**The study of the formation
technology bonsai of Juniper Chinese
in different styles**

By: the master of group № 111

Evtyuhova Anastasia

Supervisor:

Kruchkova V. A. & Fomina

T.N.

Moscow 2011

Aim: to comparison of the formation of
bonsai in various styles of Chinese
juniper

Tasks:

- ✓ Study technology of formation
bonsai juniper;
- ✓ Find the material and create a bonsai
in various styles of Chinese juniper;
- ✓ Compare technologies of formation
Mame and Shokhin bonsai juniper
Chinese.

Location of work

All-Russian Exhibition Centre, Pavilion № 23

"In a small
stuff to see
the great one"
—is the basic
principle of
bonsai

The imposition of wire plant

Wiring

Creating a Genie

Transplantation and choice of pots Shokhin

Transplantation and choice of pots for Mome

As a result:

Conclusion:

- ✓ The main methods of formation of juniper bonsai Chinese are pinch, cutting, laying wire.
- ✓ From specimens of the Chinese juniper to create bonsai, sizes have been chosen - Mome and Shokhin, styles have been chosen - Moegi and Fukinagasi.
- ✓ To form the bonsai Mame are required more painstaking, delicate work, the plants require less space for growth, but plants are more fastidious because of the small size of the container. Shokhin is less fastidious, and requires a little space for content.

Thank you for your attention!
