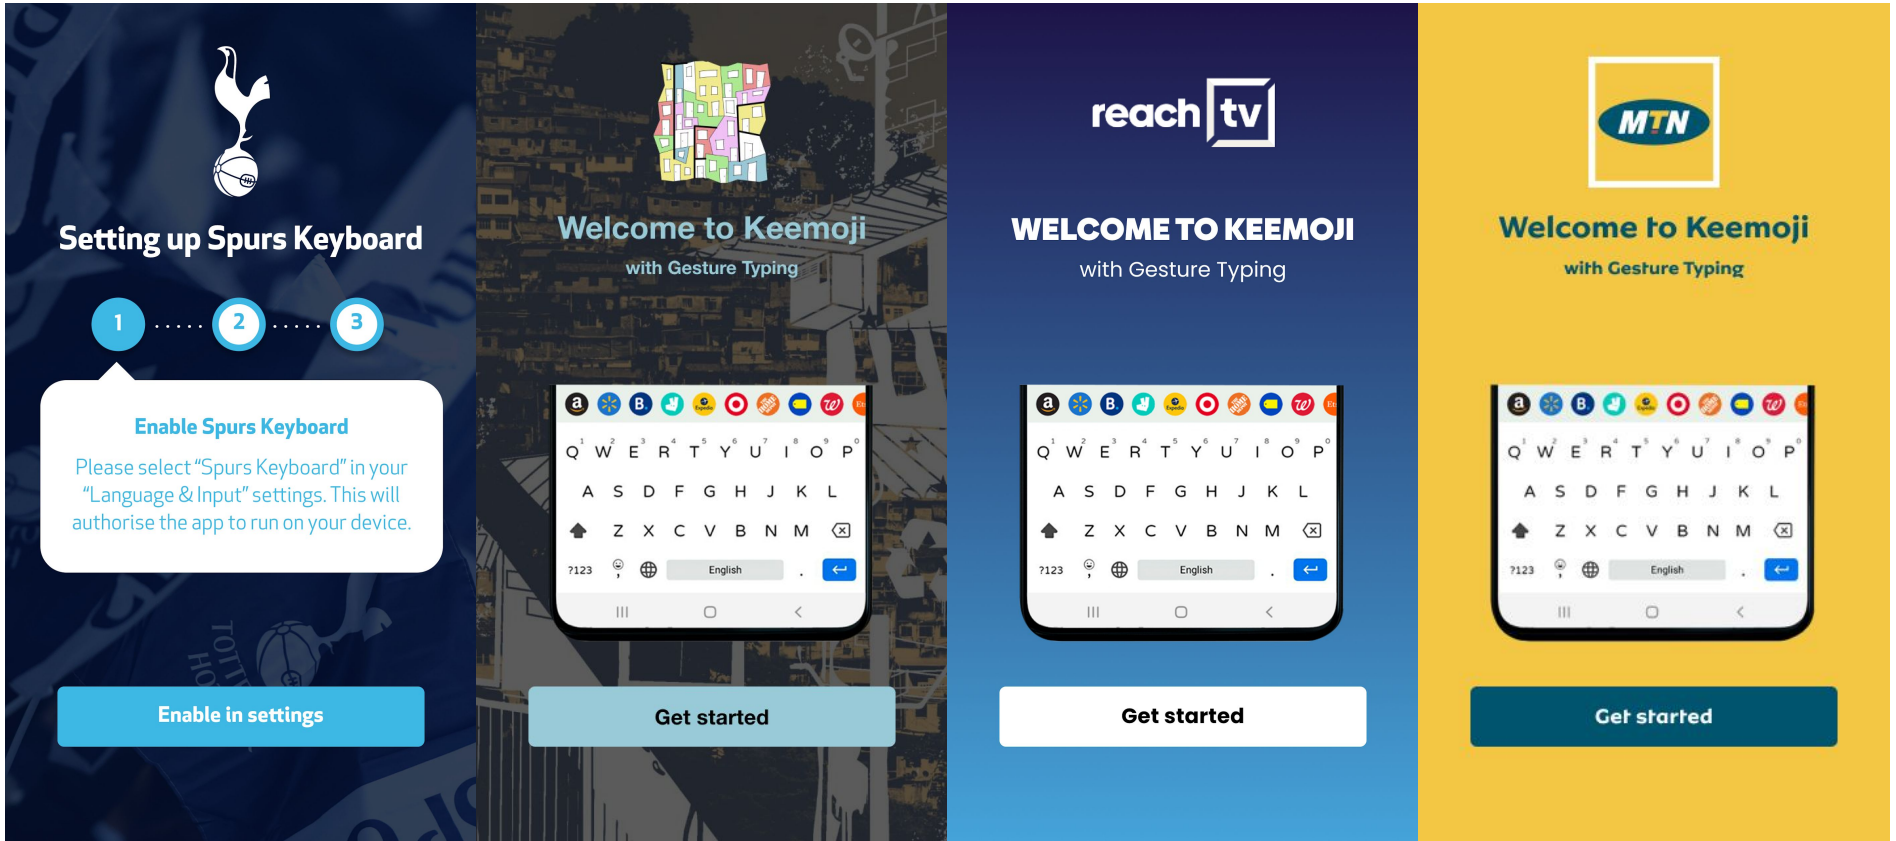
Возможности кастомизации

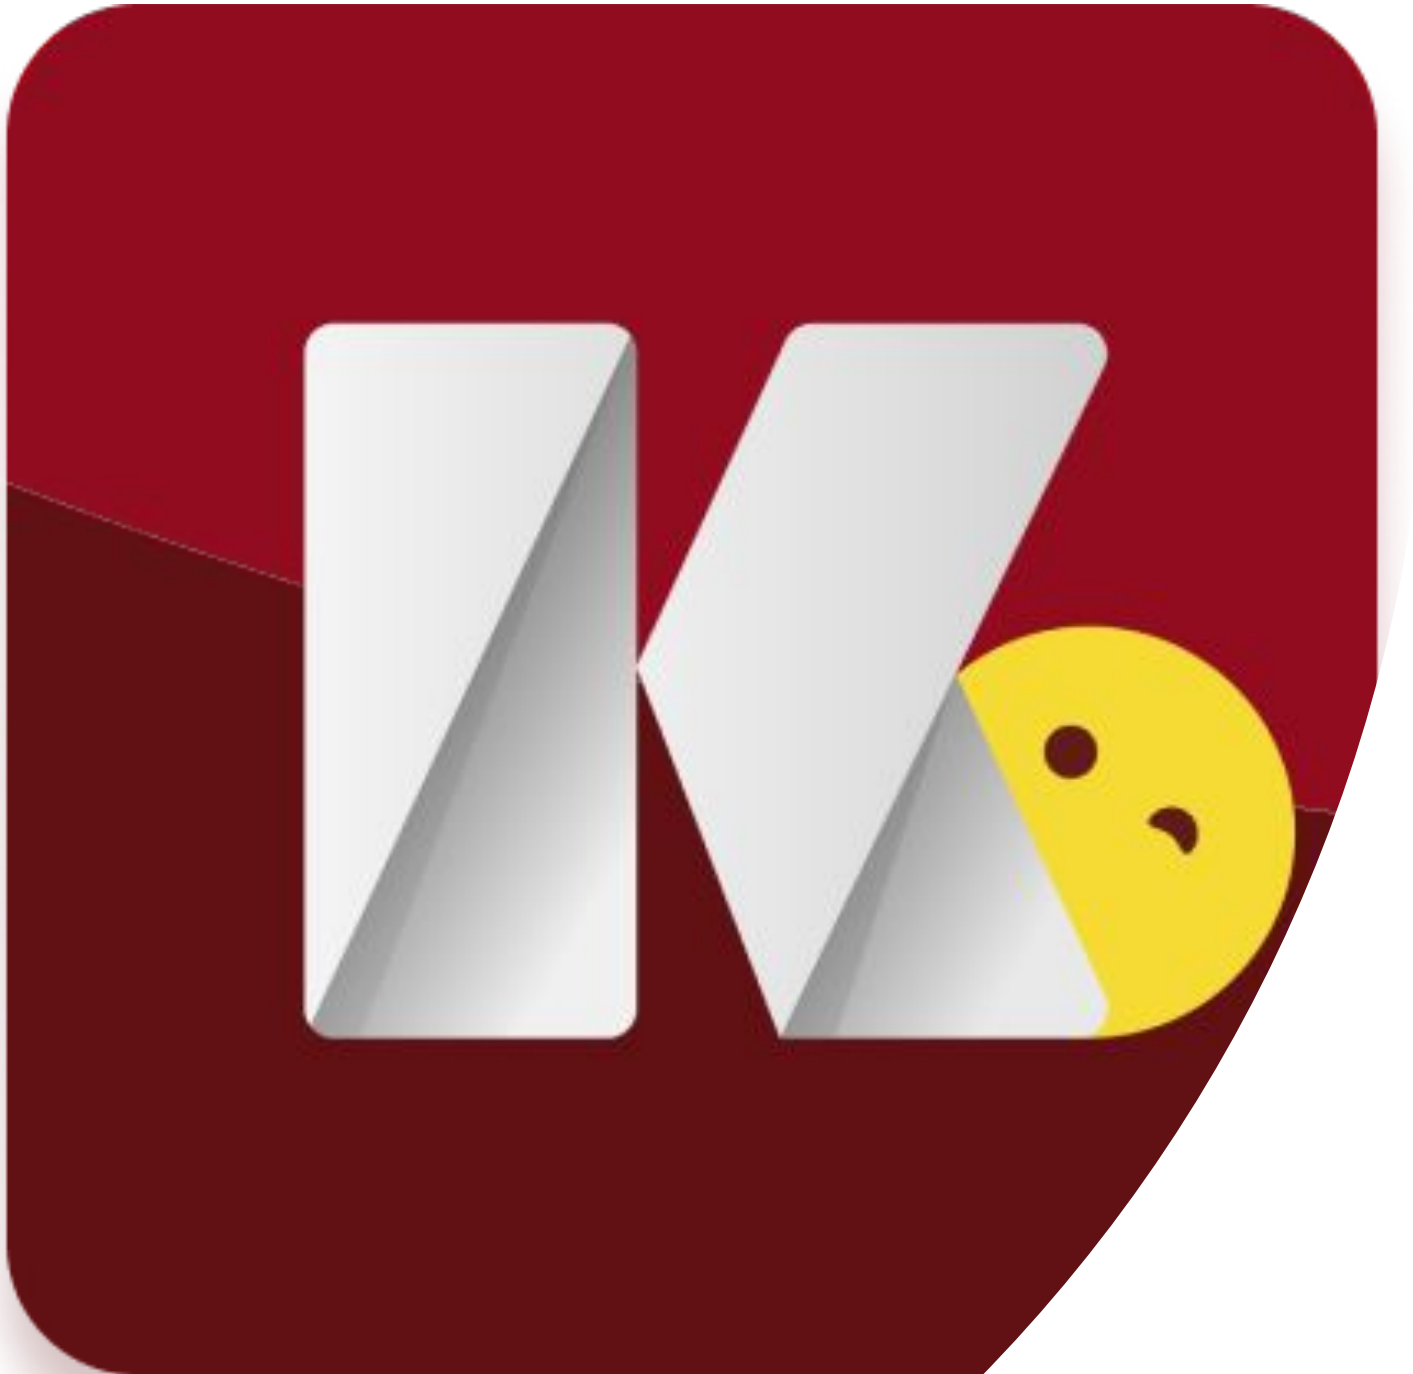
Кастомизируемые элементы: фон, шрифт, цвет, лого.



Возможности кастомизации

Примеры кастомизаций

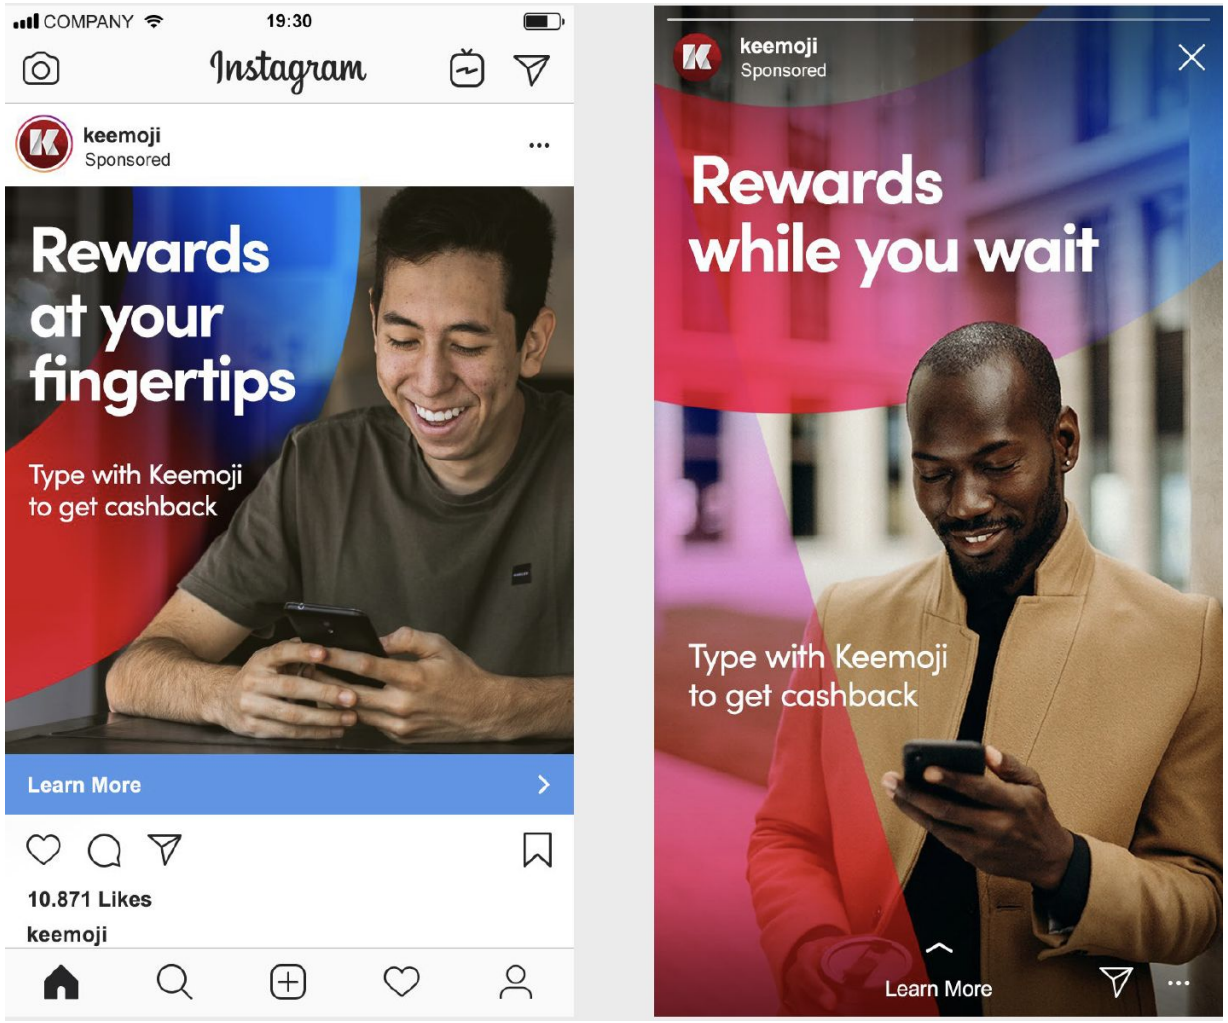




Зачем было что-то менять?

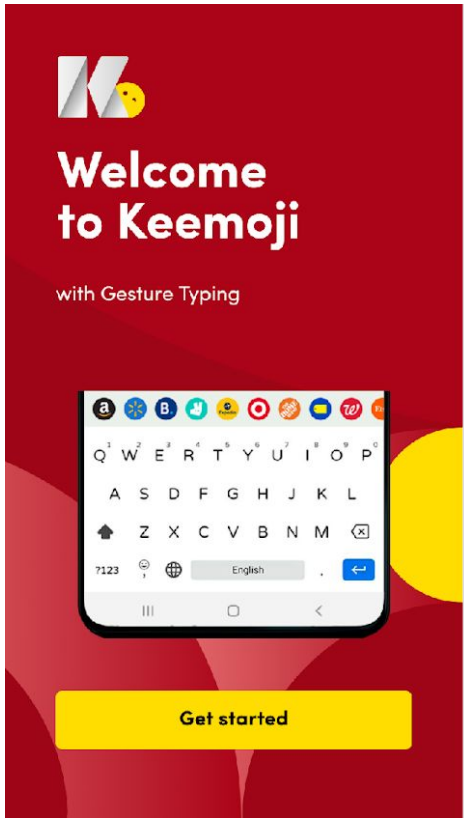
Причины обновления

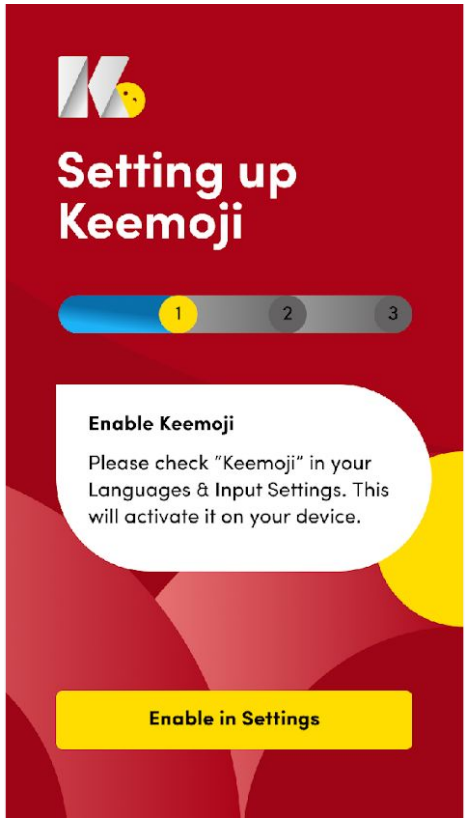
1. Появился новый фирменный стиль.
2. Новые фичи в клавиатуре
3. Клавиатура стала сложнее и нужно показать пользователю основные фичи просто, наглядно и понятно.

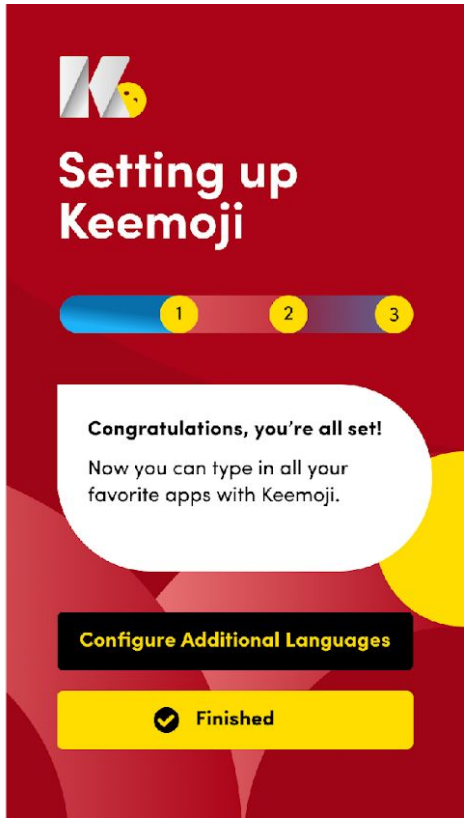


Итерация 1

Привнесли новые элементы в старую логику. Рестайлинг.

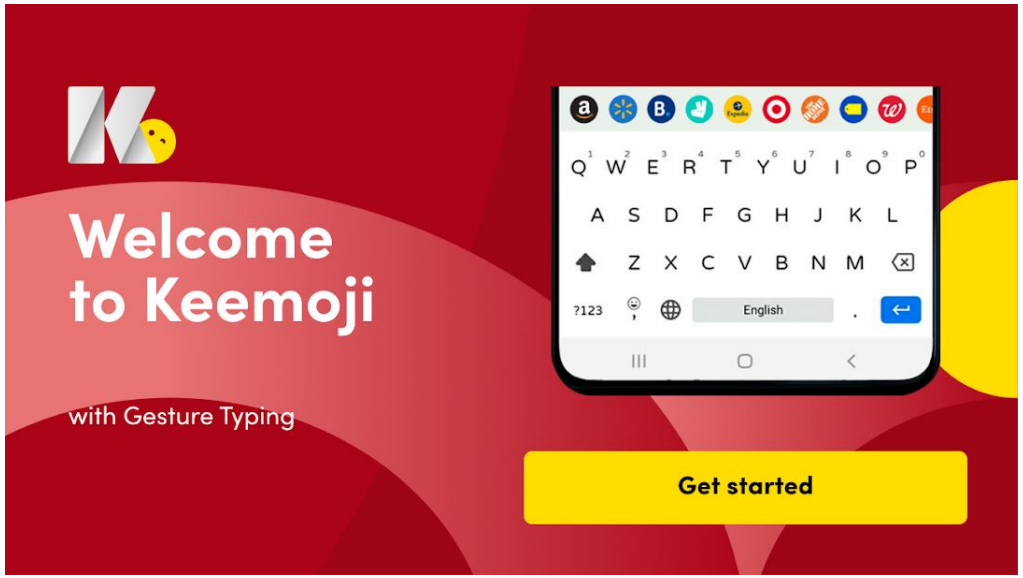


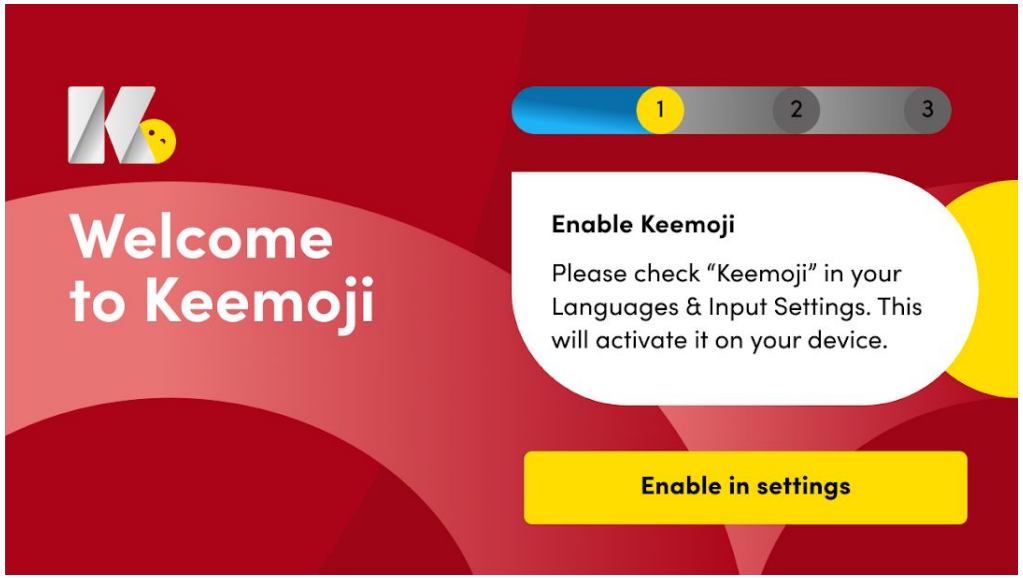




Итерация 1

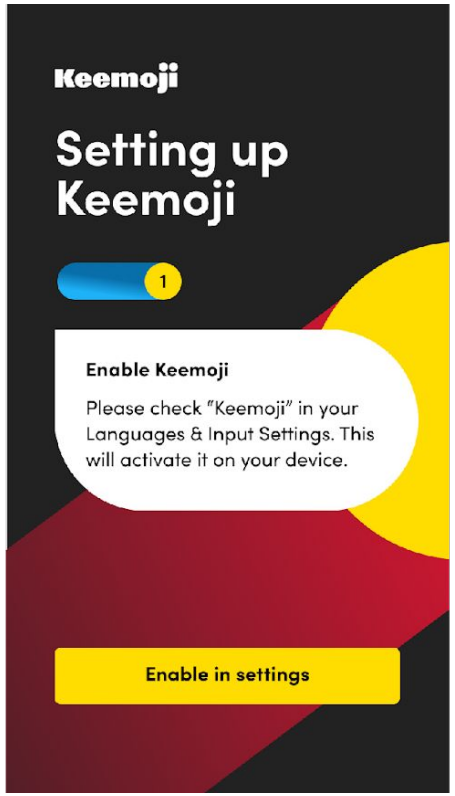
Привнесли новые элементы в старую логику. Рестайлинг.

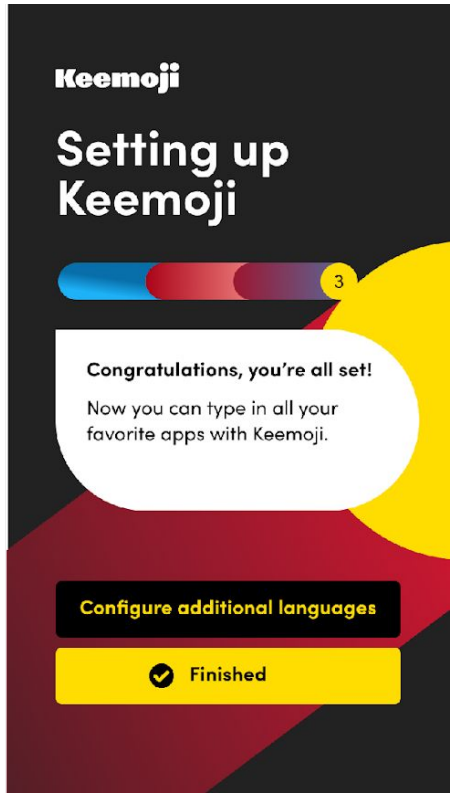




Итерация 1

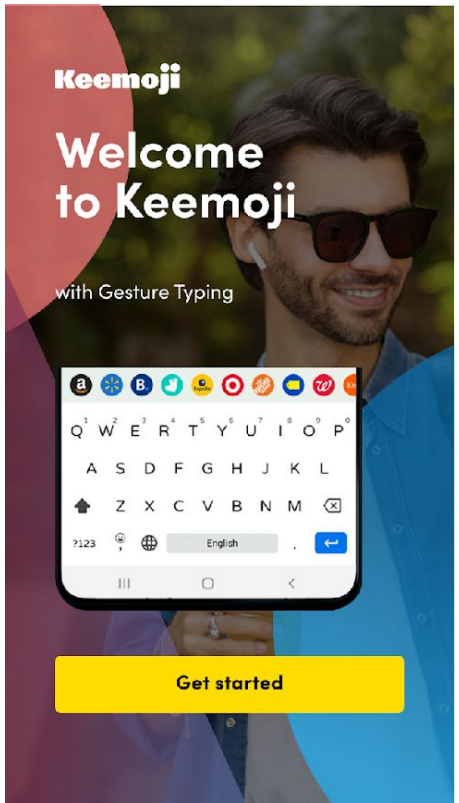
Привнесли новые элементы в старую логику. Рестайлинг.

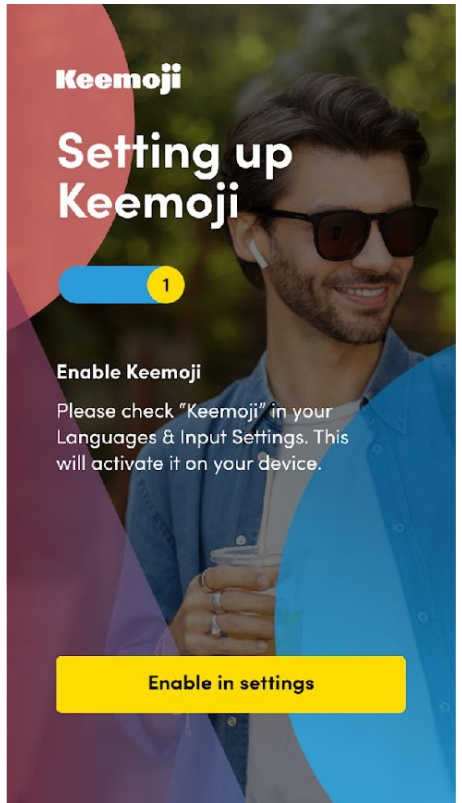


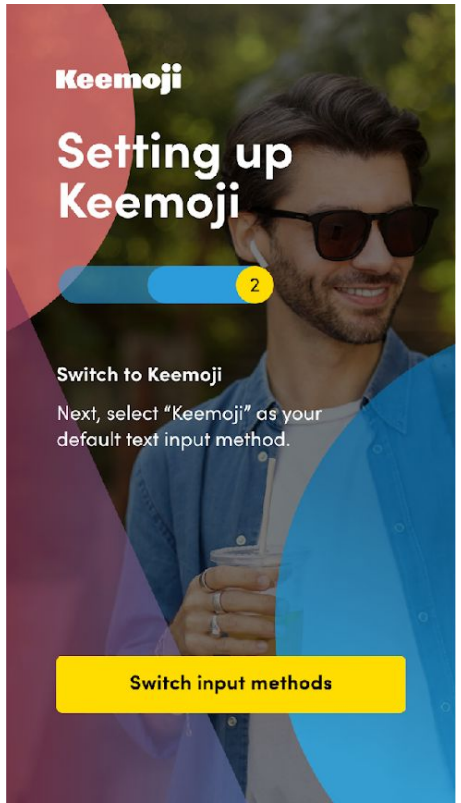


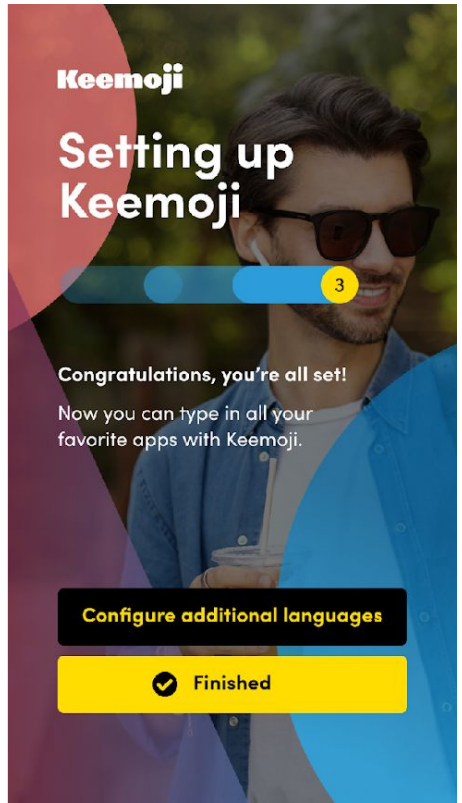
Итерация 1

Привнесли новые элементы в старую логику. Рестайлинг.









Результат

1. Выглядит свежо и современно
2. Клавиатура стала сложнее, а пользователю основные фичи так и не показали.

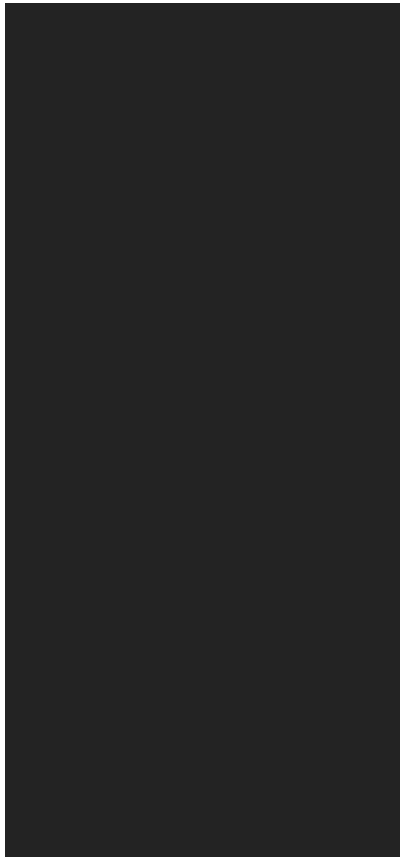
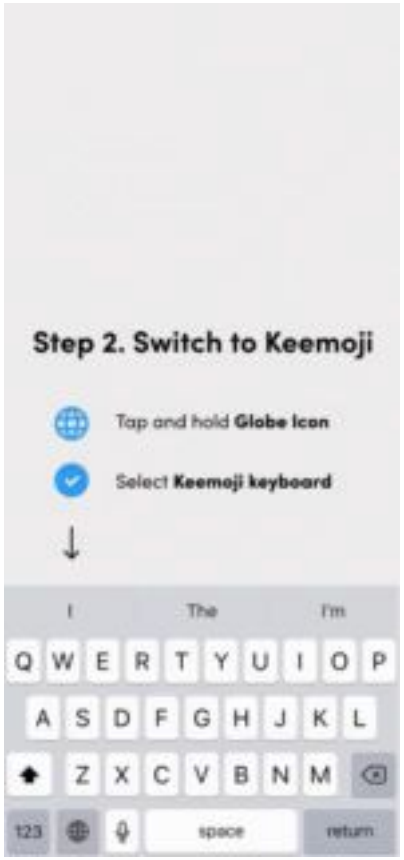
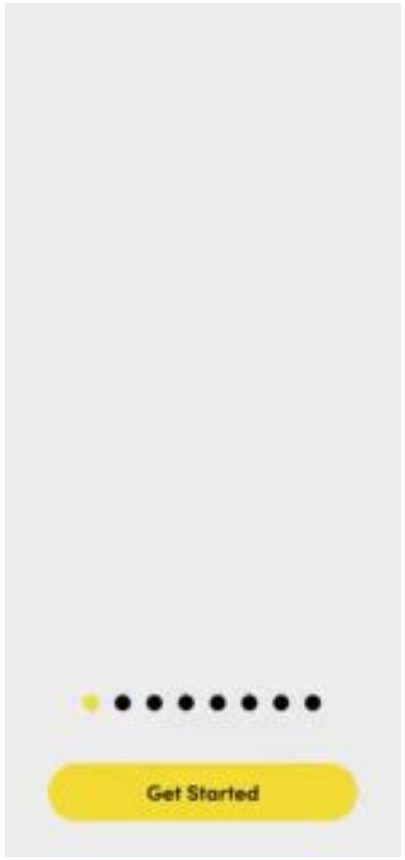
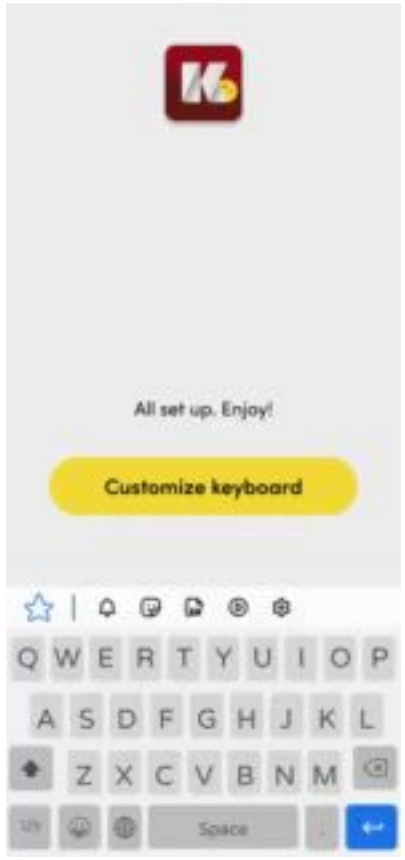
Примеры анимации экранов



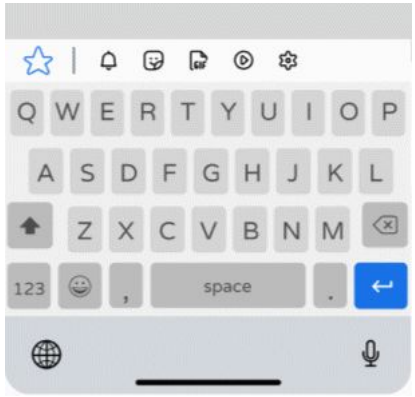


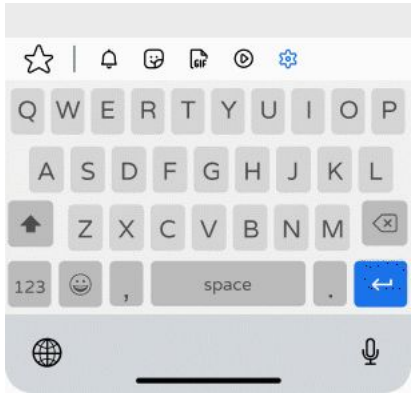


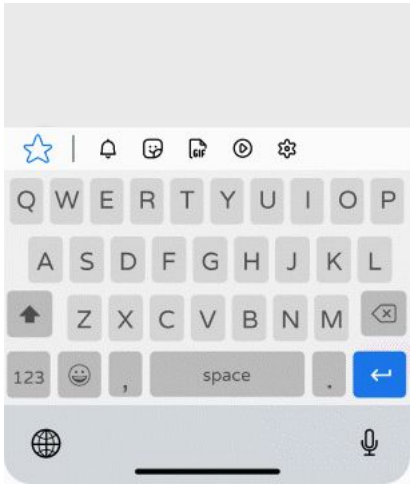


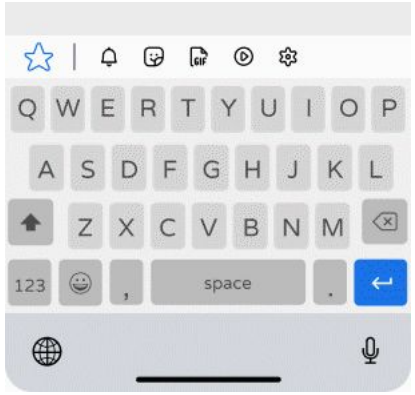
UI Keemoji keyboard

Микроанимации



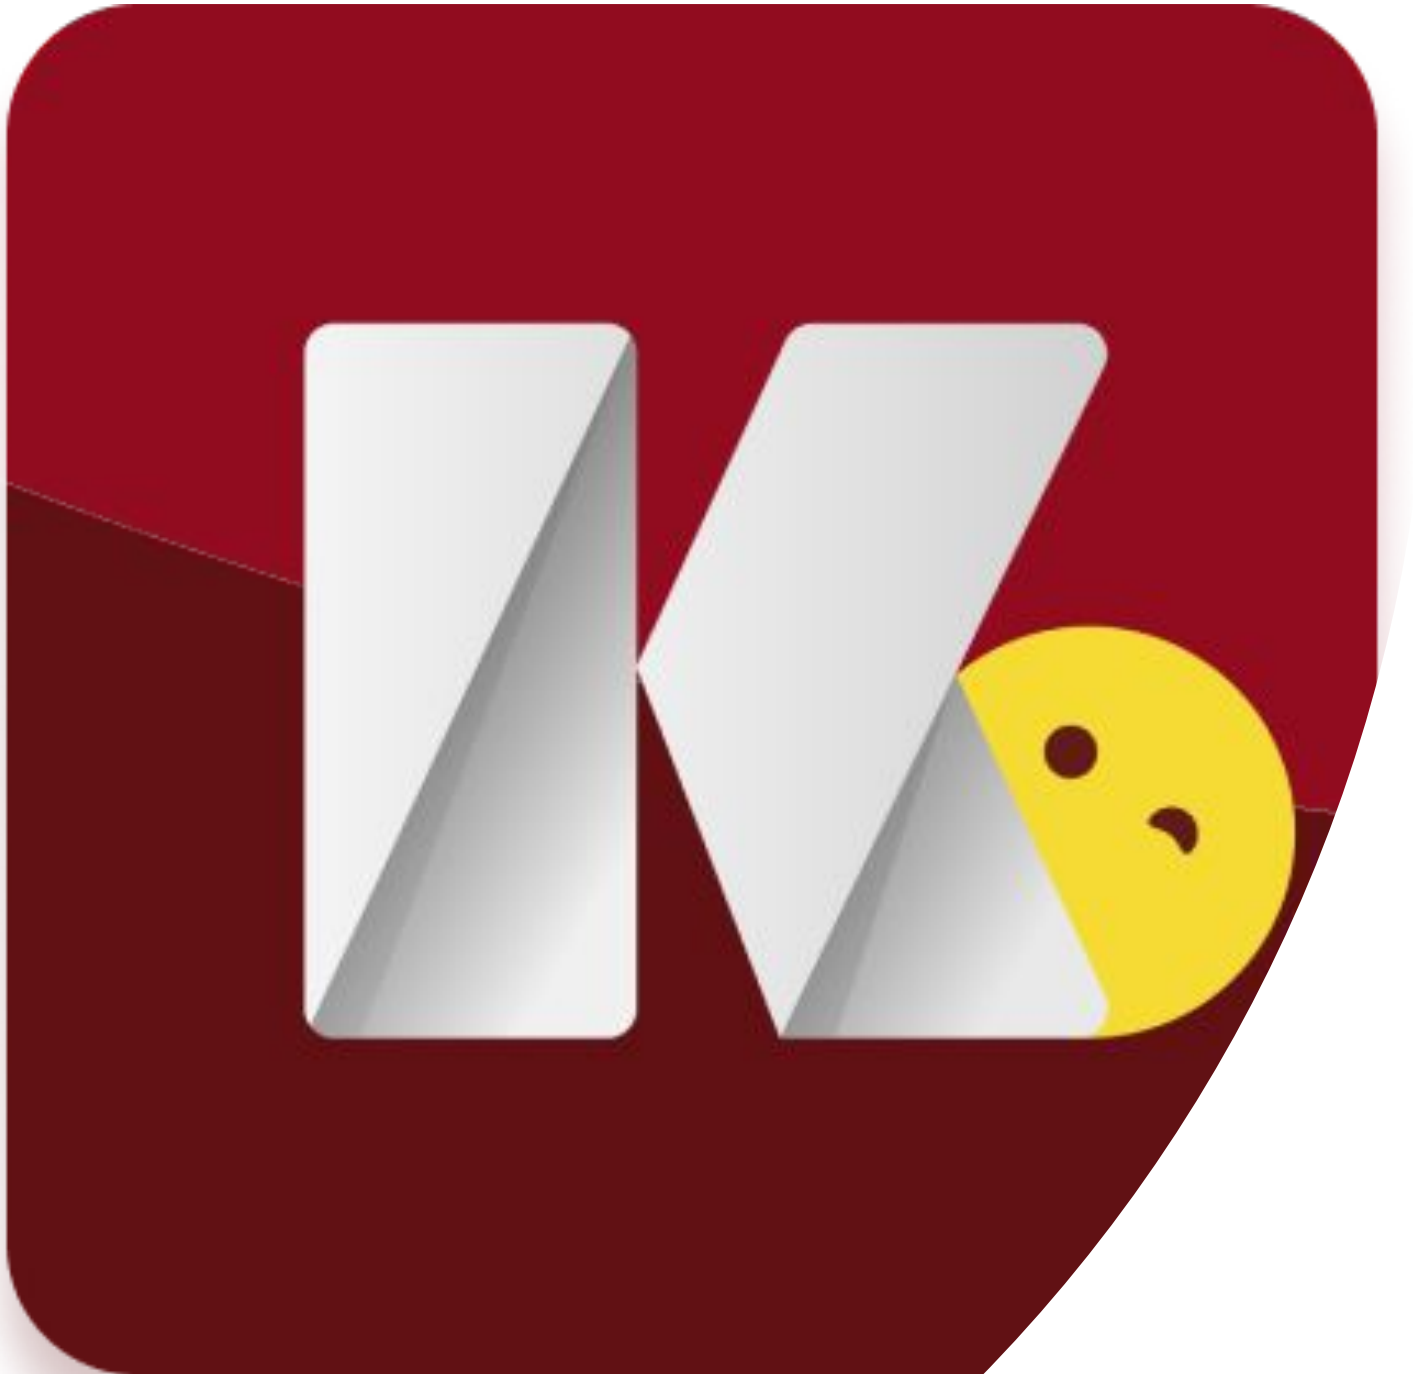






1. Большое количество микро-анимаций ограничивает возможности кастомизации дизайна

2. Анимации имеют ограничения при конвертации в JSON (не поддерживаются сложные выражения и многосоставные анимации

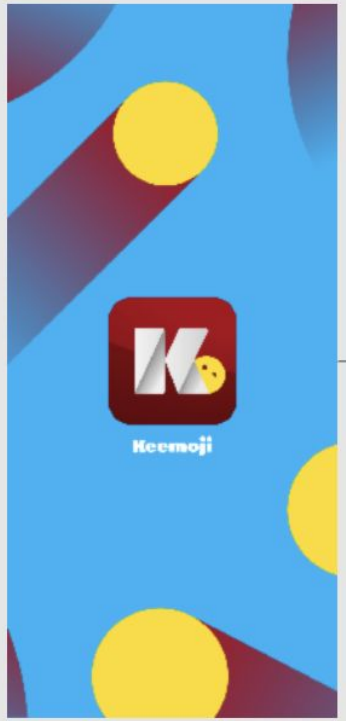


Оптимальное решение

UI Keemoji keyboard

Splash Screen

iOS



Анимированный сплеш экран под каждого партнера.
С простыми анимациями фейд ин и фейд аут.
