

Listen and say. Which problems are: *social? environmental?*

HELPING HANDS

Module 5 a

Which of these are common in your country?

Speaker 1

Speaker 3:

Studies show that more and more ordinary people are losing their homes. People are even sleeping in their cars or in tents because homeless shelters already have too many people in them.

of them left in the wild.

16th January 2010

3 1st February, 2010

The whole world is helping Haiti! Rescue teams have come from places as far away as Iceland and China. We have cleared the main roads of Port-au-Prince, though, so food and medical supplies should get through soon. More volunteers have just arrived. Together, hopefully, we can rebuild Haiti after this awful disaster!

ce.

Translate the underlined words.

1 16th January, 2010

I just arrived in Port-au-Prince, Haiti with the Lend-A-Hand volunteer team. The earthquake has destroyed most of the buildings. The earthquake has affected three million people. Thousands have lost their homes. Haiti suffers from earthquakes every year, but this is something else. Our team's first challenge is clearing the rubble, which is everywhere!

2 22nd January, 2010

On Tuesday a rescue team pulled a five-year-old boy from the rubble. He was still alive after several days. The United Nations has offered a wage to the people of Haiti for helping to clean up the streets. This helps them to buy food. Conditions are terrible, though. Thousands of people are living in tents with no toilets or running water. The earthquake has also caused tsunamis in nearby fishing villages and has damaged beaches and even swept homes out to sea!

Ex. 2b. Mark the sentences T(true), F(false) or NS (not stated).

1 16th January, 2010

I just arrived in Port-au-Prince, Haiti with the Lend-A-Hand volunteer team and I can't believe my eyes! The earthquake that happened four days ago has destroyed most of the buildings. The earthquake has affected three million people. Thousands have lost their lives or have terrible injuries, and even more have lost their homes. Haiti suffers from hurricanes and floods every year, but this is something else! Our team's first challenge is clearing the rubble, which is everywhere!

2 22nd January, 2010

On Tuesday a rescue team pulled a five-year-old boy out from the rubble. He was still alive after seven days! The United Nations has offered a small wage to the people of Haiti for helping to clean up the streets. This helps them to buy food. Conditions are terrible, though. Thousands of people are living in tents with no toilets or running water. The earthquake has also caused tsunamis in nearby fishing villages that have damaged beaches and even swept homes out to sea!
