

## «What is an engineer»

Выполнил: Даутов Амир  
и Закиров Богдан

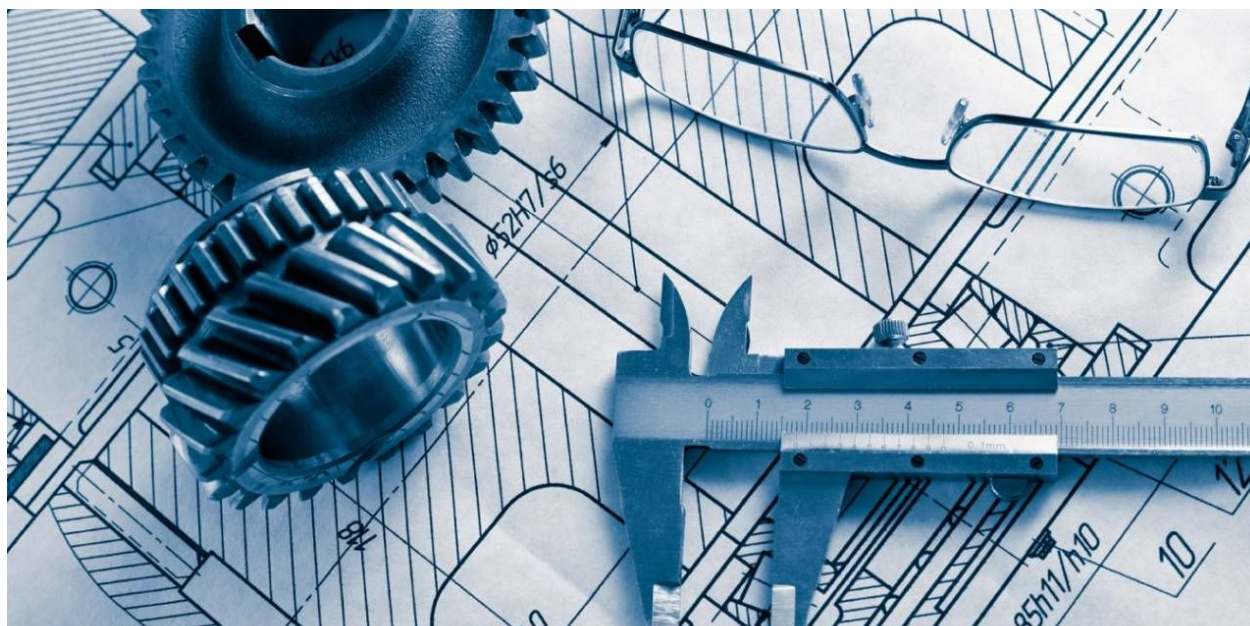

# Introduction

The aim of this project is to describe the profession of an engineer, its branches, history, education of an engineer, and the qualities of an engineer

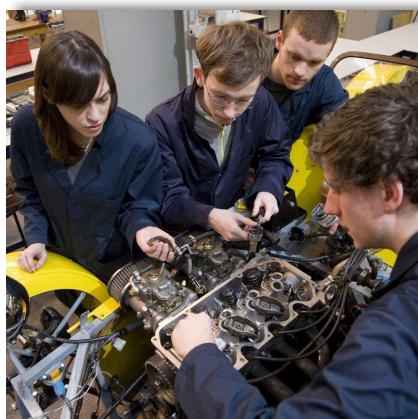

# What is an engineer

While scientists and inventors think of innovations, it is engineers who apply these discoveries to the world

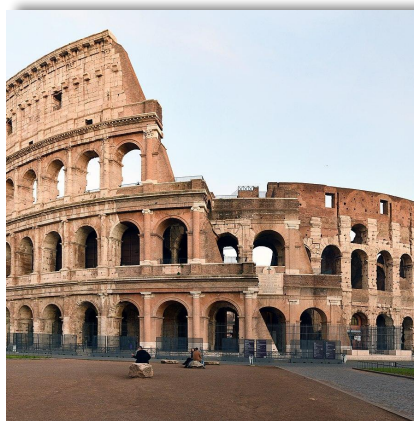

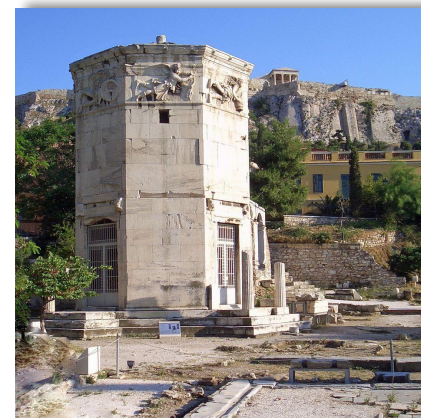

# Engineering branches

- Aerospace engineering
- Chemical engineering
- Civil engineering
- Electrical engineering
- Mechanical engineering

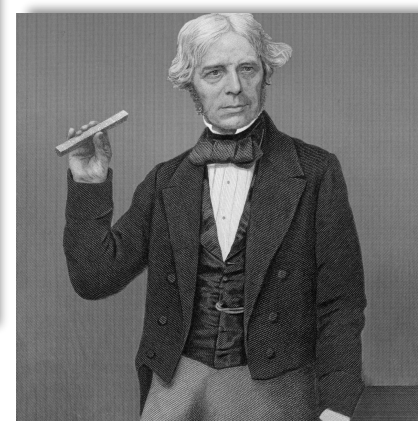

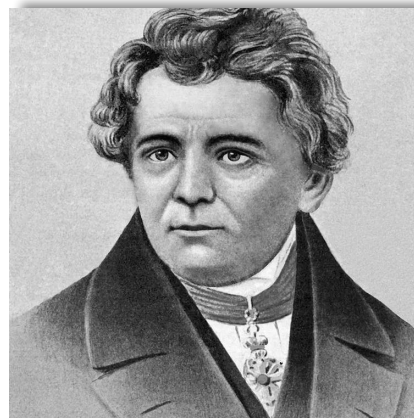

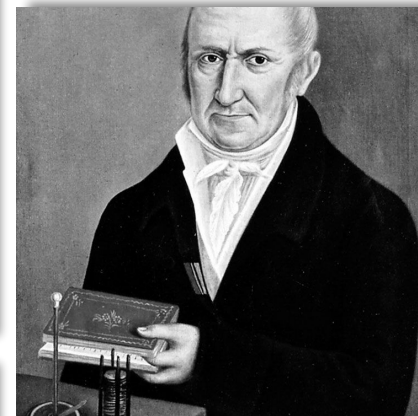

# Engineering in ancient times

- The Egyptians
- The Greeks
- The Romans

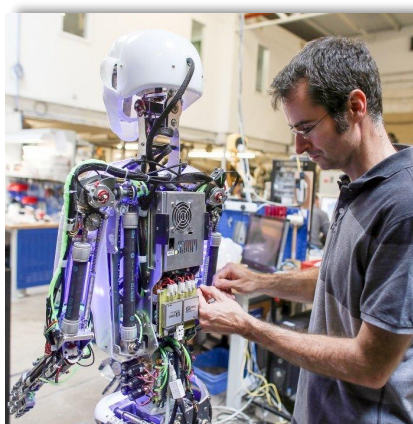

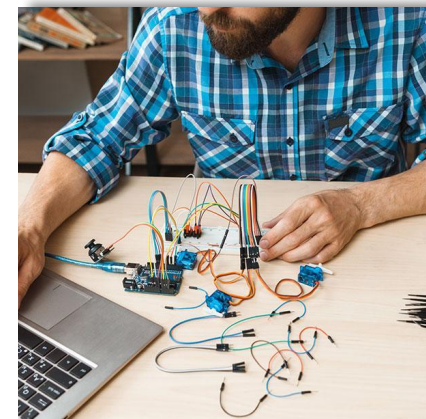

# Modern engineering

- William Gilbert
- Stephen Graham
- Alessandro Volta
- George Simon Ohm
- Michael Faraday

# Why become an engineer

- Analyze
- Invent
- Discover
- Create

# Engineering Education

Graduation from high school, admission to university,  
bachelor's degree and a master's degree

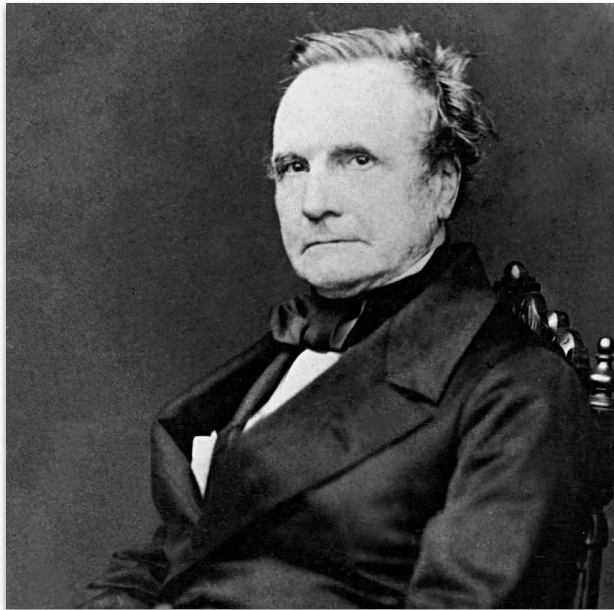

# Qualities of a competent engineer

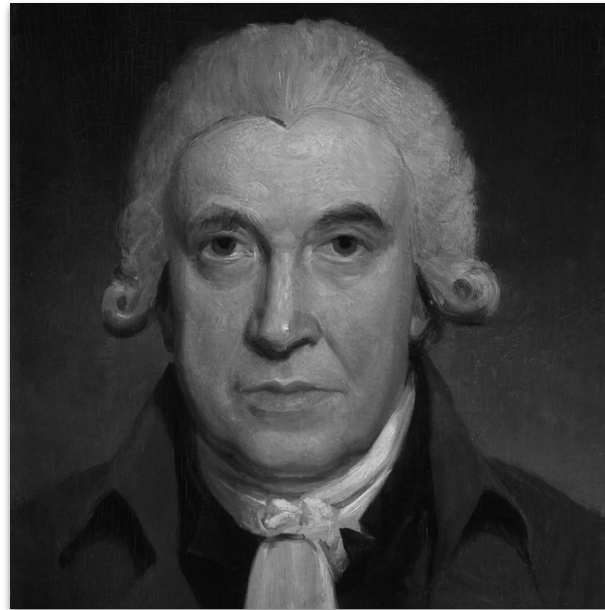

- Analytical skills
- Ability to Solve Problems and Creativity
- Communication skills
- Proficiency in Mathematics
- Science Computers
- Interest in Engineering and Persistence

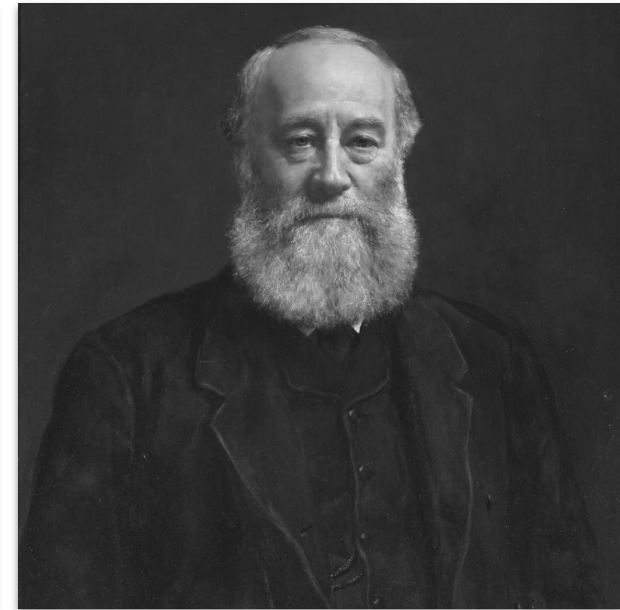

# Famous people of computer science and engineering

Babbage Charles

James Watt

James Prescott Joule
